

Urban Drainage

119

David Butler[†] and John W. Davies^{††}

*†Department of Civil and Environmental Engineering
Imperial College, London*

*††School of the Built Environment
Coventry University*

Contents

<i>Preface</i>	x
<i>Acknowledgements</i>	xii
<i>Notation list</i>	xiii
<i>Abbreviations</i>	xix
1 Introduction	1
1.1 <i>What is urban drainage?</i>	1
1.2 <i>Effects of urbanisation on drainage</i>	2
1.3 <i>Urban drainage and public health</i>	5
1.4 <i>History of urban drainage engineering</i>	5
1.5 <i>Geography of urban drainage</i>	12
2 Urban drainage systems	16
2.1 <i>Types of system</i>	16
2.2 <i>Combined system</i>	17
2.3 <i>Separate system</i>	19
2.4 <i>Which system is better?</i>	20
2.5 <i>Urban water system</i>	22
3 Water quality	27
3.1 <i>Introduction</i>	27
3.2 <i>Basics</i>	27
3.3 <i>Parameters</i>	29
3.4 <i>Receiving water impacts</i>	40
3.5 <i>Receiving water standards</i>	44
4 Wastewater	50
4.1 <i>Introduction</i>	50
4.2 <i>Domestic</i>	51

4.3	<i>Non-domestic</i>	57
4.4	<i>Infiltration and inflow</i>	58
4.5	<i>Wastewater quality</i>	60
5	Rainfall	66
5.1	<i>Introduction</i>	66
5.2	<i>Measurement</i>	66
5.3	<i>Analysis</i>	69
5.4	<i>Single events</i>	78
5.5	<i>Multiple events</i>	80
6	Stormwater	86
6.1	<i>Introduction</i>	86
6.2	<i>Runoff generation</i>	86
6.3	<i>Overland flow</i>	91
6.4	<i>Stormwater quality</i>	98
7	System components and layout	107
7.1	<i>Introduction</i>	107
7.2	<i>Building drainage</i>	107
7.3	<i>System components</i>	109
7.4	<i>Design</i>	117
8	Hydraulics	122
8.1	<i>Introduction</i>	122
8.2	<i>Basic principles</i>	123
8.3	<i>Pipe flow</i>	127
8.4	<i>Part-full pipe flow</i>	137
8.5	<i>Open-channel flow</i>	147
9	Hydraulic features	156
9.1	<i>Flow controls</i>	156
9.2	<i>Weirs</i>	165
9.3	<i>Storage</i>	170
9.4	<i>Inverted siphons</i>	176
10	Foul sewers	180
10.1	<i>Introduction</i>	180
10.2	<i>Design</i>	180

10.3	<i>Large sewers</i>	183
10.4	<i>Small sewers</i>	192
11	Storm sewers	205
11.1	<i>Introduction</i>	205
11.2	<i>Design</i>	205
11.3	<i>Contributing area</i>	208
11.4	<i>Rational Method</i>	212
11.5	<i>Time-area Method</i>	220
11.6	<i>Hydrograph methods</i>	224
12	Combined sewers and combined sewer overflows	236
12.1	<i>Background</i>	236
12.2	<i>System flows</i>	236
12.3	<i>The role of CSOs</i>	239
12.4	<i>Control of pollution from combined sewer systems</i>	242
12.5	<i>Approaches to CSO design</i>	247
12.6	<i>Effectiveness of CSOs</i>	259
12.7	<i>CSO design details</i>	263
13	Pumped systems	269
13.1	<i>Why use a pumping system?</i>	269
13.2	<i>General arrangement of a pumping system</i>	269
13.3	<i>Hydraulic design</i>	271
13.4	<i>Rising mains</i>	277
13.5	<i>Types of pump</i>	279
13.6	<i>Pumping station design</i>	283
13.7	<i>Vacuum systems</i>	289
14	Structural design and construction	292
14.1	<i>Types of construction</i>	292
14.2	<i>Pipes</i>	294
14.3	<i>Structural design</i>	297
14.4	<i>Site investigation</i>	304
14.5	<i>Open-trench construction</i>	307
14.6	<i>Tunnelling</i>	309
14.7	<i>Trenchless methods</i>	311

15	Sediments	315
	15.1 <i>Introduction</i>	315
	15.2 <i>Origins</i>	317
	15.3 <i>Effects</i>	318
	15.4 <i>Transport</i>	321
	15.5 <i>Characteristics</i>	324
	15.6 <i>Self-cleansing design</i>	329
16	Operation and maintenance	337
	16.1 <i>Introduction</i>	337
	16.2 <i>Maintenance strategies</i>	337
	16.3 <i>Sewer location and inspection</i>	340
	16.4 <i>Sewer cleaning techniques</i>	345
	16.5 <i>Health and safety</i>	347
	16.6 <i>Pipe corrosion</i>	349
17	Rehabilitation	356
	17.1 <i>Introduction</i>	356
	17.2 <i>Preparing for sewer rehabilitation</i>	359
	17.3 <i>Methods of structural repair and renovation</i>	362
	17.4 <i>Hydraulic rehabilitation</i>	371
18	Flow models	374
	18.1 <i>Models and urban drainage engineering</i>	374
	18.2 <i>Deterministic models</i>	375
	18.3 <i>Elements of a flow model</i>	376
	18.4 <i>Modelling unsteady flow</i>	378
	18.5 <i>Computer packages</i>	385
	18.6 <i>Setting up and using a system model</i>	387
	18.7 <i>Flow models in context</i>	393
19	Quality models	396
	19.1 <i>Development of quality models</i>	396
	19.2 <i>The processes to be modelled</i>	398
	19.3 <i>Modelling pollutant transport</i>	400
	19.4 <i>Modelling pollutant transformation</i>	403
	19.5 <i>Available packages</i>	407
	19.6 <i>Use of quality models</i>	408
	19.7 <i>Alternative approaches to modelling</i>	410

20	Stormwater management	414
	20.1 <i>Introduction</i>	414
	20.2 <i>Local disposal</i>	417
	20.3 <i>Inlet control</i>	424
	20.4 <i>On-site storage</i>	426
	20.5 <i>Other devices</i>	432
	20.6 <i>Non-structural measures</i>	433
21	Integrated management and control	437
	21.1 <i>Introduction</i>	437
	21.2 <i>Urban Pollution Management</i>	437
	21.3 <i>Real-time control</i>	439
	21.4 <i>Integrated modelling</i>	445
	21.5 <i>In-sewer treatment</i>	448
22	Low-income communities	454
	22.1 <i>Introduction</i>	454
	22.2 <i>Health</i>	455
	22.3 <i>Option selection</i>	457
	22.4 <i>On-site sanitation</i>	458
	22.5 <i>Off-site sanitation</i>	461
	22.6 <i>Storm drainage</i>	464
23	Towards sustainability	471
	23.1 <i>Introduction</i>	471
	23.2 <i>Sustainable urban drainage</i>	472
	23.3 <i>Steps in the right direction</i>	477
	<i>Index</i>	483
