This edition first published 2012 © 2012 Elisa Bergslien

Blackwell Publishing was acquired by John Wiley & Sons in February 2007. Blackwell's publishing program has been merged with Wiley's global Scientific, Technical and Medical business to form Wiley-Blackwell.

Revised edition of *John Wiley & Sons Ltd, Southern Gate, Chichester, West Sussex, PO19 8SQ, UK*

An Introduction to Forensic Geoscience

Elisa Bergslien, PhD

Associate Professor
Buffalo State College
Buffalo, NY, USA

1	Introduction	1
2	Minerals and Rocks	15
3	Rocks: 5000 Years of the Earth	33
	The Rock Cycle	45
	Properties of Rocks	67
	Igneous Rocks	69
	Sedimentary Rocks	78
	Metamorphic Rocks	93
	Summary	101
	References	102
4	Maps: Getting a Sense of Place	103
	Global Location Systems	104
	Maps in the United Kingdom	115
	The Global Positioning System	115
	Maps	117
	Remote Sensing and Other Resources	127

 **WILEY-BLACKWELL**

A John Wiley & Sons, Ltd., Publication

Contents

List of Tables and Figures, vii

List of Color Plates, xxv

List of Cases, xxviii

Preface, xxx

Acknowledgments, xxxii

1 A Brief History of Forensic Science and Crime Scene Basics, 1

Scene of the Crime, 14

Processing the Crime Scene, 16

Types of Evidence, 20

Further Reading, 22

References, 23

2 Minerals: The Basic Building Blocks of Geology, 24

Mineralogical Fraud, 24

Minerals, 29

Types of Bonding, 34

Mineral Groups, 43

Properties of Minerals, 46

Summary, 62

Further Reading, 62

References, 62

3 Rocks: Storybooks of the Earth, 63

The Rock Cycle, 65

Properties of Rocks, 67

Igneous Rocks, 69

Sedimentary Rocks, 78

Metamorphic Rocks, 93

Summary, 102

Further Reading, 102

References, 102

4 Maps: Getting a Sense of Place, 103

Global Location Systems, 104

Maps in the United Kingdom, 115

The Global Positioning System, 115

Maps, 117

Remote Sensing and Other Resources, 127

Summary, 130

Further Reading, 130

References, 131

5 Sand: To See the World in a Grain of Sand, 132

An Introduction to Sand, 137

Characterizing Sand, 139

Surface Features, 152

Sample Collection, 155

Sample Preparation, 156

The Stereomicroscope, 157

Forensic Examination of Sand, 157

Common Minerals, 159

Less Common Minerals, 160

Opaque Minerals, 160

Anthropogenic Materials, 160

Summary, 163

Further Reading, 165

References, 166

6 Gems and Gemstones: Those Most Precious of all Minerals, 168

An Introduction to Gemstones, 170

Crystal Forms, 171

The Petrographic Microscope, 175

Light and the Optical Properties of Minerals, 177

The Forensic Identification of Glass, 182

More Optical Properties, 187

Isotropic versus Anisotropic Minerals, 191

Anisotropic Crystals, 193

Other Important Properties of Gems and Gemstones, 201

Identifying Gems and Gemstones, 202

Organic Gemstones, 216

Summary, 218

Further Reading, 218

References, 218

7 Soil: Getting the Dirt on Crime, 220

Introduction to Soils, 223

Soil Horizons, 223

Soil Origins, 225

Phyllosilicates (Sheet Silicates), 227

Some Important Clay Minerals, 231

Soil Classification, 237

Soil Color, 237

Soil Moisture, 242

Particle Size, 243

- Sample Collection, 245
 - Simplified Manual Dry Sieve Method for Particle Size Analysis, 246
 - Soil Classification Schemes, 249
 - Soil Survey Maps, 251
 - USDA Textural Classification, 252
 - The ASTM Unified Soil Classification System (USCS): D-2487, 253
 - Scene Examination, 256
 - Visual Examination of Soil Evidence, 256
 - Examination Procedures for Soil Samples, 257
 - An Introduction to X-ray Diffraction Spectrometry (XRD), 264
 - Interpreting a Diffraction Pattern, 272
 - Summary, 279
 - Further Reading, 279
 - References, 279
- 8 The Geology of Art, 281**
- Geologic Media and Art Forgery, 285
 - Mineral Pigments, 287
 - Black Pigments, 289
 - White Pigments, 290
 - Earth Colors: Red, Yellow, Orange, and Brown Pigments, 295
 - Blue Pigments, 298
 - Green Pigments, 302
 - Collecting a Sample for Microscopic Examination (McCrone, 1982), 305
 - Raman Spectroscopy, 307
 - Chromatography, 312
 - Inks, 314
 - Summary, 314
 - Further Reading, 314
 - References, 315
- 9 Fossils and Microfossils: Traces of Life, 317**
- Geologic Time and Index Fossils, 317
 - An Introduction to Fossils, 322
 - A Brief Introduction to the Classification of Fossils, 329
 - Invertebrate Paleontology, 332
 - Micropaleontology, 354
 - Collection and Treatment, 358
- Scanning Electron Microscope, 368
 - Is It Legal to Take This Fossil?, 378
 - Rare-earth Elements, 379
 - Summary, 379
 - References, 380
- 10 Geology and People: Forensic Anthropology and Forensic Archeology, 383**
- Locating Ground Disturbances, 384
 - Search, 385
 - Geophysical Tools, 390
 - Magnetometry, 390
 - Electrical Resistivity (ER), 400
 - Electromagnetic Induction (EMI), 408
 - Specialized EMI: Metal Detectors, 411
 - Ground-penetrating Radar (GPR), 412
 - Search and Post-search Operations, 423
 - Elemental and Mineralogical Analysis of Human Bone, 424
 - Summary, 428
 - Further Reading, 428
 - References, 428
- 11 Environmental Forensics: Tracking Pollution to its Source, 431**
- Water: Our Most Precious Natural Resource, 433
 - Surface Water, 434
 - Clean Water Act, 436
 - CERCLA and SARA, 440
 - Groundwater, 440
 - Contaminant Hydrogeology, 448
 - Safe Drinking Water Act, 450
 - Water-quality Measurements, 450
 - Field Water-quality Measurements, 452
 - Water Contamination, 455
 - Analytical Techniques for Chemical Fingerprinting, 462
 - Isotopes in the Environment, 463
 - Summary, 470
 - References, 471
- Index, 472**
- Color Plates appear between pages 224 and 225**
