

PROCEEDINGS OF THE SIXTH INTERNATIONAL CONFERENCE ON NUMERICAL
METHODS IN GEOMECHANICS / INNSBRUCK / 11-15 APRIL 1988

Numerical Methods in Geomechanics Innsbruck 1988

Edited by

G.SWOBODA

Institute of Structural Engineering, University of Innsbruck

VOLUME ONE:

Main lectures

- 1 *Numerical methods and programming*
- 2 *Constitutive laws of geotechnical materials*
- 3 *Flow and consolidation*

Published on behalf of the International Committee for Numerical Methods in Geomechanics by

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988

Contents

Preface	XI
<i>Main lectures</i>	
Behavior and simulation of soil tunnel with thin cover <i>Toshihisa Adachi, Tadashi Kikuchi & Hiroshi Kimura</i>	3
Progress in BEM applications in geomechanics via examples <i>P.K.Banerjee & Gary F.Dargush</i>	13
Application of analytic and semi-analytic techniques to geotechnical analysis <i>J.R.Booker</i>	23
Incrementally multi-linear and non-linear constitutive relations: A comparative study for practical use <i>F.Darve, B.Chau & H.Dendani</i>	37
Unified approach for constitutive modelling for geologic materials and discontinuities <i>C.S.Desai</i>	45
Dynamic nonlinear hysteretic effective stress analysis in geotechnical engineering <i>W.D.Liam Finn, M.Yogendrakumar & N.Yoshida</i>	55
Some numerical techniques for free-surface seepage analysis <i>Giancarlo Gioda & Augusto Desideri</i>	71
Numerical methods versus statistical safety in geomechanics <i>G.Gudehus</i>	85
Simulation of hydraulic fracture in poroelastic rock <i>A.R.Ingraffea & T.J.Boone</i>	95
A modelling of jointed rock mass <i>T.Kawamoto</i>	107
Some recent developments in interactive computer graphics for 3-D nonlinear geotechnical FEM analysis <i>Fred H.Kulhawy, Kirk L.Gunsallus, Anthony R.Ingraffea & Patrick C.-W.Wong</i>	121
Static and dynamic approaches to rock burst phenomena <i>Z.Mróz</i>	135

Two 'Class A' predictions of offshore foundation performance <i>I.M.Smith</i>	137
Numerical modelling of tunnel blasting <i>S.Valliappan & K.K.Ang</i>	145
Stability and bifurcation in geomechanics <i>I.G.Vardoulakis</i>	155
Simple models for soil behaviour and applications to problems of soil liquefaction <i>O.C.Zienkiewicz, M.Pastor & A.H.C.Chan</i>	169
1 Numerical techniques and programming	
Experiences with the analysis of geotechnical problems solved by the FEM using different equation solvers on several computers <i>Hermann Schad & Frank Breinlinger</i>	183
Some computational experiences of a geomechanical benchmark in rock salt <i>D.Piper & N.C.Knowles</i>	189
Improved algorithm for non-linear analysis by the finite element method <i>P.Humbert & P.Mestat</i>	195
A unified approach to the analysis of saturated-unsaturated elastoplastic porous media <i>B.A.Schrefler & L.Simoni</i>	205
Uni-axial wave propagation through fluid-saturated elastic soil layer <i>L.W.Morland, R.S.Sandhu & W.E.Wolfe</i>	213
Formulations and a methodology for computing the response of unsaturated soils to changes in temperature <i>H.H.Vaziri</i>	221
Several aspects of formation of structures of computer programs, selection and algorithmization of medium models in geomechanics <i>A.A.Yufin, V.I.Titkov, A.S.Morozov & T.L.Berdzenishvili</i>	231
A boundary integral code based on a variational formulation <i>K.Ben Naceur</i>	237
The use of Lees' algorithm in the analysis of some ground heat and mass transfer problems <i>H.R.Thomas & S.W.Rees</i>	243
Hybrid finite element model utilized for fracture of concrete beams on elastic foundations <i>S.M.Sargand, G.A.Hazen & H.Zheng</i>	251
Limit analysis of plane problems in soil mechanics <i>S.W.Sloan</i>	257
Displacement discontinuities and interactive graphics for three-dimensional, hydraulic fracturing simulators <i>L.Vandamme & P.A.Wawrzynek</i>	265
Stress analysis of large structures in hydraulic engineering by weighted residuals method <i>Chang Yang & Dai Miaoling</i>	273

An automatic soil parameters identification software <i>D.Aubry & E.Piccuozzu</i>	279
 <i>2 Constitutive laws of geotechnical materials</i>	
Generalized constitutive equations of saturated sand <i>Tej B.S.Pradhan, Tadanobu Sato & Toru Shibata</i>	287
A cyclic viscoplastic constitutive model for clay <i>F.Oka</i>	293
Coupled elasto-plastic deformation-flow finite element analysis using imaginary viscosity procedure <i>M.Shoji, T.Matsumoto, S.Morikawa, H.Ohta & A.Iizuka</i>	299
Strength behavior of granular materials using discrete numerical modelling <i>John M.Ting & Brent T.Corkum</i>	305
A complete constitutive law for soil structure interfaces <i>M.Boulon, N.Hoteit & P.Marchina</i>	311
Numerical investigations on discharging silos <i>J.Eibl & G.Rombach</i>	317
A generalization of Hvorslev's equivalent stress <i>D.Kolymbas & M.Topolnicki</i>	321
Incremental theory of elasticity and plasticity under cyclic loading <i>Y.Ichikawa, T.Kyoya & T.Kawamoto</i>	327
Numerical simulation of the behaviour of saturated sand <i>M.J.Prabucki & W.Wunderlich</i>	335
A constitutive model of soils for evaluating principal stress rotation <i>H.Matsuoka, Y.Suzuki & K.Sakakibara</i>	343
Assessment of a new class of implicit integration schemes for a cone-cap plasticity model <i>K.Runesson, E.Pramono, S.Sture & K.Axelsson</i>	349
Model and parameters for the elastic behaviour of soils <i>Poul V.Lade</i>	359
Discontinuous numerical model for partially saturated soils at low saturation <i>J.A.Gili & E.E.Alonso</i>	365
Modelling the development of rupture surfaces using displacement-type finite element methods <i>R.G.Wan, D.H.Chan & N.R.Morgenstern</i>	373
Constitutive subroutine to simulate alternating loading of granular materials <i>F.Molenkamp</i>	379
Constitutive equation of tertiary sedimentary mudstone considering strain hardening and strain softening <i>K.Watanabe, A.Denda, H.Kawasaki & A.Nakazawa</i>	385

Theoretical evaluation of the frictional damping of rocks <i>Giovanni Alpa & Luigi Gambarotta</i>	391
Analysis of the cone penetration test by the strain path method <i>C.I.Teh & G.T.Houlsby</i>	397
Constitutive laws including kinematic hardening for clay with pore water pressure and for sand <i>H.Duddeck, D.Winselmann & F.T.König</i>	403
An anisotropic hardening model for the mechanical behaviour of clay <i>Hiroyoshi Hirai</i>	415
Three-dimensional shearing deformation of sand <i>N.Moroto</i>	421
Model of sand behaviour towards shearing and compressibility in three-dimensional conditions of stress and strain <i>S.Chaffois & J.Monnet</i>	427
Elasto-plastic anisotropic hardening model for sand in a wide stress region <i>H.Murata & N.Yasufuku</i>	435
Cap parameters for clayey soils <i>D.N.Humphrey & R.D.Holtz</i>	441
A constitutive model with two yield surfaces for soils <i>Z.Z.Yin</i>	447
Verification of elasto-viscoplastic model of normally consolidated clays in undrained creep <i>T.Matsui & N.Abe</i>	453
A solution method for continua with continuously varying stiffnesses <i>M.A.Koenders & A.F.Williams</i>	461
Mathematically consistent formulation of elastoplastic constitutive equations <i>K.Hashiguchi</i>	467
On errors involved in the experimental-numerical investigation in triaxial compression tests <i>Janusz M.Dluzewski & Lech A.Winnicki</i>	473
Non-associated flow rules in computational plasticity <i>Martin B.Reed & J.Cassie</i>	481
Constitutive relations with general Masing rule under multi-dimensional stress condition <i>K.Nishi & M.Kanatani</i>	489
Some constitutive laws for creeping soil and for rate-dependent sliding at interfaces <i>L.Vulliet & K.Hutter</i>	495
Model with multiple mechanisms for anisotropic behaviours of sands <i>D.Pradel</i>	503
On the constitutive equations of the chalk <i>R.Charlier & J.P.Radu</i>	509

Mathematical modelling and prognose dimensions of karst sinkholes in multilayered soil bases of buildings and structures <i>E.A.Sorochan, G.M.Troitzky, P.D.Grigoruk & V.V.Tolmachyov</i>	515
A model for predicting the viscoplastic stress-strain behaviour of clay in three-dimensional stresses <i>T.Nakai & K.Tsuzuki</i>	521
Effect of soil strength on numerical simulation <i>Shad M.Sargand & R.Janardhanam</i>	529
Constitutive models constrained by the entropy maximum principle <i>P.Scharle</i>	537
Geomechanical applications of fully coupled, transient thermoelasticity <i>J.P.Carter & J.R.Booker</i>	541
3 Flow and consolidation	
Numerical analysis of soil stability around deep wellbores <i>H.H.Vaziri</i>	551
Numerical investigation of hydraulic fracturing in clays <i>H.K.Tam, H.K.Mhach & R.I.Woods</i>	563
* Consolidation analysis of soils by elasto-plastic constitutive models <i>Y.K.Cheung, Y.Tsui & P.Y.Lu</i>	571
Deformation of a sedimentary overburden on a slowly creeping substratum <i>N.C.Last</i>	577
Evaluation of a quasi-dynamic algorithm for soil consolidation problems <i>D.Kovačić & A.Szavits-Nossan</i>	587
* Consolidation of layered soils under time-dependent loading <i>J.C.Small & J.R.Booker</i>	593
Constitutive modelling for anisotropically overconsolidated clay <i>Y.Kohata, T.Mitachi & M.Kawada</i>	599
Pore pressure built up as a result of wave action <i>S.E.J.Spiereburg</i>	605
Modelling thermal, three-dimensional, three-phase flow in a deforming soil <i>W.S.Tortike & S.M.Farouq Ali</i>	611
* Finite difference analysis of consolidation by vertical drains with well resistance <i>A.Onoue</i>	619
Interpretation of concrete top base foundation behaviour on soft ground by coupled stress flow finite element analysis <i>Katsuhiko Arai, Yuzo Ohnishi, Masakuni Horita, Ikuo Yasukawa & Shinji Nakaya</i>	625
On the determination of the matrix of permeability for partially saturated finite elements <i>S.Gobbi & S.M.Petrazzuoli</i>	631

Imperfect underground barriers under transient seepage conditions <i>R.Jappelli, F.Federico & C.Valore</i>	637
Prediction of consolidation of elastoplastic subsoils <i>A.L.Goldin, A.A.Gotlif & V.S.Prokopovich</i>	643
Effects of test procedure on constant rate of strain pressuremeter tests in clay <i>I.C.Pyrah, W.F.Anderson & L.S.Pang</i>	647
Analytical procedure for evaluating pore-water pressure and deformation of saturated clay ground subjected to traffic loads <i>M.Hyodo & K.Yasuhara</i>	653
Partial-drained behaviour of clay under cyclic loading <i>Kazuya Yasuhara, Kazutoshi Hirao & Masayuki Hyodo</i>	659
Consolidation settlements of interacting structural foundations <i>A.P.S.Selvadurai & K.R.Gopal</i>	665
Undrained bearing capacity of anisotropically consolidated clay <i>Akira Nishihara & Hideki Ohta</i>	675
Three-dimensional bearing capacity analysis of clays under partially drained condition <i>A.Asaoka & S.Ohtsuka</i>	683
The effect of anisotropy on consolidation in a soil layer <i>M.F.Randolph & J.R.Booker</i>	689
Flow analysis of clay layer due to berth construction <i>T.Adachi, F.Oka & M.Mimura</i>	697
