

Penetration testing in the UK

Proceedings of the geotechnology conference organized by the
Institution of Civil Engineers and held in Birmingham on
6-8 July 1988

Thomas Telford, London

Contents

Keynote address. A. C. MEIGH	1
Report on ISOPT-1. B. A. LEACH	9
Session 1. Standard penetration test	
Introduction to Papers 1-9	
Part 1. F. M. JARDINE	23
Part 2. M. A. STROUD	29
1. SPTs in chalk: a rethink. R. N. MORTIMORE and D. JONES	51
2. Diagenetic alteration and micro-structural characteristics of sands: neglected factors in the interpretation of penetration tests. M. E. BARTON, M. R. COOPER and S. N. PALMER	57
3. Contribution to the chalk classification by means of visual and penetration techniques. S. PERELBERG, D. G. GUY and D. A. FERNANDO	61
4. Penetration testing in the design of foundations for large silos on Lias Clay. F. G. BUTLER	65
5. Water tank foundations on alluvial soil-subsoil explorations. A. V. JALOTA, S. C. JAIN and D. K. JOSHI	71
6. The standard penetration test and foundation movements on glacial tills and weak rocks. J. M. W. HOLDEN and M. YILMAZ	77
7. The application of the SPT in weak sandstone and mudstone rocks. R. P. THOMPSON and B. A. LEACH	83
8. The use of the standard penetration test for the design of bored piles in the Keuper Marl of Cardiff. N. S. KILBORN, G. TREHARNE and V. ZARIFIAN	87
9. The effect of water on SPT results in sand. M. S. MOJABI and G. G. THOMAS	93
Discussion on Papers 1-9. S. THORBURN, P. K. ROBERTSON, K. W. COLE, R. P. THOMPSON, A. D. BARLEY, M. E. BARTON, M. JAMIOLKOWSKI, J. M. W. HOLDEN, T. R. M. WAKELING, G. THOMPSON, L. THREADGOLD, D. M. TONKS, F. M. JARDINE, I. K. NIXON, R. N. MORTIMORE, P. R. VAUGHAN, J. M. PAISLEY, M. J. TURNER, J. M. REID, B. A. LEACH, K.-J. MELZER, I. L. WHYTE, N. P. LEE, R. McNICOL and M. S. MOJABI	95

Session 2. Dynamic probing

Introduction to Papers 10-13. I. K. NIXON	105
10. Dynamic soundings in site investigations: some observations and correlations. D. M. TONKS and I. L. WHYTE	113
11. The use of continuous dynamic probing in ground investigation. G. B. CARD and D. P. ROCHE	119
12. Application of dynamic cone penetrometer testing in East Anglia. P. J. CEARNIS and A. MCKENZIE	123
13. Factors governing the use of continuous dynamic probing in UK ground investigation. R. D. SCARFF	129
Discussion on Papers 10-13. I. K. NIXON, C. N. EDMONDS, I. L. WHYTE, K.-J. MELZER, A. MCKENZIE, A. C. MEIGH, J. J. M. POWELL, M. J. TURNER, M. SCOTT and G. B. CARD	133

Session 3. Piezocone penetration test

Introduction to Papers 14-19. G. T. HOULSBY	141
14. Interpretation of piezocone results in overconsolidated clays. A. J. LUTENEGGER and M. G. KABIR	147
15. Interpretation and use of the piezocone test in UK clays. J. J. M. POWELL, R. S. T. QUARTERMAN and T. LUNNE	151
16. Finite element analysis of cone penetration. S. M. WILLSON, B. W. IMS and I. M. SMITH	157
17. The use of the piezocone test for monitoring the strength of rock paste. P. A. BRAITHWAITE, G. S. GHATAORA and J. S. COUTTS	161
18. Piezocone tests in a china clay tailings dam. T. R. M. WAKELING	167
19. The use of piezocone in the design of a deep basement in London Clay. M. M. LONG and N. J. O'RIORDAN	173
Discussion on Papers 14-19. P. K. ROBERTSON, J. J. M. POWELL, K. BEEN, G. T. HOULSBY, M. JAMIOLKOWSKI, M. BATTAGLIO, D. BRUZZI, A. J. LUTENEGGER, A. C. MEIGH, Z. M. NYIRENDA, G. C. SILLS, C. H. ADAM, T. R. M. WAKELING, A. J. BOND, M. G. JEFFERIES and P. R. VAUGHAN	177

Session 4. Basic cone penetration test

Introduction to Papers 20-30. D. W. BIDDLE	189
20. The static cone penetration test as lithology identifier. N. A. TRENTER and C. MILLER	193
21. Characterization of sandfills with the cone penetration test. M. G. JEFFERIES, B. T. ROGERS, K. M. GRIFFIN and K. BEEN	199
23. Interpretation of piezocone soundings in clay – a case history. R. G. CAMPANELLA, J. P. SULLY and P. K. ROBERTSON	203

24.	Investigation of cone penetration test in British clay carried out by the Building Research Establishment 1960-86. A. MARSLAND and J. J. M. POWELL	209
25.	Interpretation of material state from the CPT in sands and clays. K. BEEN, J. H. A. CROOKS and M. G. JEFFERIES	215
26.	The use of cone penetration tests in glacial till. M. J. D. DOBIE	219
27.	Penetration testing in glacial till. P. J. BAKER and R. GARDENER	223
28.	An example of the use of cone penetration testing in the design of underground structures and temporary works in cohesive soils. J. M. REID and K. W. TURNBULL	227
29.	The application of statistical methods to the interpretation of cone tests and use in subsequent design. B. W. IMS and F. E. TOOLAN	231
30.	Determination of representative CPT-parameters. H. HARDER and G. VON BLOH	237
31.	The use of 'penetrators' for the measurement of the undrained shear strength of soft marine clays. T. J. FREEMAN	241
32.	Piezocone measurements with four pore pressure positions. G. C. SILLS, R. E. MAY, T. HENDERSON and Z. NYIRENDA	247
33.	The implications of observed deformations during cone penetration. P. K. CHEN and R. H. BASSETT	251
	Discussion on Papers 20-33. M. J. D. DOBIE, H. ERWIG, A. C. MEIGH, J. J. M. POWELL and N. A. TRENTER	257

Session 5. Pressuremeter, dilatometer and other developments

	Introduction to Papers 34-44. C. CRAIG	265
34.	The interpretation of the Marchetti dilatometer test in UK clays. J. J. M. POWELL and I. M. UGLOW	269
35.	Shear wave velocity measurements during penetration testing. P. HEPTON	275
37.	Interpretation of pore pressure measurements from advanced cone penetration testing. E. SKOMEDAL and J. MARTYN BAYNE	279
38.	Tests in a small calibrated chamber: experimental and numerical analysis. AL MUKHTAR MUZAHIM	285
39.	The use of cone penetration testing to obtain environmental data. M. R. HORSNELL	289
41.	Comparison between results from flat dilatometer and self-boring pressuremeter tests. B. G. CLARKE and C. P. WROTH	295
42.	Stiffness of sands from CPT, SPT and DMT — a critical review. G. BALDI, R. BELLOTTI, N. GHIONNA and M. JAMIOLKOWSKI	299
44.	High pressure dilatometer tests in Upper Chalk at Hull. A. R. WOODLAND, C. L. NG and D. CORKE	307

Discussion on Papers 33-44. B. G. CLARKE, S. MARCHETTI, P. K. ROBERTSON, D. CORKE and G. T. HOULSBY	313
Closing address. Future trends for penetration testing. M. JAMIOLKOWSKI and P. K. ROBERTSON	321
Appendix 1. Cone penetration test: international reference test procedure. ISOPT-1	343
Appendix 2. Standard penetration test: international reference test procedure. ISOPT-1	357
Appendix 3. Dynamic probing: international reference test procedure. ISOPT-1	361
Appendix 4. Demonstration competition. I. K. NIXON	367
Papers 22, 36, 40 and 43 were withdrawn
