Heineken bottles. (See Garbage housing)

747 Summaries/French

749 Aeronaut Le Corbusier

Painting by Lynn Curlee

750 Cosmorama

Mind forms. Photo fabrication. Culture, the new joy. Windmills. Inflatable sauna. Responsive environment. Instant office. Dome structure. Whale carwash.

756 Folded structural forms in paperboard

A paper structure system of building enclosures developed by Vinzenz Sedlak in Professor Makowski's civil engineering department at Surrey University.

764 Garbage housing

Martin Pawley, returning to the theme he discussed in AD 2/71 says 'Housing can only achieve the universality which has so long eluded it, by moving its resource base from that which is scarce and costly to that which is not only plentiful and cheap, but is also ubiquitous and *valueless*.'

790 Sector: Paris planning proposals tested by the Urban Mechanisms Group

Yona Friedman describes the 'urban mechanisms' model which he constructed and used for the tests.

792 Sector: Barbarians in the living room; or systems patterns and design

Barry Russell attempts to clarify the links between systems theory, values and design action, and how Bernstein's work may be relevant to design.

796 Round up

Notes on current affairs - housing, planning, transport, work, art, competitions.

802 Pick of the Projects 1974

Fourth announcement of AD's successor to Project Awards.

806 Check list

This month Alexander Pike discusses aluminium roof decking.

807 Catalogue

Outside contributor this month, Alexander Pike.

810 Letters

812 Summaries/German

Next month

Colin Moorcraft, author of the feature 'Solar energy' in October, provides the second instalment.

The Briefing series was held over this month. But next month Jolyon Drury will discuss Centres for Distribution.
