Columbus, Ohio

# Contents

## Part One SOIL MATERIALS

---

1

### Chapter 1 Physical Character of Soil Constituents 2

- 1.1 Rock, Soil and Weathering Processes, 2
- 1.2 Character of the Coarse Soil Fraction, 4
  - 1.2.1 Particle Size and Sieve Analysis, 4
  - 1.2.2 Particle Shape and Angularity, 5
  - 1.2.3 Specific Gravity, 5
  - 1.2.4 Toughness and Durability, 8
- 1.3 Character of the Fine Soil Fraction, 8
  - 1.3.1 Chemical Structure of Clays, 8
  - 1.3.2 Types of Clays, 9
  - 1.3.3 Cohesive and Cohesionless Soils, 11
- 1.4 Summary, 11
  - References, 12
  - Problems, 12

### Chapter 2 Natural Soil Deposits 13

- 2.1 Soil Structure, 13
  - 2.1.1 Sands, 13
  - 2.1.2 Clays, 14
- 2.2 Soil Deposit Origins and Types, 15
  - 2.2.1 Residual Soils, 16
  - 2.2.2 Transported Soils, 17

- 2.3 Summary, 21
- References, 22
- Problems, 22

## Chapter 3 Soil Index Properties 23

- 3.1 Overview of Soils Testing, 23
- 3.2 Coarse-Grained Constituents—Grain Size Distribution, 24
- 3.3 Fine-Grained Constituents: Soil Plasticity, 28
- 3.4 Indices for the Soil Mass, 32
- 3.5 Summary, 39
- References, 39
- Problems, 39

## Chapter 4 Soil Classification 41

- 4.1 Textural Classification, 41
- 4.2 Unified Soil Classification System, 43
  - 4.2.1 *Laboratory Classification*, 43
  - 4.2.2 *Field Classification*, 49
- 4.3 AASHTO Classification System, 52
- 4.4 Summary, 54
- References, 57
- Problems, 58

## Chapter 5 Stress Analysis and Engineering Properties 59

- 5.1 The Effective Stress Principle, 60
- 5.2 Vertical Earth Pressure Calculations, 61
- 5.3 Capillary Stresses, 62
- 5.4 Permeability, 65
  - 5.4.1 *Coefficient of Permeability and Darcy's Law*, 65
  - 5.4.2 *Laboratory Tests*, 67
  - 5.4.3 *Field Tests*, 67
  - 5.4.4 *Permeability in Fine Soils*, 69
- 5.5 Compressibility, 69
  - 5.5.1 *Consolidation Settlement in Soils*, 69
  - 5.5.2 *Time Rate of Consolidation*, 72
- 5.6 Soil Strength, 76
  - 5.6.1 *Strength of Sands and Gravels*, 79
  - 5.6.2 *Strength of Clays*, 80
- 5.7 Summary, 82
- References, 82
- Problems, 82

**PART II EARTHWORK IN THE  
CONSTRUCTION CONTRACT****87**

---

<b>Chapter 6</b>	<b>The Contract and Contract Documents</b>	<b>88</b>
6.1	Parties to the Contract, 89	
6.1.1	<i>Relationship of the Parties, 89</i>	
6.1.2	<i>Construction Management, 91</i>	
6.2	Document Contents, 91	
6.3	Bid Preparation, 92	
6.3.1	<i>Examination of Contract Documents, 92</i>	
6.3.2	<i>Itemization of Costs, 92</i>	
6.3.3	<i>Variation of Quantities, 94</i>	
6.4	Contract Execution, 94	
6.4.1	<i>Contract Specifications, 94</i>	
6.4.2	<i>Disputes, 97</i>	
6.4.3	<i>Changed Conditions, 98</i>	
6.5	Summary, 99	
	References, 100	
<b>Chapter 7</b>	<b>Interpretation of Soils Reports</b>	<b>101</b>
7.1	Field Explorations, 102	
7.1.1	<i>Direct Exploration, 102</i>	
7.1.2	<i>Semidirect Exploration, 103</i>	
7.1.3	<i>Indirect Exploration Methods, 109</i>	
7.2	Groundwater Conditions, 115	
7.3	Soils Engineering Reports, 115	
7.4	Other Information Sources, 116	
7.5	Summary, 120	
	References, 120	
	Problems, 121	
<b>Chapter 8</b>	<b>Embankment Construction and Control</b>	<b>122</b>
8.1	Moisture-Density Relationships, 123	
8.1.1	<i>Cohesionless Soils, 123</i>	
8.1.2	<i>Cohesive Soils, 124</i>	
8.2	Properties of Compacted Soils, 125	
8.2.1	<i>Relative Density, 125</i>	
8.2.2	<i>Water Content, 127</i>	

- 8.3 Laboratory Compaction Procedures, 128
- 8.4 Compaction Specifications, 130
  - 8.4.1 *Relative Compaction*, 130
  - 8.4.2 *Prescriptive Specifications*, 130
  - 8.4.3 *Performance Specifications*, 133
- 8.5 Shrink and Swell from Borrow to Fill, 134
- 8.6 Compaction Equipment for Shallow Lifts, 137
- 8.7 Compaction Control Testing, 142
- 8.8 Chemical Stabilization of Fills, 148
- 8.9 Stabilization of Fill Foundations, 150
  - 8.9.1 *Surcharge Loading*, 151
  - 8.9.2 *Vertical Drains*, 152
- 8.10 Deep Compaction of Sands, 152
- 8.11 Summary, 158
  - References, 159
  - Problems, 160

## Chapter 9 Dewatering 163

- 9.1 Specifications, 163
- 9.2 Underwater Excavations, 164
  - 9.2.1 *Caissons*, 164
  - 9.2.2 *Cofferdams*, 167
- 9.3 Seepage Barriers, 167
  - 9.3.1 *Slurry Trench Methods*, 168
  - 9.3.2 *Freezing*, 170
  - 9.3.3 *Grouting*, 170
- 9.4 Open Sumps, 170
  - 9.4.1 *Cohesive Soils*, 172
  - 9.4.2 *Cohesionless Soils*, 173
- 9.5 Wells and Well-Point Systems, 174
  - 9.5.1 *Single Wells*, 174
  - 9.5.2 *Multiple Wells*, 174
  - 9.5.3 *Well Points*, 176
- 9.6 Electroosmosis, 179
- 9.7 Planning Dewatering Operations, 180
- 9.8 Summary, 182
  - References, 182
  - Problems, 183

## Chapter 10 Excavations and Excavation Supports 185

- 10.1 Specifications, 186
- 10.2 Design of Excavation Slopes, 186
  - 10.2.1 *Slope Stability*, 186

- 10.2.2 *Slope Protection, 191*
- 10.3 Shallow Trenches and Excavation Safety, 192
- 10.4 Support for Shallow Trenches, 196
- 10.5 Support for Deep Cuts, 199
  - 10.5.1 *Lateral Earth Pressure Calculations, 199*
  - 10.5.2 *Excavation Support Methods, 201*
- 10.6 Planning for Excavation Supports, 207
- 10.7 Summary, 209
  - References, 209
  - Problems, 209

## Chapter 11 Foundation Construction 211

- 11.1 Settlement Analysis, 212
  - 11.1.1 *Footings on Cohesive Soils, 212*
  - 11.1.2 *Footings on Cohesionless Soils, 214*
- 11.2 Foundation Bearing Failure, 215
  - 11.2.1 *Shallow Foundations, 216*
  - 11.2.2 *Deep Foundations, 218*
- 11.3 Footing and Raft Construction, 225
- 11.4 Foundation Piling, 225
  - 11.4.1 *Pile Types, 227*
  - 11.4.2 *Pile Hammers, 228*
  - 11.4.3 *Jetting, Spudding, and Predrilling, 239*
  - 11.4.4 *Pile Dynamics, 239*
  - 11.4.5 *Contract Provisions, 242*
  - 11.4.6 *Driving Effects, 250*
- 11.5 Drilled Piers, 252
  - 11.5.1 *Applications, 252*
  - 11.5.2 *Construction, 253*
  - 11.5.3 *Problems in Construction, 255*
- 11.6 Summary, 256
  - References, 257
  - Problems, 258

## Chapter 12 Construction Access and Haul Roads 260

- 12.1 Pavement Components and Their Functions, 260
- 12.2 Subgrade Materials and Strength Requirements, 261
- 12.3 Subgrade Improvement, 264
- 12.4 Maintenance Requirements, 267
- 12.5 Summary, 268
  - References, 268
  - Problems, 269

<b>Appendix A</b>	<b>Laboratory Testing Exercises</b>	<b>270</b>
A.1	Calibration of Sand-Cone Device and Density Testing-Sand, and Determination of Field Unit Weight of Soils, 270	
A.1.1	<i>Determine Volume of Sand-Cone Jar, 273</i>	
A.1.2	<i>Calibration of Density Testing Sand, 274</i>	
A.1.3	<i>Calibration of Sand Cone and Plate, 274</i>	
A.1.4	<i>Determination of Field Unit Weight, 274</i>	
A.2	Preparation of Soil Samples and Performance of Particle-Size Analyses, 275	
A.2.1	<i>Sieve Analysis, 275</i>	
A.2.2	<i>Hydrometer Analysis, 281</i>	
A.3	Specific Gravity of Soils, 283	
A.4	Soil Consistency Tests, 287	
A.4.1	<i>Plastic Limit Test, 287</i>	
A.4.2	<i>Liquid Limit Test, 290</i>	
A.5	Compaction Tests, 292	
A.6	Relative Density, 296	
A.6.1	<i>Maximum Density Procedure (Dry Method), 297</i>	
A.6.2	<i>Minimum Density Procedures, 299</i>	
A.7	Permeability Tests, 300	
A.7.1	<i>Falling-Head Test, 300</i>	
A.7.2	<i>Constant-Head Test, 303</i>	
A.8	Direct-Shear Test on Sand, 306	
A.9	Unconfined Compression Test for Cohesive Soils, 309	
A.10	Triaxial-Compression Test on Sand, 313	
A.11	Consolidation Test, 315	
<b>Appendix B</b>	<b>Pile Hammer Specifications</b>	<b>324</b>
B.1	Air/Steam Hammers, 324	
B.2	Diesel Hammers, 330	
B.3	Hydraulic Impact Hammers, 335	
B.4	Vibratory Hammers, 341	
<b>Nomenclature</b>	<b>348</b>	
<b>Problem Solutions</b>	<b>352</b>	
<b>Index</b>	<b>354</b>
