# A Practical Guide to BOREHOLE GEOPHYSICS in ENVIRONMENTAL INVESTIGATIONS

W. Scott Keys

**LEWIS PUBLISHERS**

Boca Raton New York London Tokyo

# TABLE OF CONTENTS

1	Introduction	1
1.1	Benefits and Limitations of Logging	1
1.2	Logging Equipment	3
2	Environmental Applications of Borehole Geophysics	7
2.1	Site Selection and Design	7
2.2	Verifying Well Construction	8
2.3	Monitoring Contaminant Distribution	8
2.4	Planning Remediation Programs	9
3	Planning an Environmental Logging Program	11
3.1	Selecting the Most Useful Logs Based on Project Goals	12
3.1.1	Identifying lithology and correlating rock units	13
3.1.2	Determining porosity and permeability	13
3.1.3	Locating and characterizing fractures	14
3.1.4	Locating the water table and perched water	15
3.1.5	Locating and monitoring contaminant plumes	15
3.1.6	Verifying well construction	18
3.2	How Geology and Hydrology Affect Log Selection	18
3.3	How Well Construction Affects Log Selection	19
3.4	Who Will Do the Logging and Log Analysis	21
4	Log Analysis	23
4.1	Qualitative Analysis	23
4.2	Quantitative Analysis	24
4.3	Synergistic Analysis	25
4.4	Computer Analysis	27
4.4.1	Digitizing logs	35
4.5	Borehole Effects	37
5	Log Quality Control	41
5.1	Operation of Logging Equipment	42
5.2	Log Headings	43
5.3	Calibration and Standardization of Logs	45
5.4	ASTM Standard Guide	48
6	Electric Logs	51
6.1	Spontaneous Potential	51
6.1.1	What is measured and how	51
6.1.2	Applications and interpretation	52
6.2	Single-Point Resistance	55
6.2.1	What is measured and how	55
6.2.2	Applications and interpretation	56
6.3	Normal Resistivity	56
6.3.1	What is measured and how	56
6.3.2	Applications and interpretation	59
6.4	Focused Resistivity	62
6.5	Other Multielectrode Methods	63
6.6	Induction	64

6.6.1	What is measured and how	64
6.6.2	Applications and interpretation	66
7	Nuclear Logs	69
7.1	Gamma	75
7.1.1	What is measured and how	75
7.1.2	Applications and interpretation	75
7.2	Gamma Spectra	77
7.2.1	What is measured and how	77
7.2.2	Applications and interpretation	80
7.3	Gamma-Gamma	80
7.3.1	What is measured and how	80
7.3.2	Applications and interpretation	82
7.4	Neutron	83
7.4.1	What is measured and how	83
7.4.2	Applications and interpretation	86
7.4.3	Neutron activation	88
8	Acoustic Logs	91
8.1	Acoustic Velocity	91
8.1.1	What is measured and how	91
8.1.2	Applications and interpretation	93
8.2	Acoustic Waveform	94
9	Borehole-Imaging Logs	97
9.1	Acoustic Televiewer	97
9.1.1	What is measured and how	97
9.1.2	Applications and interpretation	98
9.2	Borehole Television	102
9.2.1	What is measured and how	102
9.2.2	Applications and interpretation	102
10	Caliper Logs	103
10.1	What is measured and how	103
10.2	Applications and interpretation	104
11	Fluid Logs	109
11.1	Temperature	109
11.1.1	What is measured and how	109
11.1.2	Applications and interpretation	110
11.2	Conductivity	113
11.2.1	What is measured and how	113
11.2.2	Applications and interpretation	114
11.3	Flow	117
11.3.1	What is measured and how	117
11.3.2	Applications and interpretation	120
12	Well-Construction Logs	123
12.1	Casing and Screens	123
12.2	Annular Materials	124
12.3	Cement Bond	125
12.4	Vertical Leakage	127
12.5	Borehole Deviation	129
13	Case Histories	131
13.1	Hardage Site	131
13.1.1	The site	131
13.1.2	Borehole geophysics	132
13.2	Idaho National Engineering Laboratory	137
13.2.1	The site	137
13.2.2	Borehole geophysics	139

13.3 Cape Cod .....	145
13.3.1 The sites .....	145
13.3.2 Borehole geophysics .....	147
13.4 Loring Air Force Base .....	151
13.4.1 The site .....	151
13.4.2 Borehole geophysics .....	152
14 Glossary .....	157
15 References .....	165
16 Index .....	171

Table 3.1. Response of logs to porosity.

Table 3.2. Suitable borehole conditions for formation logging tools.

Table 4.1. Mean log response (M) and ranges of values (R) calculated using Viewlog.

Table 7.1. Activities data on some common isotopes, modified from Kuo (1980).

Table 8.1. Compressional wave velocity and travel time in water column at 25°C and 100 m.

Table 12.1. ATY Factor of Well WY 229, Loring Air Force Base.
