

INTERNATIONAL WORKSHOP ON ARCH DAMS / COIMBRA / 5-9 APRIL 1987

# ARCH DAMS

*Edited by*

**J. LAGINHA SERAFIM**

*Professor of Civil Engineering, University of Coimbra*

**R.W. CLOUGH**

*Nishkian Professor of Structural Engineering, Emeritus, University of California, Berkeley*

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1990

# Table of contents

Preface	XI
Contributing authors	XIII
Introduction	1
<i>J. Laginha Serafim</i>	
Views on arch dams	11
<i>W. Pircher</i>	
PART 1: ARCH DAM SHAPES	
1 The search of shapes for arch dams	15
<i>J. Martin</i>	
1.1 Shapes of arch dams: Historical development	15
1.2 The best arch dam shapes	22
1.3 Construction constraints	25
1.4 Influence of foundations	29
1.5 Methods of defining shapes	35
1.6 Membranes	37
1.7 Optimization of shapes	37
1.8 Joints	45
1.9 Multiple-arch dams	48
1.10 Convenient shapes: Rollcrete dams	57
<i>P.A.A. Back</i>	
2 Design of arch dams using membrane shapes	61
2.1 Design of arch dams in Portugal and Spain	61
<i>M. Costa Pereira &amp; J. Laginha Serafim</i>	
2.2 Membrane shape – Numerical model	80
<i>Chang-Hua Yeh</i>	
2.3 Membrane shapes for arch dams	82
<i>A. Portela Santos, M.C. Matos &amp; J. Laginha Serafim</i>	
3 Shapes obtained by optimization procedures	91
3.1 Optimum free shape for arch dams	91
<i>R. Prisco &amp; P. Suprovici</i>	
3.2 Search for arch dams with optimal shape	99
<i>L.M.C. Simões, J.A.M. Lapa &amp; J.H. Negrão</i>	

VI *Table of contents*

3.3	Optimum design of arch dams <i>Zhu Bofang, Li Yisheng &amp; Xie Zhao</i>	115
3.4	Shape optimization of arch dams for static and dynamic loads <i>M.S. Samy &amp; M. Wieland</i>	129
4	Studies of shapes of arch dams in various countries	139
4.1	Design of arch dams with small central angle in Japan <i>R. Iida &amp; I. Shibata</i>	139
4.2	The shape of the Ernstbachtal arch dam (W. Germany) <i>D.H. Linse</i>	149
4.3	Interactive shaping method used for the 226 m El Cajón arch dam <i>R. Dungar</i>	155
4.4	Suggestions for improving the design of multiple arch dams <i>R.E. Arnould</i>	163
4.5	General outline of dams in the world (1984) <i>J.M. Coutinho Rodrigues</i>	167
5	Discussion on shapes for arch dams	171
5.1	Optimization of shapes	171
5.2	Open joints in arch dams	174
5.3	Shapes for various load conditions	176
5.4	Joints in arch dams: The 'Pulvino'	177
5.5	Advantages and disadvantages of pronounced double curvature	178
5.6	Prestressing of arch dams	180
5.7	Skin of arch dams and reinforcements	182

PART 2: CRITERIA FOR THE DESIGN OF ARCH DAMS

6	Criteria for the design of arch dams	189
6.1	Introductory considerations <i>O.C. Zienkiewicz</i>	189
6.2	Criteria for the design of arch dams <i>A. Alvarez</i>	190
6.3	Criteria followed in Portugal for the design of arch dams <i>A.F. da Silveira</i>	209
7	Thermal stresses	217
7.1	External temperature loads <i>Zu Bofang &amp; Li Zhanmei</i>	217
7.2	Numerical simulations of heat of hydration temperature in dams <i>F.A. Branco &amp; P. Mendes</i>	225
8	Dynamic stresses	231
8.1	Criteria and computation methods for seismic loads <i>A. Carrère</i>	231
8.2	Seismic safety analysis of arch dams <i>R.W. Clough</i>	237
8.3	Effects of an earthquake on Rapel dam <i>D. Bonazzi</i>	240
9	Stresses due to other causes	247
9.1	Some aspects on arch dam design: Drainage, prestressing and grouting <i>R. Widmann</i>	247

9.2	Ice load: A particular loading acting on dams <i>W. Indermauer</i>	255
9.3	Effect of the construction sequence on arch stresses calculated by finite element analysis <i>E.H. Taylor</i>	256
9.4	Prestressing an arch dam by forced opening of the joints <i>G.S. Tarbox</i>	259
10	Discussion on criteria for design of arch dams	267
10.1	Loads acting on dams	267
10.2	Safety factors	268
10.3	Earthquake action	270
10.4	Conclusions on criteria for the design of arch dams	273

### PART 3: APPROPRIATE FOUNDATIONS – DESIGN UNCERTAINTIES

11	Arch dam foundations	277
11.1	Introductory considerations <i>W. Pircher</i>	277
11.2	Appropriate foundations for arch dams <i>W. Wittke</i>	277
12	Arch dam foundation investigations	307
12.1	Recent advances on site investigations <i>M. Fernández-Bollo</i>	307
12.2	Probabilistic approach to the assessment of foundation properties <i>R. de Oliveira</i>	314
12.3	Behaviour of altered joints under fast loading <i>L.J.L. Lemos</i>	319
12.4	Limitations on foundation properties assessment <i>A. Gallico</i>	321
13	Analysis of flow and deformation of foundations	325
13.1	Coupled flow deformation analysis of a dam foundation with the distinct element method <i>J.C. Kafritsas &amp; H.H. Einstein</i>	325
13.2	Contribution to a better understanding of flow in fractured rock masses based on new field test techniques <i>R.M. de Andrade</i>	334
14	Case studies of foundations: Their stability	341
14.1	Appropriate foundations for arch dams <i>D. Milovanovic</i>	341
14.2	Stability of foundation rock of arch dams <i>R. Iida &amp; I. Shibata</i>	351
14.3	Arch dam rock foundation design in the USSR <i>Yu.B. Mgalobelov</i>	354
14.4	Observed and computer-simulated movements in the 157 m high Zervreila Arch Dam (1 – Foundation) <i>R. Dungar</i>	364
14.5	Observation of vertical heel deformations of arch dams <i>J. Martin</i>	371

15	Discussion on foundations of arch dams	377
15.1	Foundation investigations	377
15.2	Design of foundations	379
15.3	Treatment of foundations	381
15.4	Movements of foundations	382
15.5	Failures in foundations	382
PART 4: BEHAVIOUR OF ARCH DAMS		
16	Observed behaviour of arch dams	387
	<i>M.A. Fanelli</i>	
16.1	General	387
16.2	Magnitudes usually observed in arch dams: Methods and instrumentation used	389
16.3	Interpretation of behaviour: Separation of actions – Possibility of continuous, automated control	398
16.4	Conclusions	404
17	Static and dynamic observation	405
17.1	The behaviour of Cachi Arch Dam over a period of 20 years <i>Instituto Costarricense de Electricidad</i>	405
17.2	Observation of the dynamic behaviour of two arch dams <i>J.M.W. Brownjohn, R.T. Severn &amp; C.A. Taylor</i>	429
18	Observed and interpreted linear and nonlinear behaviour	441
18.1	Behaviour of French arch dams <i>J. Combelles</i>	441
18.2	Examination of the behaviour of an arch-gravity dam during the first filling by finite element modelling <i>A. Masera, G. Ruggeri, F. Flamigni &amp; F. Piccinelli</i>	447
18.3	Structural behaviour of an arch-gravity dam <i>M. Serrano Tovar</i>	457
18.4	Observed and computer-simulated movements in the 157 m high Zervreila Arch Dam (2 – Creep and plasticity of mass concrete) <i>R. Dungar</i>	462
19	Arch dams with unusual behaviour: Deteriorations, swelling and ruptures	473
19.1	Observation and evaluation of unusual behaviour of arch dams <i>W.S. Croucamp</i>	473
19.2	Actual behaviour of Zeuzier Arch Dam <i>T.R. Schneider</i>	479
19.3	Examples of dam deterioration through concrete swelling: Chabet El Akra Dam, Bangala Dam, Kyle Dam ( <i>J. Martin</i> ), Chambon Dam ( <i>J. Combelles</i> ), Kariba Dam ( <i>J. Santa Clara</i> )	486
19.4	Failure and deterioration of arch dams <i>J.M. Coutinho Rodrigues</i>	495
19.5	Arch dam upslide – Failure and safety criterion <i>R. Naihua</i>	499
20	Discussion on observed behaviour of arch dams	513
20.1	Instrumentation for monitoring behaviour	513

20.2	Basic requirements for dam instrumentation set up	513
20.3	Automatic monitoring	514
20.4	Observation of seismic behaviour	515
20.5	Prediction of failure	517

## PART 5: LATE PRECURSORS

21	Pioneers and countries with a heritage linked to arch dams	521
21.1	Swiss pioneers in arch dam construction: H.E. Grunner, A. Stucky, H. Gicot ( <i>J.P. Stucky</i> ) and M. Ritter ( <i>G. Lombardi</i> )	521
21.2	French forerunners: J. Resal ( <i>J. Martin</i> ) and A. Coyne ( <i>P. Londe</i> )	528
21.3	American pioneers in arch dams: L. Jorgensen ( <i>R. Wengler</i> ) and F.A. Noetzli ( <i>R.W. Clough</i> )	533
21.4	Recognition of two pioneers of the Bureau of Reclamation: J. Savage and J. Hinds ( <i>Ch. Abraham</i> )	538
21.5	Past Italian arch dam engineers: C. Semenza ( <i>A. Gallico</i> ) and C. Marcello ( <i>F. Gallavresi</i> )	541
21.6	UK past engineer: J. Guthrie-Brown ( <i>P.A.A. Back</i> )	546
21.7	Spanish arch dam engineers: E. Becerril, E. Torroja ( <i>M. Castillo</i> ) and L. Yordi ( <i>J. Laginha Serafim</i> )	547
21.8	Romanian past engineer: R. Priscu ( <i>A. Silveira</i> )	552
21.9	Portuguese past engineers: A. de C. Xerez ( <i>P.A. Nunes</i> ) and M. Rocha ( <i>J.F. Borges</i> )	554
