PART I

Physical and flow characteristics of unsaturated soils

<i>Part 1 Frontispiece</i>	2
<i>Chapter synopses</i>	3
1 Basic physics, phases and stress state variables	5
<i>Sources</i>	5
<i>Introduction (Fredlund, 1996)</i>	5
<i>Four-phase materials (Fredlund and Rahardjo, 1993)</i>	20
<i>Cavitation (Young, 1989; Marinho, 1995; Marinho and de Sousa Pinto, 1997)</i>	24
2 Measurement and control of suction: methods and applications	31
<i>Sources</i>	31
<i>Theory of soil suction (Fredlund and Rahardjo, 1993)</i>	32
<i>The capillary model</i>	32
<i>Suction control and measurement methods</i>	
<i>(Ng and Chen, 2005, 2006; Ng et al., 2007a)</i>	36
<i>Suction measuring devices (Fredlund and Rahardjo, 1993; Ridley and Wray, 1995; Feng and Fredlund, 2003)</i>	63
<i>Case study: comparisons of in situ suction measurements (Harrison and Blight, 2000)</i>	87

3	Flow laws, seepage and state-dependent soil–water characteristics	93
	<i>Sources</i> 93	
	<i>Flow laws for water and air (Fredlund and Rahardjo, 1993)</i> 94	
	<i>Soil–water characteristic curves and water permeability functions (Fredlund et al., 2001a, 2002)</i> 122	
	<i>The state-dependent soil–water characteristic curve: a laboratory investigation (Ng and Pang, 2000a,b)</i> 147	
	<i>Generalised triaxial apparatus for determination of the state-dependent soil–water characteristic curve (Ng et al., 2001a)</i> 166	
	<i>Measurements of the state-dependent soil–water characteristic curve in a centrifuge (Khanzode et al., 2002)</i> 168	
	<i>Steady-state and transient flows (Fredlund and Rahardjo, 1993)</i> 174	
	<i>Analytical analysis of rainfall infiltration mechanism in unsaturated soils (Zhan and Ng, 2004)</i> 194	
 PART 2		
	Collapse, swelling, strength and stiffness of unsaturated soils	221
	<i>Part 2 Frontispiece</i> 222	
	<i>Chapter synopses</i> 224	
4	Collapse and swelling caused by wetting	227
	<i>Sources</i> 227	
	<i>Overview</i> 227	
	<i>Collapsible soils (Bell and Culshaw, 2001; Houston, 1995; Fredlund, 1996)</i> 228	
	<i>Concept of virgin and non-virgin fills (Ng et al., 1998)</i> 240	
	<i>Estimations of foundation settlements (Houston, 1995)</i> 249	
	<i>Mitigation measures against collapsible soils (Houston, 1995)</i> 250	
	<i>Expansive soils (Bell and Culshaw, 2001; Tripathy et al., 2002)</i> 252	
	<i>Design of foundations on expansive swelling soils (Jimenez-Salas, 1995)</i> 273	
5	Measurement of shear strength and shear behaviour of unsaturated soils	279
	<i>Sources</i> 279	
	<i>Introduction to shear strength (Fredlund and Rahardjo, 1993)</i> 280	

<i>A new simple system for measuring volume changes of unsaturated soils in the triaxial cell</i> (Ng et al., 2002a)	287
<i>Comparisons of axis-translation and osmotic techniques for shear testing of unsaturated soils</i> (Ng et al., 2007)	294
<i>Extended Mohr–Coulomb failure criterion</i> (Fredlund and Rahardjo, 1993)	307
<i>The relationship of the unsaturated soil shear strength to the soil–water characteristic curve</i> (Fredlund et al., 1996)	313
<i>Effects of soil suction on dilatancy of an unsaturated soil</i> (Ng and Zhou, 2005)	326
<i>Behaviour of a loosely compacted unsaturated volcanic soil</i> (Ng and Chiu, 2001)	335
<i>Laboratory study of a loose saturated and unsaturated decomposed granitic soil</i> (Ng and Chiu, 2003a)	358
6 Measurement of shear stiffness	380
<i>Sources</i>	380
<i>Introduction</i> (Ng et al., 2000b)	380
<i>Effects of initial water contents on small strain shear stiffness of sands</i> (Qian et al., 1993)	382
<i>Effects of suction on elastic shear modulus of quartz silt and decomposed granite (silty sand)</i>	394
<i>Anisotropic shear stiffness of completely decomposed tuff (clayey silt)</i> (Ng and Yung, 2007)	408
PART 3	
State-dependent elasto-plastic modelling of unsaturated soil	431
<i>Part 3 Frontispiece</i>	432
<i>Chapter synopsis</i>	433
7 A state-dependent elasto-plastic critical state-based constitutive model	435
<i>Sources</i>	435
<i>Introduction</i>	435
<i>Mathematical formulations</i>	436
<i>Determination of model parameters</i>	447
<i>Comparisons between model predictions and experimental results for decomposed granite</i>	457
<i>Comparisons between model predictions and experimental results for decomposed volcanic soil</i>	463
<i>Summary</i>	466

PART 4**Field trials and numerical studies in slope engineering of unsaturated soils 469***Part 4 Frontispiece* 470*Chapter synopses* 471**8 Instrumentation and performance: A case study in slope engineering 473***Source* 473*The South-to-North Water Transfer Project, China (Ng et al., 2003)* 473**9 Engineering applications for slope stability 501***Sources* 501*Methods of slope stability analysis in unsaturated soils (Fredlund and Rahardjo, 1993)* 502*Three-dimensional numerical parametric study of rainfall infiltration into an unsaturated soil slope (Ng et al., 2001b)* 515*Influence of state-dependent soil-water characteristic curve and wetting and drying on slope stability (Ng and Pang, 2000b)* 537*Effects of state-dependent soil-water characteristic curves and damming on slope stability (Ng and Lai, 2004)* 547*Fundamentals of recompaction of unsaturated loose fill slopes (Ng and Zhan, 2001)* 559*Effects of surface cover and impeding layers on slope stability (Ng and Pang, 1998a)* 567*Numerical experiments of soil nails in loose fill slopes subjected to rainfall infiltration effects (Cheuk et al., 2005)* 575*Effects of conjunctive modelling on slope stability (Tung et al., 2004)* 599
