ROCKFILL IN HYDRAULIC ENGINEERING

DAVID STEPHENSON

*Professor of Hydraulic Engineering
University of the Witwatersrand
Johannesburg, South Africa*

ELSEVIER SCIENTIFIC PUBLISHING COMPANY
Amsterdam — Oxford — New York

1979

CONTENTS

PREFACE	v
CONTENTS	vii
NOTATION AND UNITS	x
CHAPTER 1. PROPERTIES OF ROCK AND ITS USE	1
Introduction	1
Economics.	2
Stone grading and size	3
Types of rock	4
Mechanical properties of rock	8
Gabions	12
Bitumen grouting	15
CHAPTER 2. FLOW THROUGH ROCKFILL	19
Introduction.	19
Previous research	19
Head loss equation.	21
Depth at emergent face	24
Free surface profile	26
Differential equations of flow	28
Diffusion	33
Simplified analysis of surges	33
Drawdown in rockfill	34
CHAPTER 3. ROCKFILL DAMS	38
Introduction	38
Stability of stones in flowing water.	39
Embankment formation under water	41
Throughflow	48
End-tipped embankments for channel closure	52
Reinforced rockfill	55
Rockfill embankments	57
CHAPTER 4. GABION RETAINING WALLS	62
Introduction	62
Stability of gabion slopes in water	63

VIII

Stability of gabions on horizontal planes in water	66
Stability of stacked gabions in water.	67
Embankment load	68
Footings	74
Wire strength.	78
CHAPTER 5. ENERGY DISSIPATION	83
Introduction	83
Energy loss over drops and steps	83
Energy loss in throughflow	89
Application of results.	91
Uniform flow down cascades	92
Hydraulic jump for energy dissipation.	93
Scour below weir.	96
CHAPTER 6. SOIL DRAINAGE.	100
Problems associated with water in soil	100
Groundwater flow.	100
Flownets	101
Phreatic line in unconfined flow	102
Drawdown in embankments	105
Piping.	110
Filter design.	112
Surface drainage.	117
CHAPTER 7. CHANNEL STABILIZATION	125
Introduction	125
Friction drag.	126
Channel cross sectional shape	129
Rock lining	135
River stabilization.	143
Local scour	151
CHAPTER 8. WAVES AND SHORE PROTECTION.	160
Introduction	160
Wave theory	160
Runup	166
Effect of permeability and drag.	169
Riprap sizing.	175
Filter layer	177
Breakwater design	179

Coast protection with groynes	183
CHAPTER 9. HYDRAULIC TRANSPORT OF ROCK	188
Alternative methods of transport	188
Transport mechanics; vertical pipes	191
Transport mechanics; horizontal pipes.	194
Power requirements	199
Open channel transport.	200
AUTHOR INDEX	207
INDEX	209
