## TABLE OF CONTENTS

<b>ACKNOWLEDGEMENTS</b>	ii
<b>TABLE OF CONTENTS</b>	iii
<b>SUMMARY</b>	vi
<b>LIST OF TABLES</b>	viii
<b>LIST OF FIGURES</b>	x
<b>LIST OF SYMBOLS</b>	xvi

### **CHAPTER 1 INTRODUCTION**

1.1 Background	1
1.2 Objectives and Scopes	2
1.3 Methodology	3

### **CHAPTER 2 LITERATURE REVIEW**

2.1 Slope Stability Problems in Tropical Region	4
2.2 Residual Soils in Singapore	5
2.2.1 Residual Soils of The Sedimentary Jurong Formation	6
2.2.2 Residual Soils of The Bukit Timah Granitic Formation	8
2.2.3 Assessment of Engineering Characteristics of Residual Soils from the Jurong Sedimentary Formation and the Bukit Timah Granitic Formation	12
2.3 Compacted Soil	13
2.4 Consolidated Drained (CD) Triaxial Test	14
2.5 Constant Water Content (CW) Triaxial Test	18
2.6 Multistage Testing	20
2.7 Failure Criteria	21
2.8 Selection of Strain Rate for Triaxial Tests	23
2.9 Axis Translation Technique	26
2.10 Non-linearity of Failure Envelope	27
2.11 Soil-Water Characteristic Curve (SWCC) of Unsaturated Soils	29

### **CHAPTER 3 APPLICABLE THEORY**

3.1 Shear Strength Equation for Unsaturated Soils	31
---	----

3.1.1 Extended Mohr-Coulomb Failure and Envelope and Stress Point Envelope	32
3.2 Stress Path for Consolidated Drained (CD) Triaxial Test	37
3.3 Stress Path for Constant Water Content (CW) Triaxial Test	38
3.4 Analytical Approach for Calculating Strain Rate	39
3.5 Pore Pressure Parameters	40
3.6 Volume Change of Unsaturated Soils	44

## **CHAPTER 4 RESEARCH PROGRAMME**

4.1 Outline of Research Programme	45
4.2 Description of Sites	45
4.3 Preparation of the Compacted Specimens from the Residual Soil of the Jurong Sedimentary Formation	53
4.3.1 Criteria for Preparing the Specimen	53
4.3.2 Design of Static Compaction Mould	54
4.3.3 Static Compaction	55
4.3.4 Test Procedure for Obtaining Soil-Water Characteristic Curve	58
4.3.5 Triaxial Testing Equipment Set-Up	60
4.3.6 Triaxial Test Programme	63
4.3.7 Triaxial Test Procedure	63

## **CHAPTER 5 PRESENTATION OF TEST RESULTS**

5.1 Laboratory Tests	71
5.1.1 Index Properties	71
5.2 Tests for Obtaining Soil-Water Characteristic (SWCC) Curve	74
5.3 Strain Rate Selection	78
5.3.1 Strain Rate Selection for the Consolidated Drained (CD) and the Constant Water Content (CW) Triaxial Tests on the Compacted Soil	78
5.3.2 Strain Rate Selection for the Consolidated Drained Triaxial Tests on the Undisturbed Soils	80
5.4 Triaxial Test Results	81
5.4.1 Consolidated Drained (CD) Triaxial Tests on the Compacted Residual Soil from the Jurong Sedimentary Formation	82
5.4.2 Constant Water Content (CW) Triaxial Tests on the Compacted Residual Soil from the Jurong Sedimentary Formation	91
5.4.3 Multistage Consolidated Drained (CD) Triaxial Tests on the Undisturbed Soils	103

5.4.3.1 The Undisturbed Residual Soil from the Bukit Timah Granitic Formation	103
5.4.3.2 The Undisturbed Residual Soil from the Jurong Sedimentary Formation	106

## **CHAPTER 6 DISCUSSIONS**

6.1 Failure Criteria	110
6.2 Shear Strength of the Soils	117
6.2.1 Failure Envelopes of the Compacted Specimens from the Jurong Sedimentary Formation	117
6.2.2 Failure Envelopes of the Undisturbed Specimens	123
6.2.2.1 Undisturbed Residual Soil of the Bukit Timah Granitic Formation	123
6.2.2.2 Undisturbed Residual Soil of the Jurong Sedimentary Formation	126
6.3 Comparison of the Strength Parameters Obtained from the Consolidated Drained (CD) Triaxial Tests and the Constant Water Content (CW) Triaxial Tests On the Compacted Residual Soil from the Jurong Sedimentary Formation	130
6.4 Volume Change and Matric Suction Change of the Compacted Residual Soil from the Jurong Sedimentary Formation	142
6.5 Comparison of the Shear Strength Parameters between the Residual Soils from the Bukit Timah Granitic Formation and the Jurong Sedimentary Formation	148

## **CHAPTER 7 CONCLUSIONS AND RECOMMENDATIONS**

7.1 Conclusions	150
7.2 Recommendations for Future Research	152

## **REFERENCES**

APPENDIX A Calibration Data for the Triaxial Set-Up	154
APPENDIX B Results of the Consolidated Drained Tests on the Undisturbed Soils	
APPENDIX C Water Content Profiles of the Compacted Specimens in the Consolidated Drained and Constant Water Content Tests	
APPENDIX D Calculations of Strain Rate for the Unsaturated Triaxial Tests on the Undisturbed Soils
