

# **Geotechnical instrumentation in practice**

Purpose, performance and  
interpretation

Proceedings of the conference *Geotechnical instrumentation in civil engineering projects* organized by the Institution of Civil Engineers and co-sponsored by the British Geotechnical Society, the British Tunnelling Society and the British National Committee on Large Dams and held in Nottingham on 3-5 April 1989.

 Thomas Telford, London

## Contents

---

### Earthworks

1. Micros for embankment monitoring needn't cost the earth — the Creetown experience. D. C. MANN and D. C. HAMILTON 1
2. The application of instrumentation to the monitoring of ground treatment on an earthworks contract. V. C. S. AU and S. BUTTLING 25
3. A46 Lincoln Relief Road: geotechnical instrumentation on Lincoln Edge Escarpment J. H. BARLOW 41
5. Construction of a 21 metre high embankment based on instrumentation observations from simple monitoring devices. M. F. KENNARD and C. G. HOSKINS 59
- Rapporteur's paper. R.T. MURRAY 75
- Discussion 86

### Landslides and excavated slopes

8. Experience of a computerised monitoring system for landslides. B. MÖLLER, O. LINDHOLM and S. ARNEKULL 95
9. The behaviour of an instrumented dowel installed to stabilise slope movements. W. H. TING, C. T. TOH, P. K. CHOONG, T. F. WONG, and T. T. CHIAM 107
10. Instrumentation of temporary excavations for the A55 Conwy Crossing. J. N. DAVIES, P. WILLIAMS and K. G. WOODS 119
11. Global monitoring of unstable slopes in the North East of Portland, Dorset. J. N. McLAREN 145
12. Instrumentation systems for an experimental cut slope at Selborne, Hampshire — design and initial performance. M. R. COOPER, and D. I. GRANT 165
13. Continuous measurement of landslide movements. Ch. BONNARD and G. STEINMANN 177
- Rapporteur's paper. A. D. M. PENMAN 191
- Discussion 195

## Foundations and retaining walls

16. Use of instrumentation in determining full scale trial foundation performance. R. G. LEE, A. R. D. DAWSON and R. H. JONES 209
18. Continuous flight auger piling instrumentation. J. M. UNSWORTH and W. G. K. FLEMING 227
20. The instrumentation and performance of an anchored retaining wall. L. A. WOOD, C. J. FORBES-KING and A. MAYNARD 239
21. Ground instrumentation at the British Library, Euston. R. LOXHAM, B. SIMPSON and N. E. GATENBY 257
22. Long term heave of a building founded on clay soil after tree removal. J. E. CHENEY 275
23. Long term behaviour of embedded retaining walls in over-consolidated clay. I. F. SYMONS and D. R. CARDER 289
24. Reinforced earth walls using soft chalk backfills. J. TEMPORAL, K. C. BRADY and D. H. HARRIS 309
25. The performance of a raft foundation in London clay. L. A. WOOD 323
26. Measurements of lateral earth pressures on bridge abutments. A. P. BUTCHER and A. MARSLAND 341
27. Instrumentation of a jacked in pile. D. A. PONNIAH 357
- Rapporteur's paper. B. SIMPSON 371
- Discussion 374

## Dams

28. The proven usefulness of instrumentation systems on varied dam projects. D. J. KNIGHT 401
29. The trial embankment of Empingham Dam. R. C. BRIDLE, P. R. VAUGHAN and M. L. G. WERNEK 415
30. Inference of embankment dam safety by combining processed geotechnical instrument data with stored engineering knowledge. J. H. MARTIN, J. P. DAVIS and D. I. BLOCKLEY 429
32. Instrumentation and monitoring of the Virdejavri Arch Dam — Alta. K. TRONSTAD, P. M. JOHANSEN, B. ENGENE and O. MYRSET 439
- Rapporteur's paper. M. F. KENNARD 447
- Discussion 449

## Tunnels and underground chambers

34. The measurement and control of blasting vibration during civil engineering works. B. M. NEW and R. A. HOOD 467
35. Instrumentation used to monitor the influence of blasting on the performance of rock bolts at Penmaenbach Tunnel. A. A. RODGER, D. C. HOLLAND, G. S. LITTLEJOHN and D. K. V. MOTHERSILLE 481
36. Monitoring tunnel support by convergence measurement. J. SCHOLEY and D. G. INGLE 495
37. Design and performance of settlement monitoring devices around a tunnel at great depth in a clay formation. B. NEERDAEL, M. VOET, M. BOUILLEAU and L. BERTRAND 507
38. Monitoring and interpreting of results of geotechnical measurements for NATM linings design for the Channel Tunnel. M. JOHN and G. S. CRIGHTON 517
39. Strain monitoring in UK coal mine tunnels. A. S. BLOOR 535
40. Dinorwig Power Station — results of longer term monitoring. T. H. DOUGLAS and R. J. ALEXANDER 551
- Rapporteur's paper. M. P. O'REILLY 569
- Discussion 574

## Instrumentation

41. Instruments for measuring the effective stresses acting on a pile jacked into overconsolidated clay. A. J. BOND and R. J. JARDINE 583
43. Advantages of new data logging systems in the field of instrumentation. C. R. SWEET and A. T. MATTHEWS 607
44. Cordless geo data-link. D. L. E. TEAL 617
45. A transducer for measuring normal and shear stresses. G. O. ROWLANDS, R. DELPAK and S. N. WERSCHING 629
- Rapporteur's paper. B. O. SKIPP 649
- Discussion 654

## General

4. Creation of arching (pneusol and other techniques). P. A. JEAN and N. T. LONG 663
47. Long term monitoring of surface movements of reservoirs by surveying techniques. V. ASHKENAZI, A. H. DODSON, D. E. B. JONES and N. SAMSON 671
48. Instrumentation for highway works — obtaining value for money. J. R. GREENWOOD and G. W. HERRICK 681

49. The management and use of instrumentation during the construction of the motorway network in West Yorkshire. C. J. F. P. JONES	693
50. In-situ measurement of earth pressures using push-in spade-shaped pressure cells — 10 years experience. P. TEDD, J. J. POWELL, J. A. CHARLES and I. M. UGLOW	701
51. Stress cell measurements for the investigation of soil-pipeline interactions during vehicular loading. K. M. KOHL, B. M. NEW and T. D. O'ROURKE	717
52. Instrumentation and monitoring of an offshore Arctic platform. M. G. JEFFERIES, B. T. ROGERS and M. D. HARDY	735
53. Instrumentation of driven model test piles for determination of capacity of cyclically loaded offshore piles, S. BORG HANSEN, K. SOLHEIM, and P. NORUM	749
55. An experiment on the longitudinal deformation of small diameter buried pipelines subjected to vehicle loads. N. TAKAGI	769
Rapporteur's paper. J. A. CHARLES	785
Discussion	790
Closing address. P. A. GREEN	805

### Poster papers

P1. The acoustic method of measuring piezometer levels in standpipes. W. HEATH and S. DEDI	809
P2. BRE miniature push-in earth pressure cell system. K. S. WATTS	811
P3. Performance and analysis of offshore pile driving. H. SEKIGUCHI, T. SHIBATA, K. KITA, T. MATSUMOTO, S. MOTOYAMA	814
P4. Instrumentation of reinforced earth retaining walls on Dewsbury Ring Road. R. W. SARSBY and C. B. MARSHALL	816
P5. Ground vibration studies at the Transport and Road Research Laboratory. D. M. HILLER	819
P6. Monitoring Lee Bridge Viaduct, Halifax. A. PRICE-JONES and A. P. WHITTLESTONE	821
P7. Behaviour of an instrumented reinforced embankment. M. FAVARETTI and A. MAZZUCATO	824
P8. The conversion of Casagrande standpipe piezometers to rapid response instruments. N. A. SMITH and S. J. WADE	825

P9. Standpipe piezometers: some problems with pore pressure and permeability measurement. P. TEDD, I. R. HOLTON and J. A. CHARLES	828
P10. Ground freezing around chilled pipelines. D. P. GREENE and R. J. KETTLE	831
P11. Monitoring of earth pressures around the foundations of a ship lift. P. WELTER	833
P12. The performance of Grimwith Dam. H. T. LOVENBURY	835
P13. Monitoring of a deep tunnel inlet in hard rock reinforced cables. A. FREDRIKSSON and N. K. RÖSCHOFF	838
