

Analysis of Structures on Elastic Foundations

Edward Tsudik

J.ROSS
PUBLISHING

The logo for J.ROSS PUBLISHING features the text "J.ROSS" in a large, bold, serif font, with "PUBLISHING" in a smaller, all-caps, sans-serif font directly below it. A dark, curved swoosh or underline element is positioned behind the text, starting under "PUBLISHING" and curving upwards and to the right under "ROSS".

Content

Preface	vii
About the Author	xiii
Chapter 1 Soils and Soil Models	1
1.1 Introduction	1
1.2 Winkler Foundation	2
1.3 Modulus of Subgrade Reaction for Individual Foundations	4
1.4 Elastic Half-Space or Elastic Continuum	7
1.5 Elastic Layer.....	15
References.....	26
Chapter 2 Analytical Methods of Analysis of Finite Beams on Winkler Foundation.....	29
2.1 Introduction	29
2.2 Analysis of Infinite and Semi-Infinite Beams on Winkler Foundation	30
2.3 Method of Superposition	34
2.4 Method of Initial Parameters and its Application to Analysis of Regular Beams	38
2.5 Method of Initial Parameters.....	43
2.6 Analysis of Continuous Beams and Frames on Winkler Foundation: The Stiffness Method.....	53
2.7 Exact Analysis of Frames on Winkler Foundation.....	60
2.8 Exact Analysis of Interconnected Beams on Winkler Foundation	73
2.9 Analysis of Rigid Piles with Horizontal Loads	84
2.10 Analysis of Rigid Piles with Horizontal and Vertical Loads	86
2.11 Flexible Piles. Variable Lateral Modulus of Subgrade Reaction	88
References.....	115
Chapter 3 Simplified Analysis of Beams and Frames on Winkler Foundation	117
3.1 Introduction.....	117
3.2 Analysis of Free Supported Beams	117
3.3 Analysis of Beams with Various Boundary Conditions	123
3.4 Analysis of Interconnected Beams.....	130
3.5 Analysis of Pin-connected Beams	133
3.6 Analysis of Continuous Beams	136
3.7 Analysis of Stepped Beams.....	137
3.8 Analysis of Complex Beams on Winkler Foundation.....	149
3.9 Combined Analysis of Frames and Individual Foundations.....	150
3.10 The Second Method of Modeling and the Iterative Method.....	154
References.....	178

Chapter 4 Analysis of Beams on Elastic Half-Space	179
4.1 Introduction	179
4.2 Analysis of Rigid Beams	180
4.3 Short Beam Analysis	187
4.4 Analysis of Short Beams with Uniformly Distributed Loads	192
4.5 Analysis of Long Beams	193
4.6 Analysis of Complex Beams	196
4.7 Analysis of Frames on Elastic Half-space	200
References	241
Chapter 5 Analysis of Beams on Elastic Half-Space, Plane Strain Analysis	243
5.1 Introduction	243
5.2 The Method of Analysis	244
5.3 Analysis of Beams with Uniformly Distributed Loads	252
5.4 Analysis of Beams with Concentrated Vertical Loads	256
5.5 Analysis of Beams Loaded with Concentrated Moments	258
5.6 Deflections of Beams with Uniformly Distributed Loads	261
5.7 Deflections of Beams with Vertical Concentrated Loads	263
5.8 Deflections of Beams Loaded with Concentrated Moments	264
5.9 Combined Analysis of 2D Frames and Continuous Foundations	265
References	365
Chapter 6 Numerical Analysis of Beams Supported on Elastic Half-Space and Elastic Layer	367
6.1 Introduction	367
6.2 Settlements of an Elastic Half-Plane, Plane Strain Analysis	368
6.3 Settlements of an Elastic Half-Space, 3D Analysis	370
6.4 Analysis of Beams Supported on Elastic Half-Plane	372
6.5 3D Analysis of Beams Supported on Elastic Half-Space	376
6.6 Analysis of Beams with Various Boundary Conditions	383
6.7 Analysis of Complex Continuous Beams	386
6.8 Analysis of 2D Frames with Continuous Foundations	388
6.9 Analysis of a Group of Foundations	389
6.10 Analysis of Interconnected Beams	393
6.11 Other Methods of Analysis	397
6.12 Analysis of 2D and 3D Frames with Individual Foundations Supported on Elastic Half-Space	400
6.13 Analysis of Beams Supported on Elastic Layer	403
References	414
Chapter 7 Simplified Analysis of Mat Foundations	415
7.1 Introduction	415
7.2 Rigid Analysis	416
7.3 Elastic Analysis	418
7.4 Analysis of Infinite Plates Supported on Elastic Half-Space with a Vertical Concentrated Load	420
7.5 Analysis of Infinite Plates Supported on Elastic Layer with a Vertical Concentrated Load	422

7.6	Approximate Analysis of Rectangular Mat Foundations Supported on Elastic Half-Space	427
7.7	Approximate Analysis of Semi-Infinite Rectangular Plates Supported on Elastic Half-Space	431
	References	474
Chapter 8 Numerical Analysis of Mat Foundations		475
8.1	Introduction	475
8.2	Analysis of Mats Supported on Winkler Foundation	476
8.3	Analysis of Mat Foundations Supported on Elastic Half-Space: The First Method	477
8.4	The Second Method	480
8.5	The Iterative Method	482
8.6	Zhemochkin's Method	483
8.7	Mats with Various Boundary Conditions	486
8.8	Combined Analysis of Mat Foundations and Superstructures	489
8.9	Combined Analysis of Walls, Frames and Mat Foundations	492
8.10	Analysis of Mat Foundations Supported on Piles	497
	References	502
Chapter 9 Analysis of Circular Plates on Elastic Foundation		503
9.1	Introduction	503
9.2	Simplified Analysis of Circular Plates on Elastic Foundation	503
9.3	Circular Plates on Elastic Half-space; Equations and Tables	507
9.4	Totally Rigid Circular Plates Supported on Elastic Half-Space	510
9.5	Elastic Circular Plates Supported on Elastic Half-Space	512
9.6	Numerical Analysis of Circular and Ring Plates Supported on Elastic Foundation	517
9.7	Analysis of Ring Foundations	521
9.8	Analysis of Narrow Ring Foundations	523
9.9	Analytic-Numerical Analysis of Circular Plates on Elastic Foundation	525
	References	556
Chapter 10 Special Structures on Elastic Foundation		557
10.1	Introduction	557
10.2	Analysis Composite Beams on Elastic Foundation	557
10.3	Analysis of Composite Plates on Elastic Foundation	560
10.4	Analysis of Boxed Foundations	566
10.5	Combined Analysis of Boxed Foundation and a 3D Frame-Superstructure	568
10.6	Analysis of Walls on Elastic Foundation	570
10.7	Analysis of Walls with a Soft Storey Supported on Elastic Foundation	573
10.8	Analysis of Walls Supported on Frames with Individual Foundations	576
	References	578
