1 ROCK DRILLING METHODS 1
1.1 Introduction 1
1.2 Types of drilling operations used in rock breakage 1
1.3 Fields of application for the different drilling methods 1
1.4 Classification of the rocks and their principal physical properties 3
References 7

2 ROTARY PERCUSSIVE DRILLING 8
2.1 Introduction 8
2.2 Fundamentals of rotary percussive drilling 8
2.3 Top hammer drilling 10
2.4 Drilling with down the hole hammer 16
2.5 Advance systems 18
2.6 Mounting systems 19
2.7 Dust collectors 28
2.8 Inclination instruments 30
2.9 Penetration rate 30
2.10 Average penetration rate 33
2.11 Calculation of drilling costs 34
References 35

3 ROTARY PERCUSSIVE DRILLING ACCESSORIES 36
3.1 Introduction 36
3.2 Types of threads 36
3.3 Shank adaptors 37
3.4 Drill steel 38
3.5 Couplings 40
3.6 Drill bits 41
3.7 Calculation of the necessary drilling accessories 43
3.8 Care and maintenance of the bits 43
3.9 Care and maintenance of drill steel 47
3.10 Guide for identifying accessory failure and its causes 47
References 47

4 ROTARY DRILLING WITH ROLLING TRICONE BITS 48
4.1 Introduction 48
4.2 Mounting and propulsion systems 48
4.3 Power sources 48
4.4 Rotation systems 49
4.5 Pulldown/hoisting systems 50
4.6 Mast and pipe changer 51
4.7 Control cabin 52
4.8 System for flushing drill cuttings 52
4.9 Drill string 53
4.10 Auxiliary elements 55
4.11 Operative practice. Drilling parameters 56
4.12 Penetration rate 59
4.13 Calculation of drilling costs 61
References 63

5 ROLLING CONE ROCK BITS 64
5.1 Rolling cone rock bits 64
5.2 Major components and design features 64
5.3 The metallurgy of rolling cone rock bits 66
5.4 Types of rolling cone bits 67
5.5 Bit type selection 67
5.6 Effects of the operating parameters on the rolling cone bits 69
5.7 Nozzle selection 69
5.8 Evaluation of dull rolling cones 70
5.9 Example of roller tricone bit selection 71
5.10 IDAC Codes 71
References 71

6 ROTARY DRILLING WITH CUTTING ACTION 72
6.1 Introduction 72
6.2 Fundamentals of drilling with cutting action 72
6.3 Flushing of drill cuttings 75
6.4 Cutting tools 75
References 76

7 SPECIAL DRILLING METHODS AND MOUNTING SYSTEMS 77
7.1 Introduction 77
7.2 Drilling through overburden 77
7.3 Shaft sinking 79
7.4 Raise driving 80
# Contents

## 7.5 Jet piercing JH

## 7.6 Water-jet drilling 84

## 7.7 Drilling ornamental rock 85

## References 86

## 8 COMPRESSORS

### 8.1 Introduction 87

### 8.2 Types of compressors 87

### 8.3 Drive 87

### 8.4 Auxiliary elements 89

### 8.5 Calculating pressure drops 90

## References 91

## 9 THERMOCHEMISTRY OF EXPLOSIVES AND THE DETONATION PROCESS

### 9.1 Introduction 92

### 9.2 Deflagration and detonation 92

### 9.3 Detonation process of an explosive 93

### 9.4 Thermochemistry of the explosives 94

### 9.5 Heat of explosion 94

### 9.6 Oxygen balance 95

### 9.7 Volume of explosion 95

### 9.8 Minimum energy available 96

### 9.9 Temperature of the explosion 96

## References 97

## 10 PROPERTIES OF EXPLOSIVES

### 10.1 Introduction 98

### 10.2 Strength and energy 98

### 10.3 Detonation velocity 101

### 10.4 Density 102

### 10.5 Detonation pressure 102

### 10.6 Stability 102

### 10.7 Water resistance 102

### 10.8 Sensitivity 102

### 10.9 Detonation transmission 103

### 10.10 Desensitization 104

### 10.11 Resistance to low temperatures 104

## References 105

## 11 INDUSTRIAL EXPLOSIVES

### 11.1 Introduction 106

### 11.2 Dry blasting agents 106

### 11.3 Slurries 110

### 11.4 Emulsions 111

### 11.5 Heavy ANFO 113

### 11.6 Gelatin dynamites 115

### 11.7 Granular dynamite 115

### 11.8 Permissible explosives 116

### 11.9 Blackpowders 116

### 11.10 Two-component explosives 117

### 11.11 Explosives commercialized in Spain 117

## References 117

## 12 EXPLOSIVE SELECTION CRITERIA

### 12.1 Introduction 119

### 12.2 Explosive cost 119

### 12.3 Charge diameter 119

### 12.4 Rock characteristics 119

### 12.5 Volume of rock to be blasted 121

### 12.6 Atmospheric conditions 121

### 12.7 Presence of water 121

### 12.8 Environmental problems 121

### 12.9 Fumes 122

### 12.10 Safety conditions 122

### 12.11 Explosive atmospheres 122

### 12.12 Supply problems 122

## References 122

## 13 BLASTING ACCESSORIES

### 13.1 Introduction 123

### 13.2 Nonelectric initiation systems 123

### 13.3 Electric initiation systems 127

### 13.4 Sources of energy 130

### 13.5 Other accessories 132

## References 135

## 14 INITIATION AND PRIMING SYSTEMS

### 14.1 Introduction 136

### 14.2 Priming and booster bulk ANFO-type blasting agents 136

### 14.3 Priming cartridge ANFO type blasting agents 138

### 14.4 Priming pumped or poured slurry and emulsion blasting agents 139

### 14.5 Priming cartridge watergel and emulsion blasting agents 140

### 14.6 Location of primers 140

### 14.7 Priming conventional cartridge explosives 143

## References 143

## 15 MECHANIZED SYSTEMS FOR CHARGING AND DEWATERING BLASTHOLES

### 15.1 Introduction 144

### 15.2 Mechanized blasthole charging systems 144

### 15.3 Blasthole dewatering systems 152

## References 153

## 16 MECHANISMS OF ROCK BREAKAGE

### 16.1 Introduction 154

### 16.2 Rock breakage mechanisms 154

### 16.3 Transmission of the strain wave through the rock mass 156

### 16.4 Energetic yield of the blastings 157

## References 159

## 17 ROCK AND ROCK MASS PROPERTIES AND THEIR INFLUENCE ON THE RESULTS OF BLASTING

### 17.1 Introduction 160

### 17.2 Rock properties 160

### 17.3 Properties of the rock mass 161

## References 166
