

# Analytical Methods for Geochemical Exploration

J. C. Van Loon and R. R. Barefoot

Departments of Geology and Chemistry  
and  
The Institute for Environmental Studies  
University of Toronto  
Toronto, Canada

**Academic Press, Inc.**  
*Harcourt Brace Jovanovich, Publishers*  
San Diego New York Berkeley Boston  
London Sydney Tokyo Toronto

# Contents

Preface	ix
<b>1. Introduction</b>	
I. Samples	1
II. Analysis Techniques	4
III. Background Levels of the Elements	7
IV. Separations and Concentration	7
V. Error	8
VI. Elements Covered	13
References	16
<b>2. Principles of Determinative Methods</b>	
I. Atomic Absorption Spectrometry	17
II. Inductively Coupled Plasma—Atomic Emission Spectrometry	36
III. X-Ray Fluorescence Analysis	45
References	56
<b>3. Basic Materials</b>	
I. Water	58
II. Reagents	60
III. Containers	61
IV. Stability of Standard Solutions	62
V. Preparation of Standard Solutions	63
VI. Standard Reference Materials	65
VII. Safety Considerations	70
References	77
<b>4. Methods of Sample Preparation</b>	
I. Introduction	78
II. Field Sampling	78

- III. Drying 80
- IV. Crushing, Grinding, and Sieving 80
- V. Powder Samples 82
- VI. Decomposition of Solid Samples 84
- References 97

## 5. Field Methods

- I. Introduction 98
- II. Colorimetric Methods 99
- III. Color Standards 100
- IV. Sample Preparation (Samples Containing Organic Matter) 103
- V. Dry Ashing 103
- VI. Wet Ashing 104
- VII. Analytical Procedures 104
- VIII. Atomic Absorption Spectrometer for Field Work 125
- IX. Portable Mercury Spectrometer 129
- X. Portable X-Ray Equipment for Field Analyses 130
- References 131

## 6. Geochemical Methods for Soils and Related Samples

- I. Introduction 132
- II. Determination of Total Metals 136
- III. Extractable Metals 150
- IV. Selective Extractants 153
- V. Methods for Mercury and Hydride Elements 164
- VI. Solvent Extraction 191
- VII. Method for Waters 194
- References 199

## 7. Lithochemical Analysis

- I. Determination of Major and Trace Elements in Rocks by ICP-AES 200
- II. Determination of 15 Major and Trace Elements in Rock Samples by X-Ray Fluorescence Using One Glass Disk 205
- III. Determination of Major and Trace Elements in Silicate Rocks by Energy-Dispersive X-Ray Fluorescence 212
- IV. Determination of 14 Trace Elements in Rock Samples by Stepwise Solvent Extraction and Flame Atomic Absorption Spectrometry 218
- V. Determination of Trace Elements in Rocks and Minerals by Flameless Atomic Absorption 220
- VI. Determination of Trace Elements in Rocks by Flameless Atomic Absorption 221

- VII. Determination of Scandium, Yttrium, and Rare Earth Elements in Rocks by ICP-AES 223
- VIII. Determination of Rare Earth Elements in Minerals by Flame Atomic Absorption 226
- IX. Determination of Rare Earth Elements, Yttrium, and Scandium in Silicate Rocks by Flameless Atomic Absorption 228
- X. Determination of Rare Earth Elements in Rocks by Thin-Film X-Ray Fluorescence Spectrometry 236
- XI. Determination of Gold, Indium, Tellurium, and Thallium in Rocks, Soils, and Sediments by Solvent Extraction and Flame Atomic Absorption 241
- XII. Determination of Tin in Rocks by ICP-AES 244
- XIII. Determination of Gold in Rocks and Soils by Flameless Atomic Absorption 246
- XIV. Determination of Platinum in Rocks, Soils, and Sediments by Flame Atomic Absorption 248
- References 249

## 8. Determination of the Platinum Group Metals and Gold

- I. Introduction 251
- II. Fire Assay 252
- III. Other Methods of Decomposition 255
- IV. Evaporations 256
- V. Separation Techniques 256
- VI. Atomic Absorption Spectroscopy 258
- VII. Emission Spectroscopy 260
- VIII. Neutron Activation Spectroscopy and Other Nuclear Techniques 261
- IX. Radioactive Tracers 262
- X. X-Ray Fluorescence Spectroscopy 262
- XI. Electrochemical Methods 263
- XII. Gravimetry and Titrimetry 263
- XIII. Solution Spectrophotometry 264
- XIV. Standard Reference Materials 265
- XV. Analytical Procedures 265
- References 290

## 9. Biogeochemical Analysis

- I. Introduction 292
- II. Determination of Metals in Vegetation by Flame Atomic Absorption Spectroscopy 294
- III. Determination of Nickel and Zinc in Plant Material by Flame Atomic Absorption 298

- IV. Determination of Arsenic and Selenium in Plants by Hydride Generation (Atomic Absorption) 299
- V. Determination of Molybdenum in Botanical Material by Graphite Rod Atomic Absorption 303
- VI. Determination of Mercury in Plant Samples by Cold Vapor Atomic Absorption 304
- VII. Determination of Gold in Vegetation by Graphite Rod Atomic Absorption 305
- VIII. Analysis of Plant Materials by ICP-AES 306
- IX. X-Ray Fluorescence Analysis of Vegetation Samples 309
- X. Determination of Uranium in Plants by Laser Fluorometry 316
- References 317

## 10. ICP Source Mass Spectrometry

- I. Introduction 318
- II. Interferences 321
- III. Sample Preparation 322
- IV. Detection Limits 323
- V. Novel Sample Introduction Methods 323
- VI. Linear Working Range 323
- VII. Typical Mass Spectra 324
- VIII. Advantages over ICP-Optical Emission Spectrometry 326
- IX. Isotope Dilution (ID) Mass Spectrometry by ICP-MS 326
- X. Determination of Rare Earth Elements by ICP-MS 327
- XI. Determination of Lead Isotopes by Plasma Source Mass Spectrometry 331
- XII. Analysis of Leaf Samples Using ICP-MS with Electrothermal Sample Introduction 333
- References 337
