

PROCEEDINGS OF THE FIFTH INTERNATIONAL SYMPOSIUM ON
GROUND FREEZING / NOTTINGHAM / 26-28 JULY 1988

Ground Freezing 88

Edited by

R.H.JONES & J.T.HOLDEN

University of Nottingham, UK

VOLUME ONE

A.A.BALKEMA / ROTTERDAM / BROOKFIELD / 1988

Contents

Preface	IX
1. <i>Heat and mass transfer</i>	
State of the art: Heat and mass transfer in freezing soils <i>B.D.Kay & E.Perfect</i>	3
Evaluation of the X-ray radiography efficiency for heaving and consolidation observation <i>Satoshi Akagawa</i>	23
Salt redistribution during laboratory freezing of saline sand columns <i>G.C.Baker & T.E.Osterkamp</i>	29
On salt heave of saline soil <i>X.B.Chen, G.Q.Qiu, Y.Q.Wang & W.K.Shen</i>	35
On a model for quasi-steady freezing processes of saturated porous media <i>E.Comparini</i>	41
Influence of freezing and thawing on the physical and chemical properties of swelling clays <i>K.A.Czurda & R.Schababerle</i>	51
Field observations of water migration in unsaturated freezing soils with different ground water tables <i>Gao Weiyue & Xu Xiaozu</i>	59
Experimental study of frost heaving of a saturated soil <i>Takeshi Ishizaki & Nobuaki Nishio</i>	65
A finite element simulation of frost heave in soils <i>Roland W.Lewis & Wah K.Sze</i>	73
Thermal and hydraulic conductivity of unsaturated frozen sands <i>W.K.P.van Loon, I.A.van Haneghem & H.P.A.Boshoven</i>	81
A frost heave mechanism model based on energy equilibrium <i>Y.Miyata</i>	91
Sensitivity of a thaw simulation to model parameters <i>Sorab Panday & M.Yavuz Corapcioglu</i>	99

Investigations of the frost heave of colliery spoil <i>Maria Porębska & Krystyna M. Skarżyńska</i>	107
Frost expansion pressure and displacement of saturated soil analyzed with coupled heat and water flows <i>Kimitoshi Ryokai, Fujio Tuchiya & Masataka Mochizuki</i>	115
Calculation of the stress field in soils during freezing <i>M. Shen & B. Ladanyi</i>	121
The effect of surcharge on the frost heaving of shallow foundations <i>Tong Changjiang & Yu Chongyun</i>	129
Thermal characteristics of fine-grained soils <i>E.D. Yershov, I.A. Komarov, N.N. Smirnova, R.G. Motenko & Ye.N. Barkovskaya</i>	135
 2. Mechanical properties	
State of the art: Mechanical properties of frozen soil <i>Francis H. Sayles</i>	143
Cyclic thermal strain and crack formation in frozen soils <i>Orlando B. Andersland & Hassan M. Al-Moussawi</i>	167
Mechanical characteristics of artificially frozen clays under triaxial stress condition <i>Chen Xiangsheng</i>	173
Direct shear test at a frozen/unfrozen interface <i>S. Goto, K. Minegishi & M. Tanaka</i>	181
Mechanical properties of circular slabs of frozen sand and clay in bending tests <i>H. Izuta, H. Yamamoto & T. Ohrai</i>	187
On the regularities of the change of shear strength of soils with thawing and dynamic loadings <i>V.D. Karlov & S.V. Arefyev</i>	193
Acoustic properties of frozen near-shore sediments, southern Beaufort Sea, Arctic Canada <i>P.J. Kurfurst & S.E. Pullan</i>	197
A creep formula for practical application based on crystal mechanics <i>Wolfgang Orth</i>	205
Laboratory determination of pore pressure during thawing of three different types of soil <i>C.G. Rydén & K. Axelsson</i>	213
Soil freezing and thaw consolidation results for a major project in Helsinki <i>I.T. Vähäaho</i>	219
Uniaxial compressive strength of frozen medium sand under constant deformation rates <i>Zhu Yuanlin, Zhang Jiayi & Shen Zhongyan</i>	225

3. Engineering design

State of the art: Engineering design of shafts <i>J.Klein</i>	235
State of the art: Tunnelling using artificially frozen ground <i>J.S.Harris</i>	245
Design and installation of deep shaft linings in ground temporarily stabilized by freezing Part 1: Shaft lining deformation characteristics <i>F.A.Auld</i>	255
Design and installation of deep shaft linings in ground temporarily stabilized by freezing Part 2: Shaft lining and freeze wall deformation compatibility <i>F.A.Auld</i>	263
Ground freezing with liquid nitrogen <i>P.Capitaine & D.Rebhan</i>	273
Effect of frozen soil creep on stresses at the moving thaw front around a wellbore <i>P.Huneault, B.Ladanyi & L.N.Zhu</i>	279
Tunnel displacements under freezing and thawing conditions <i>H.Meißner</i>	285
Some results of in-situ measurement of freezing pressure and earth pressure in frozen shafts <i>Su Lifan</i>	295
The cause and prevention of freezetestube breakage <i>Wang Zhengting</i>	303
Structure and stress analysis of seepage resistant linings in shafts sunk with the freezing method <i>Xu Xiang & Wang Changsheng</i>	311

4. Case histories

Vienna Subway construction – Use of brine freezing in combination with NATM under compressed air <i>Franz Deix & Bernd Braun</i>	321
The comparison between the results of heat transfer analysis and the observed values on a refrigerated LPG inground tank <i>Sadao Goto, Masafumi Shibuya, Takashi Nakajima & Masanobu Kuroda</i>	331
Construction of the Asfordby mine shafts through the Bunter Sandstone by use of ground freezing <i>S.J.Harvey & C.J.H.Martin</i>	339
Thermal design of a frozen soil structure for stabilization of the soil on top of two parallel metro tunnels <i>H.L.Jessberger, Regine Jagow & Peter Jordan</i>	349

Freezing a temporary roadway for transport of a 3000 ton dragline <i>Derek Maishman, J.P.Powers & V.J.Lunardini</i>	357
Ground freezing in non-saturated soil conditions using liquid nitrogen (LN) <i>L.V.Martak</i>	367
Ground freezing for the construction of a drain pump chamber in gravel between the twin tunnels in Kyoto <i>S.Murayama, T.Kunieda, T.Sato, K.Miyamoto, T.Hashimoto & K.Goto</i>	377
Application of the freezing method to the undersea connection of a large diameter shield tunnel <i>K.Numazawa, M.Tanaka & N.Hanawa</i>	383
Two practical applications of soil freezing by liquid nitrogen <i>Wolfgang Orth</i>	389
Ground freezing solves a tunnelling problem at Agri Sauro, Potenza, Italy <i>A.Balossi Restelli, G.Tonoli & A.Volpe</i>	395
