

PROCEEDINGS OF THE INQUA/IGCP 158 MEETING ON THE PALAEOHYDROLOGICAL
CHANGES DURING THE LAST 15 000 YEARS / BERN / JUNE 1985

Lake, Mire and River Environments

During the last 15 000 years

Edited by

GERHARD LANG

Universität Bern

CHRISTIAN SCHLÜCHTER

Contents

Introduction	vii
1. Lake and mire environments	
Lago Cadagno: An environmental history <i>M.M.Boucherle & H.Züllig</i>	3
The Late-glacial and early Holocene history of the vegetation in the Wolbrom area (Silesian-Cracovian Upland, S.Poland) <i>M.Latałowa</i>	9
Contribution à l'histoire postglaciaire des deux lacs de Clairvaux (Jura, France): Recherches palynologiques et sédimentologiques <i>M.Magny & H.Richard</i>	23
Diatoms in bottom sediments of Lake Hobschen, Simplon, Switzerland – Preliminary report <i>B.Marciniak</i>	31
Palynological and isotope studies on carbonate sediments from some Polish lakes Preliminary results <i>K.Rozanski, K.Harmata, B.Noryskiewicz, M.Ralska-Jasiewiczowa & D.Wcisło</i>	41
Isopollen maps of <i>Picea abies</i> , <i>Fagus sylvatica</i> and <i>Abies alba</i> in Czechoslovakia – Their application and limitations <i>E.Rybničková & K.Rybniček</i>	51
Peculiarities of sedimentation in the small Estonian lakes <i>L.Saarse</i>	67
Principles of the palaeoecological subdivision of the European part of the USSR <i>L.Saarse, A.Raukas & D.Kvasov</i>	77
Synchronous pollen changes and traditional land use in south Finland, studied from three adjacent sites: A lake, a bog and a forest soil <i>K.Tolonen & M.Tolonen</i>	83
Sedimentation and local vegetation development of a reference site in southwestern Bulgaria <i>S.Tonkov</i>	99

2. Fluvial environments

The evolution of the Thessaloniki-Giannitsa plain in northern Greece during the last 2500 years – From the Alexander the Great era until today <i>T.A.Astaras & L.Sotiriadis</i>	105
Lake level changes and fluvial activity in the Late Glacial lowland valleys <i>S.Bohncke, J.Vandenbergh & T.A.Wijmstra</i>	115
Outline of river adjustments in small river basins in Belgium and the Netherlands since the Upper Pleniglacial <i>P.Cleveringa, W.De Gans, W.Huybrechts & C.Verbruggen</i>	123
Evolution of the Morava river in Late Pleistocene and Holocene time <i>P.Havlicek</i>	133
New methods of research on the Holocene palaeohydrography of Hungary <i>K.Mike</i>	137
The history of the hydrography of Hungary and the Carpathian Basin determined by large-scale tectonics <i>Ö.Rádai</i>	145
Holocene valley development on the Upper Rhine and Main <i>W.Schirmer</i>	153
Tectonic, anthropogenic and climatic factors in the history of the Vistula river valley downstream of Cracow <i>L.Starkel</i>	161
The Pleistocene-Holocene boundary in the Po valley south of Torino (NW Italy) <i>D.Tropeano</i>	171

3. Fluvial environments and palaeohydrology: The state-of-the-art Two views from Poland

Valley floor development and paleohydrological changes: The Late Vistulian and Holocene history of the Warta River (Poland) <i>S.Kozarski, P.Gonera & B.Antczak</i>	185
The problem of the hydrological interpretation of palaeochannel pattern <i>J.Rotnicka & K.Rotnicki</i>	205
List of participants	225
