Part I	
Progress in Landslide Science	1
1 Landslide Science as a New Scientific Discipline	3
1.1 Definition of Landslides	3
1.2 Landslide Science as a New Scientific Discipline and Landslide Dynamics as its Core	4
1.3 Foundation of the International Consortium on Landslides	6
1.4 Development of the International Landslide Community: the 2005 Letter of Intent, the 2006 Tokyo Action Plan, and the 2008 First World Landslide Forum	8
References	10
The First World Landslide Forum	10
2 An Overview of Landslide Problems in the British Isles, with Reference to Geology, Geography and Conservation	13
2.1 Introduction	13
2.2 Strong Rocks and Discontinuity-controlled Slope Instability	14
2.3 Weak Rocks and Strong Soils	15
2.4 Erosion	17
2.5 The Coastline of South Eastern Britain	18
2.6 Bedding-Control of Slip Surfaces	18
2.7 Slides in Strata with Low Angle Dips	19
2.8 Grabens and Graben Geometry	21
2.9 Perched Slip Surfaces	22
2.10 Slip Surfaces at or close to the Base of a Slope	22
2.11 Identification of Slip Surface Position	23
2.12 Three Dimensions and the Plan Shape of Landslides	24
2.13 Conservation and Conflict	24
References	25
3 Considerations about the Mechanics of Slow Active Landslides in Clay	27
3.1 Introduction	27
3.2 General Features of Slow Active Landslides	27
3.3 Considerations about the Mechanics of Active Slides and Mudslides	28
3.4 Consideration about the Mechanics of Active Lateral Spreads	39
3.5 Conclusions	43
References	44
4 Dynamics of Rapid Landslides	47
4.1 Introduction	47
4.2 Mechanisms Causing Strength Loss in Landslides	47

4.3	Types of Extremely Rapid Landslides	50
4.4	Conclusion	56
	References	57
5	Progress in Debris Flow Modeling	59
5.1	Introduction	59
5.2	Processes of Initiation and Development in the Erosion Type Debris Flow	60
5.3	Criteria of Debris Flow Occurrence for Erosion Type	61
5.4	Processes in Transformation and Stoppage of Landslide-induced Debris Flow	63
5.5	Simplified Mathematical Model	64
5.6	Models for Debris Flow Dynamics	65
5.7	Single-phase Continuum Models	66
5.8	Two-phase Fluid Flow Model (Mixture Theory)	69
5.9	Conclusion	75
	References	76
