# Contents

- **Contouring Techniques** 58
- **Other Displays** 62

## 5 Data Characteristics Requiring Special Handling 67
- Separating Stratigraphic Picks from Unconformity Picks 68
- Supplemental Data for Grid Control 74
- Merging Data from Different Sources 77
- Data That Represent Limits 87

## 6 Building the Stratigraphic Framework 93
- Grid Operations 94
- Geologic Interpretation 94
- Conformable Surfaces 100
- Truncation and Baselap 114
- Combining Interpretation, Conformity, Truncation, and Baselap 118

## 7 Displaying Stratigraphic Relationships 127
- Cross Sections 127
- Subcrop Maps 131
- Isochore Maps 136

## 8 Faulting 141
- Fault-Block Method 142
- Fault-Trace Method 151
- Restored-Surface Method 157
- Fault-Plane Method 168

## 9 Forcing Interpretation into Grids 175
- Digitized Contour Maps 175
- Controlling the Zero-Line in Isochore Maps 183
- Biased Gridding 198

## 10 Selected Petroleum Applications 205
- Fluid Contacts 205
- Mapping Gross Rock Thickness 208
- Volumetrics 212

## 11 Trend Analysis 235
- Appropriateness of Data 236
- Creating Trend Surfaces 237
- Creating a Residual Grid 246
- Evaluation of the Trends and Residuals 247
- Example Application 248
- Other Uses of Filters and Filter Analogues 252

## 12 Historical Reconstruction 255
- Stratigraphic and Structural Considerations 256
- Data Capture 256
- Construction of the Grids 261
- Showing the Reconstructed History 265

## Afterword 273

## Appendix A: Program Capabilities 277
- Data Entry 277
- Null Values 278
- Data Calculations and Modification 278
- Base Map 279
- Grids or Grid Equivalents 280
- Grid Creation 281
- Executive System and Grid File 281
- Plotter Contouring 282
- Calculations on or between Grids 283
- Inverse Interpolation 284
- Grid-to-Data 285
- Cross Sections and Profiles 285
- Displays on the Printer 286
- Polygons 286
- Integration 287
- Trend Surfaces and Filters 287
- Utilities 287

## Appendix B: Stratigraphic Example 289
