PRACTICE

22 PRACTICE NEWS

37 MAKING YOUR SPECIFICATIONS STICK

How and why architects, despite all rumors, still control the product-specifications process. The second in a series. By William Dyer

BUILDING TECHNOLOGY

39 HOW GOOD IS WOOD?

An environmental controversy in the Pacific Northwest calls attention to a declining resource. By Timothy McDonald

40 END OF AN ERA

The competing interests affecting attempts to restrict cutting old-growth forests.

42 DECLINE OF A COMMODITY

The consequences of the changing forests in terms of lumber quality and supply.

44 MAN-MADE TIMBER

An overview of engineered wood—products that make better use of the kinds of wood that are available.

NEW PRODUCTS 1991

17	Editorial	195	Advertising index
20	Design News	197	Reader Service Card

Of particular assistance to the editor in the preparation of this issue were:

Joan F. Blatterman, editor-in-charge

Annette K. Netburn, editorial production

Lilian R. Engel, editorial production assistant/designer

Susan R. Bleznick

Joseph F. Wilkinson

COVER: Cover design and production by *Wanted Designs* of New York.

The high-resolution image was created using *Alias/3* and Full Color Publisher software on a Silicon Graphics Personal Iris workstation. Optical scans of photographic material were converted into texture maps and applied to surfaces in the three-dimensional scene. A color proof was generated on the Iris 3024 ink-jet printer.
