Cover

Flexible/adaptable living visualised by Lars Hokanson

67 Summaries/French

69 Ideas

The architectural fantasy of Jules Verne

71 Books

73 Solar energy, part III

Colin Moorcraft finishes his series with a survey of anaerobic fermentation of plants and organic waste.

75 Pick of the Projects: sixth announcement

76 Housing – Flexibility/adaptability?

Andrew Rabeneck and his firm, Building Systems Development, provide conclusions to their European survey of flexible housing that appeared in AD 11/73. They propose simple spaces which are simply constructed and which can be simply adapted by adding in or adding on. This constitutes a better solution, in their opinion, to the needs of flexibility than the more intricate techniques which architects find so fascinating.

92 Briefing: Factories

Derek Sugden and Jolyon Drury of Arup Associates question the whole approach of commissioning industrial projects. They believe this should be re-established in terms of a total system which achieves value-in-use.

108 Hertzberger

Until recently more was known of Herman Hertzberger's polemic than of his buildings. But now these ideas are brought into reality in the form of an office block for a large insurance company.

118 Planning

BRAG case study 3. Making towns better.

119 Round-up

Schools of Architecture Conference. Magazine spotlight. Exhibitions. Aunty Tom architects

126 Catalogue

Outside contributor, Alex Pike.

131 Letters

132 Summaries/German
