

# RIVER INTAKES AND DIVERSION DAMS

ERNEST RAZVAN

*Senior Consultant, TAHAL Consulting Engineers, Ltd.  
Tel-Aviv, Israel*

ELSEVIER  
Amsterdam – Oxford – New York – Tokyo  
1989

## CONTENTS

|   | Page |
|---|------|
| Introduction  | v    |
| Acknowledgements  | viii |
| List of Abbreviations   | xiii |
| <br>Chapter 1: Water Demands and Water Sources                        |      |
| 1.1 Water Uses  | 1    |
| 1.2 Water Sources   | 9    |
| <br>Chapter 2: A Summary of River Hydraulics                          |      |
| 2.1 General   | 15   |
| 2.2 River Flow  | 18   |
| 2.3 River Sediments   | 41   |
| 2.4 River Channel   | 55   |
| 2.5 References  | 64   |
| <br>Chapter 3: General Design Criteria for River Diversion Projects   |      |
| 3.1 Definitions   | 67   |
| 3.2 Functions of the Diversion Works                                  | 70   |
| 3.3 Intake Hydraulics   | 73   |
| 3.4 Channel Morphology Changes Following a River Diversion            | 82   |
| 3.5 Classification of River Diversions                                | 90   |
| 3.6 The Hydraulic Design of River Diversion Projects                  | 92   |
| 3.7 General Design Criteria   | 98   |
| 3.8 References  | 102  |
| <br>Chapter 4: The Environmental Approach to River Diversion Projects |      |
| 4.1 Definitions   | 103  |
| 4.2 Evaluation of the Environmental Impact                            | 107  |
| 4.3 Environmental Impact of River Projects                            | 112  |
| 4.4 References  | 125  |

|   |     |
|---|-----|
| Chapter 5: The Diversion of Mountain Streams                  |     |
| 5.1 Specific Operating Conditions                             | 127 |
| 5.2 Intakes with Bottom Racks                                 | 129 |
| 5.3 Pier Intakes  | 145 |
| 5.4 References  | 148 |
| Chapter 6: The Layout of River Diversions                     |     |
| 6.1 General   | 151 |
| 6.2 River Diversions without Dams                             | 163 |
| 6.3 Small River Diversions                                    | 176 |
| 6.4 Common River Diversions                                   | 191 |
| 6.5 Very Large River Diversions                               | 220 |
| 6.6 References  | 244 |
| Chapter 7: The Intake Structure                               |     |
| 7.1 Intake Block Design                                       | 247 |
| 7.2 Intake Components   | 262 |
| 7.3 Examples  | 278 |
| 7.4 References  | 287 |
| Chapter 8: Diversion Dams                                     |     |
| 8.1 Gated Weirs   | 289 |
| 8.2 Spillways   | 323 |
| 8.3 References  | 341 |
| Chapter 9: Elements of the Hydraulic Design of Diversion Dams |     |
| 9.1 The Discharge Capacity of the Dam Outlets                 | 343 |
| 9.2 Energy Dissipation  | 355 |
| 9.3 Underground Contour and Foundation Design                 | 386 |
| 9.4 References  | 398 |
| Chapter 10: Elements of the Structural Design                 |     |
| 10.1 General  | 401 |
| 10.2 Diversion Dam Structure                                  | 411 |
| 10.3 Retaining Walls  | 417 |
| 10.4 Aspects of Concrete Technology                           | 423 |
| 10.5 References   | 426 |

|  |     |
|--|-----|
| Chapter 11: Earthfill Embankments                              |     |
| 11.1 General Problems  | 427 |
| 11.2 Typical Solutions   | 431 |
| 11.3 Foundation Treatment                                      | 437 |
| 11.4 Embankment Design   | 444 |
| 11.5 Some Constructional Problems                              | 454 |
| 11.6 Examples  | 459 |
| 11.7 References  | 463 |
| Chapter 12: Maintenance and Operation of River Diversion Works |     |
| 12.1 Preparatory Measures                                      | 465 |
| 12.2 Maintenance Operations                                    | 466 |
| 12.3 Operational Activities                                    | 468 |
| 12.4 Refernces   | 471 |
| Appendix A: Hydraulic Design Data                              | 473 |
| Appendix B: Soil Mechanics Data                                | 487 |
| Appendix C: Concrete in Diversion Structures                   | 501 |
