RELIABILITY OF HYDRO-RECLAMATION INSTALLATIONS

Ts.E. MIRTSKHULAVA

RUSSIAN TRANSLATIONS SERIES 55

1987 A.A. BALKEMA/ROTTERDAM

Contents

INTRODUCTION		1
CHAPTER 1. TYPES OF FAILURE		4
1. General		4
2. Some Examples of Breakdown, Damage, Fault and Failure		7
CHAPTER 2. BASIC CONCEPTS OF PROBABILITY THEORY AND MATHEMATICAL		
STATISTICS	• • •	26
1. General	· · · ·	26
2. Basic Theorems		31
3. Full Probability and Theory of Hypothesis		33
4. Laws of Distribution of Random Quantities	day service	34
Binomial distribution		37
Poisson distribution		38
The law of uniform density		39
Normal law of distribution		39
Logarithmic normal distribution		42
Exponential distribution		43
5. Some Elementary Information on the Methods of Evaluating the Reliability of Observed Data		
(Evaluation of Possible Errors)		45
6. Remarks on the Accuracy of Calculations		56
CHAPTER 3. SOME BASIC CONCEPTS AND CRITERIA OF RELIABILITY THEORY	450 S	57
1. Some Basic Concepts of Reliability Theory		57
2 Basic Reliability Criteria and Characteristics		61

3.	Application of Boolean Algebraic Methods in Calculating Reliability		72
4.	Provision of Reserve/Redundancy		74
5.	Classification of Failures		93
6.	Investigation of the Reliability of Hydro-reclamation Installations		95
СНАР	TER 4. RELIABILITY OF SOME HYDRO- RECLAMATION INSTALLATIONS		101
1.	Reliability of Irrigation Systems and Their Main Elements	ation gene	101
2.	Evaluation of the Reliability of Foundations Located in Cohesive Soils		109
3.	Evaluation of Reliability of Erosion of Foundations in Non-cohesive Soils	8873) 19	122
4.	The Time Factor in Erosion Calculations	• • •	128
5.	Evaluation of the Reliability of Control Structures under Local Erosion		132
6.	Developing a Slope with Minimum Erosion		136
7.	Evaluation of the Reliability of a Hydraulic Installation against Damage due to Seepage		142
8.	Approximate Evaluation of the Reliability of Linings		147
9.	Reliability of Working of Pumping Stations and Installation of Several Units		151
10.	Selecting the Right Number of Chambers for a Sedimentation Basin		159
11.	Provision of Reserve Water Mains across Streams and Channels		162
12.	Calculating the Reliability of the Stability of Slopes and Banks	· · · ·	164
13.	Reliability of Working of Chute Canals and Closed Conduits	•••	169
СНАР	TER 5. ECONOMIC ASPECTS OF RELIABILITY		187
СНАР	TER 6. ENDURANCE (WORKING LIFE)	•••	205

x

CHAPTER 7. SOLUTION OF PROBLEMS IN THE		
INSTALLATIONS FROM THE POINT OF VIEW OF PROBABILITY THEORY		214
CHAPTER 8. SOME GENERAL RECOMMENDATIONS		
FOR INCREASING RELIABILITY		239
CONCLUSION		247
APPENDICES	· · · ·	251
