

Numerical Methods in Geomechanics Innsbruck 1988

Edited by

G.SWOBODA

Institute of Structural Engineering, University of Innsbruck

VOLUME TWO:

4 *Ice mechanics*

5 *Rock hydraulics*

6 *Modeling of joints, interfaces and discontinuum*

7 *Modeling of infinite domains*

8 *Soil-structure interaction, piles*

9 *Earth structures, slopes, dams, embankments*

Published on behalf of the International Committee for Numerical Methods in Geomechanics by

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988

Contents

4 Ice mechanics

- Modelling of shallow slope creep by finite element method 707
D.F.E.Stolle
- Numerical models of idealized ice shelf flow 713
M.A.Lange & D.R.MacAyeal
- Triaxial creep properties of frozen soil and their measurement 719
Song Ling & Zhang Xiang Dong
- A constitutive model for frozen sand 727
Toshihisa Adachi & Fusao Oka
- Ground movements by tunnel driving in the protection of frozen shells 733
H.Meissner

5 Rock hydraulics

- Finite difference and finite element modelling of an aquifer in Cretaceous chalk 747
P.Y.Bolly, A.G.Dassargues & A.Monjoie
- Free-surface tracking through non-saturated models 757
D.Aubry & O.Ozanam
- Finite element double-porosity model for deformable saturated-unsaturated fractured rock mass 765
Yuzo Ohnishi, Takuo Shiota & Akira Kobayashi
- An integral equation technique for the propagation of a vertical hydraulic fracture in a poroelastic formation 777
Emmanuel Detournay, Luc Vandamme & Alexandre H.-D.Cheng
- An analysis of hydraulic fracturing by the finite element method 785
A.Polillo Filho, A.Maia da Costa & Nelson F.Favilla Ebecken
- Coupled models and free-surface seepage analysis without mesh iteration 791
M.Dysli & J.Rybisar
- Analysis of the growth and interaction of multiple-plane hydraulic fractures 797
V.M.Narendran & K.Y.Lam

Analysis of stress, water flow and heat transfer in fractured rocks <i>R.Hamajima, T.Kawai, M.Watanabe, H.Koide, M.Kusabuka & T.Yamada</i>	803
The coupled relationships between mechanical parameters and hydraulic ones of a structural surface and their application <i>Sun Guangzhong, Liu Jishan & Guo Zhi</i>	809
 6 Modeling of joints, interfaces and discontinuum	
Elastic moduli of well-jointed rock masses <i>W.G.Pariseau & H.Moon</i>	815
KEM in geomechanics <i>Peter Gussmann</i>	823
A macro joint element for nonlinear arch dam analysis <i>J.-M.Hohberg & H.Bachmann</i>	829
Shear element techniques for tunnel design <i>G.Rome & W.E.Bamford</i>	835
A comprehensive numerical model of rock joints and its implementation in a finite element model <i>H.Werner, J.Bellmann, S.Niedermeyer, H.Bauer & W.Rahn</i>	841
Adaptive creation of kinematical discontinuities <i>G.Adjedj & D.Aubry</i>	849
Modelling of contaminant movement through fractured or jointed media with parallel fractures <i>R.K.Rowe & J.R.Booker</i>	855
Numerical interpretation of borehole jack test in consideration of joint stiffness <i>Chikaosa Tanimoto, Shojiro Hata, Akira Nishiwo, Kozo Miki & Jun'ichi Miyagawa</i>	863
A correction for sampling bias on joint orientation for finite size joints intersecting finite size exposures <i>P.H.S.W.Kulatilake</i>	871
Mathematical model of probabilistic analysis for a jointed rock slope <i>Zhang Xing</i>	877
Analysis of fault initiation and fault spacing in elasto-plastic sedimentary materials <i>H.W.M.Witlox</i>	883
Application of a joint model to concrete-sandstone interfaces <i>J.P.Carter & L.H.Ooi</i>	889
Numerical analysis of discontinuous block systems <i>J.Cañizal & C.Sagaseta</i>	895
Landslide effects to buried pipelines <i>Yaw-Huei Yeh</i>	901
Application of the thin-layer interface element to geotechnical problems <i>H.F.Schweiger & WHaas</i>	907

Generating a 3-D block pattern: A key to blocky system study <i>J.Arcamone & D.Héliot</i>	913
The constitutive relation of joints and boundary surfaces in geomechanics <i>Fan Wen-ching & Yin You-quan</i>	919
<i>7 Modeling of infinite domains</i>	
Elastic analysis of layered soils by boundary elements: Comparative remarks on various approaches <i>Giulio Maier & Giorgio Novati</i>	925
Applications of the boundary element method for the analysis of discontinuities <i>F.S.Rocha, W.A.Nimir & W.S.Venturini</i>	935
Elasto-plastic analysis of tunnel excavation in layered rock medium by coupled FEBEM <i>R.B.Singh, K.G.Sharma & A.Varadarajan</i>	941
The spline indirect boundary element method and its application in analyzing stress and pressure around underground opening <i>Lin Yu Liang</i>	951
Underground stress analysis using mapped infinite elements <i>P.Marović & F.B.Damjanić</i>	959
Application of the common boundary element software COMVAR to the analysis of soils <i>Bulent A.Ovunc</i>	969
BE-BEM and IFE-BEM: Two models for unbounded problems in geomechanics <i>R.Pöttler & W.Haas</i>	975
Back analysis method of elastoplastic BEM in strain space <i>Zhang De-cheng, Gao Xiao-wei & Zheng Yingren</i>	981
Analysis of stress and slide of underground openings by BEM with nonlinear slip elements <i>Shen Jiaying, Dai Miaoling & Zhang Yang</i>	987
Elastoplastic boundary element analysis of well-uniform self-supporting structure <i>Yonghe Li</i>	991
The progressive failure of the rock mass surrounding an opening by boundary element method <i>Chen Jin & Yuan Wenbo</i>	997
Infinite element and its application to geotechnical problems <i>Liu Huaiheng & Yang Gengshe</i>	1003
The application of the boundary element method to the stress analysis of anisotropic and heterogeneous solid medium <i>Ge Xiurun & Yang Wei</i>	1011
Boundary element analysis of linear quasi-static coupled transient thermoelasticity <i>D.W.Smith & J.R.Booker</i>	1017

8 Soil-structure interaction, piles

Computation of the ultimate pressure of a laterally loaded circular pile in frictional soil <i>P.A.Lane & D.V.Griffiths</i>	1025
Elastoplastic analysis of laterally loaded piles <i>A.P.Kooijman & P.A.Vermeer</i>	1033
A simplified analysis of pile penetration <i>Annamaria Cividini & Giancarlo Gioda</i>	1043
Analysis of laterally loaded piles by quasi-three-dimensional finite element method <i>T.Shibata, A.Yashima, M.Kimura & H.Fukada</i>	1051
The problems of a slab on an elastic solid foundation in the light of the finite element method <i>Anastasios M.Ioannides</i>	1059
Numerical modelling of pile behaviour under low-strain integrity testing <i>H.Balthaus & H.Meseck</i>	1065
Evaluation of stiffness characteristics of Bombay High calcareous sediments for numerical methods of soil-foundations interactive analysis <i>Y.S.Golait & R.K.Katti</i>	1073
Buckling of buried flexible structures of noncircular shape <i>I.D.Moore</i>	1079
Non-linear effects in soil-pipeline interaction in a ground subsidence zone <i>A.P.S.Selvadurai & S.Pang</i>	1085
Undrained strength from CPT and finite element computations <i>P.van den Berg & P.A.Vermeer</i>	1095
The estimation of design bending moments for retaining walls using finite elements <i>A.B.Fourie & D.M.Potts</i>	1101
Finite element analysis of downdrag on piles <i>J.C.Small</i>	1109
Finite element analysis of deep foundations subjected to uplift loading <i>A.P.Ruffier & C.F.Mahler</i>	1115
Static analysis of a space frame foundation structure <i>M.Srkoč, I.Jašarević, S.Sekulić & M.Vrkljan</i>	1121
Effect of loading sequence and soil nonlinearity on the response of a pile group foundation using a three-dimensional finite element analysis <i>Y.M.Najjar & M.M.Zaman</i>	1127
Soil-structure interaction – A possibility for elastic-plastic calculation of foundation slabs <i>R.Stark & J.Majer</i>	1135
Numerical analysis of slab foundations <i>F.Rodríguez-Roa & C.Gavilán</i>	1143
The engineering design of pavement units developed from finite element research methods <i>John W.Bull</i>	1151

Designing of spread footings on karst-prone sites <i>V.I.Solomin, T.A.Malikova & P.A.Karimov</i>	1157
Simulation of behaviour of a gravity structure subject to lateral loading <i>V.G.Fedorovsky, S.V.Kurillo, S.N.Levachev & A.F.Lunin</i>	1161
Research of the interaction between circular foundation and layered ground with the method of finite elements <i>J.Nickolov, L.Ignatova, P.Karachorov & K.Hamamdgiev</i>	1167
Loadings on box-type structures buried in elasto-plastic soil <i>Xiong Jian-guo & Gao Wei-jian</i>	1173
Influence of neighbouring structures on deep foundations <i>O.Pula & W.Pytel</i>	1179
The variant of Rayleigh's method applied to Timoshenko beams on Winkler-Pasternak foundations <i>C.P.Filipich & M.B.Rosales</i>	1183
Elastic-plastic pile-frames interaction <i>Ragnar Larsson & Nils-Erik Wiberg</i>	1189
9 Earth structures, slopes, dams, embankments	
Layered analysis of embankment dams <i>D.J.Naylor & D.Mattar, Jr.</i>	1199
Slope analysis and theory of plasticity <i>P.De Simone & L.Mongiòvi</i>	1207
Three-dimensional finite element collapse analysis for foundations and slopes using dynamic relaxation <i>Tadatsugu Tanaka & Osamu Kawamoto</i>	1213
Numerical methods for locating the critical slip surface in slope stability analysis <i>Venanzio R.Greco</i>	1219
Reliability analysis of propped embedded cantilever walls <i>Kanagasabai Ramachandran</i>	1225
Analysis of concrete dam-rock base interaction by numerical methods <i>S.B.Ukhov, V.G.Orekhov, M.G.Zertsalov, V.V.Semenov & G.I.Shimelmits</i>	1231
Failure criteria for slope analysis using initial stress method <i>P.K.K.Lee & K.L.Ng</i>	1237
The nonlinear behaviour of ground anchors and its consideration in finite element analysis of tied-back walls <i>M.Matos Fernandes & J.C.-B.Falcão</i>	1243
Stability of vertical corner cuts <i>D.Leshchinsky & T.Mullett</i>	1249
Consolidation analysis of an experimental fill in a reclamation area <i>R.F.Azevedo & W.T.Pinto</i>	1257

The interaction mechanism of granular soils with geogrids <i>Gunther E.Bauer & Yousry M.Mowafy</i>	1263
The analysis of steel-reinforced embankments on soft clay foundations <i>R.K.Rowe & B.L.J.Mylleville</i>	1273
Experience with numerical modelling of dams <i>M.Doležalová, A.Hořeni & V.Zemanová</i>	1279
Finite element modelling of rapid drawdown <i>C.O.Li & D.V.Griffiths</i>	1291
Analysis of gravity dams on complex rock formations with effects of seepage <i>C.Chinnaswamy, K.G.Sharma & A.Varadarajan</i>	1297
Consolidation analysis of partially saturated soils – Application to earthdam construction <i>E.E.Alonso, F.Battle, A.Gens & A.Lloret</i>	1303
The numerical analysis for the interaction of concrete core and rockfill shell of a dam and the prototype measurement and verification <i>Gao Lianshi & Zhang Jinsheng</i>	1309
Finite element analysis of fill type dams – Stability during construction by using the effective stress concept <i>Y.Kohgo & T.Yamashita</i>	1315
Three-dimensional movements of embankment ends on soft layer <i>Y.Yokoyama, O.Kusakabe & T.Hagiwara</i>	1323
Numerical analysis of a road embankment constructed on soft clay stabilized with stone columns <i>H.F.Schweiger & G.N.Pande</i>	1329
Search for noncircular slip surfaces by the Morgenstern-Price Method <i>Takuo Yamagami & Yasuhiro Ueta</i>	1335
Performance and analysis of anchored sheet pile wall in soft clay <i>H.Murakami, Y.Yuki & T.Tamano</i>	1341
Search for critical slip lines in finite element stress fields by dynamic programming <i>Takuo Yamagami & Yasuhiro Ueta</i>	1347
Reliability analysis of a test embankment by variance reduction and nearest-neighbor methods <i>D.T.Bergado, N.Miura & M.Danzuka</i>	1353
Static liquefaction of loose slopes <i>M.A.Hicks & S.W.Wong</i>	1361
Three-dimensional slope stability analysis by slice methods <i>Keizoh Ugai</i>	1369
Finite element analysis of the stresses in slopes <i>Jue-guang Jiang, Qiang Xie</i>	1375

Comparison of the results of numerical and engineering stability analyses of the slopes of composite geological structures <i>S.B.Ukhov, V.V.Semenov, E.F.Gulko & M.G.Mnushkin</i>	1385
The stability of slopes in Champlain Sea Clays – A parametric study <i>Gunther E.Bauer</i>	1391
Numerical modeling of the influence of seepage on foundation behaviour of gravity dams <i>P.Bonaldi, D.Cricchi & R.Ribacchi</i>	1401
SUMSTAB – A computer software for generalized stability analysis of zoned dams <i>P.K.Basudhar, Yudhbir & N.S.Babu</i>	1407
Optimization of dam shape by boundary element method <i>Zhang Yang & Shen Jiayin</i>	1413
Analysis of effective stress and movement of Lubuge Dam <i>Z.J.Shen & W.M.Zhang</i>	1419
Effect of tectonoclastic zones in rock foundation on dam stress <i>J.C.Chen</i>	1425
Semi-analytical finite element analysis of laterally loaded piles <i>N.S.V.Kameswara Rao & S.K.Prasad</i>	1431
Finite element analysis of certain aspects of deep anchors in cohesive soil medium <i>D.M.Dewaikar</i>	1437
Analysis of unreinforced and reinforced embankments on soft clays by plasticity theory <i>G.T.Houlsby & R.A.Jewell</i>	1443
Analysis of polymer grid-reinforced soil retaining wall <i>Hidetoshi Ochiai, Shigenori Hayashi, Eiji Ogisako & Akira Sakai</i>	1449
