CONTENTS

CHAPTER 1 THE NEED FOR FLUVIAL STUDIES	11
1.1 INTRODUCTION	11
1.1.1 The character of river systems	11
1.2 NEEDS FOR FLUVIAL STUDIES	13
1.2.1 Hydrological needs	14
1.2.2 Engineering needs	15
1.2.3 Ecological needs	18
1.2.4 Water quality needs	21
1.3 THE BASIS OF FLUVIAL GEOMORPHOLOGY	23
1.3.1 Objectives	25
CHAPTER 2 DATA: MEASUREMENT AND ANALYSIS	28
2.1 MEASUREMENT	28
2.2 SAMPLING	31
2.3 MAPS AS DATA SOURCES	32
2.4 CHARACTERISTICS OF STATISTICAL DATA	34
2.5 DATA ANALYSIS	39
2.5.1 Detecting relationships	39
2.5.2 Testing for significance	42

1	2.5.3 Testing for differences between samples	44
1	2.5.4 Empirical models	47
1	CHAPTER 3 STREAMFLOW	51
4	3.1 THE GLOBAL HYDROLOGICAL CYCLE	51
ō	3.2 THE BASIN HYDROLOGICAL CYCLE	57
3	3.2.1 Baseflow generation	58
1	3.2.2 Storm runoff production	60
3	3.2.3 The role of vegetation	64
5	3.3 MEASUREMENT OF STREAMFLOW CONTROLS	66
	3.3.1 Drainage basin form	68
3	3.3.2 Rainfall and evapotranspiration	68
3	3.4 WATER FLOW IN CHANNELS	70
I	3.4.1 Flood discharges	75
2	3.4.2 Measurement of streamflow	79
1	3.4.3 Analysis of streamflow data	86
9		
)	CHAPTER 4 SEDIMENTS IN RIVER SYSTEMS	96
2	4.1 THE SOLUTE LOAD	97

4.1.1 Solutes in streamflow: sample collection and analysis
4.1.2 The catchment scale: lithological controls
4.1.3 Assessing rock controls on solute loadings and catchment denudation
4.2 PARTICULATE SEDIMENTS
4.2.1 Sediment characteristics
4.2.2 Sediment sources
4.2.3 Sediment transport
4.2.4 Data collection
4.2.5 Sediment changes along rivers
4.3 STREAM DEPOSITS
4.3.1 Field measurement
4.3.2 The character of channel sediments
4.3.3 Major depositional landforms

CHAPTER 5 RIVER CHANNELS

D.I DRAINAGE NETWORKS
5.1.1 Drainage network composition
5.1.2 Order produced by chance
5.1.3 Network variations between basins

5.2 CHANNEL MORPHOLOGY

99	5.2.1 Criteria for the identification of the bankfull stage	154
	5.2.2 Measurement of the channel cross-section	156
02	5.2.3 Measurement of channel slope	157
05	5.2.4 The downstream variation of channel form	159
07	5.2.5 Relationships between channel form variables	163
07	5.3 CHANNEL PATTERN	166
13	5.3.1 Braided channels	167
17	5.3.2 Undivided channels	171
21	5.3.3 Field survey of channel pattern	174

125

128	CHAPTER 6 CHANNEL CHANGE	182
129	6.1 HISTORICAL METHODS	183
129	6.1.1 Long-term channel changes	184
140	 A. Drainage network contraction B. Misfit channel patterns C. River metamorphosis 	184 186 188
140	6.1.2 Short-term channel changes	192
141	6.2 DATING TECHNIQUES	196
143	6.2.1 Lichenometry	196
146	6.2.2 Tree-ring dating (dendrochronology)	199
150	6.3 MAN'S IMPACT ON RIVERS	202

6.3.1 Process changes	202
6.3.2 Evaluation of process changes	207
6.3.3 Evaluation of channel change	213
6.3.4 Channel change resulting from urbanisation	216
6.3.5 Channel changes below a reservoir	217
