Evolution of the Mid-Cretaceous Triad

Platform Carbonates, Phosphatic Sediments, and Pelagic
Carbonates Along the Northern Tethys Margin

Springer-Verlag

Berlin Heidelberg New York London Paris Tokyo Hong Kong

Contents

1 Introduction	1
1.1 Results of this Work and their Relation to the Observations of Arnold Heim	1
1.2 Events and Episodes in Mid-Cretaceous Times	2
1.3 Documents of the Mid-Cretaceous in Western Austria	4
1.4 Data Sources	7
2 Distribution and Interpretation of Mid- and Lower Upper Cretaceous Helvetic Shelf Sediments in Vorarlberg (Western Austria)	9
2.1 Introduction	9
2.2 Late Barremian to Early Aptian	9
2.3 Middle Early to Early Late Aptian	11
2.3.1 General Overview	11
2.3.2 Time-Space Relations	14
2.4 Middle Late Aptian	20
2.4.1 General Overview	20
2.4.2 Time-Space Relations	29
2.5 Latest Aptian to Earliest Albian	29
2.5.1 General Overview	29
2.5.2 Time-Space Relations	35
2.6 Early to Late Albian	37
2.6.1 General Overview	37
2.6.2 Time-Space Relations	54
2.7 Latest Albian to Early Cenomanian	56
2.8 Middle to Late Cenomanian	58
2.9 Latest Cenomanian to Earliest Turonian	59

2.10 Middle Turonian	64
2.11 Late Turonian to Coniacian	64
2.12 Late Coniacian to Late Santonian	70
2.13 Late Santonian to Early Campanian	71
3 Mechanisms Controlling the Formation of the Barremian-Campanian Vorarlberg Helvetic Shelf Sequence	75
3.1 Introduction	75
3.2 Sea Bottom Topography and Differential Subsidence	75
3.2.1 Narrowing and Steepening of the Carbonate Platform in the Eastward Direction	75
3.2.2 Transformation of the Carbonate Platform from a Gentle Homocline into a Distally Steepened Ramp (Rankweil Ramp)	76
3.3 Ammonoid Paleobiogeography	77
3.4 Currents	80
3.5 Oxygen Minimum Zone	87
3.6 Aptian to Early Cenomanian Phospho- and Glauconogenesis	89
3.6.1 Low Sedimentation Rates, Microbial Mats, Organic Matter, PO_4^{3-} Flux, and Phosphogenesis	90
3.6.2 Catastrophic Burials, Inner Shelf Equilibria, and Phosphogenesis	96
3.6.3 Glauconogenesis	100
3.7 Relative Sea Level Changes, Unconformities, and Tectonic Events	101
3.7.1 Relative Sea Level Changes, and Their Probable Causes	101
3.7.2 Unconformities, Diachronism, and Condensation	104
3.7.3 The Possible Influence of "Eo-alpine" Tectonic Phases	107
3.8 Drowning of the Carbonate Platform	108

3.9 The Garschella Case and its Implications for Lower Cretaceous Cyclic Sedimentation	112
3.9.1 Early Cretaceous Cyclicity	112
3.9.2 Mid-Cretaceous Distortion	113
3.9.3 The Tethyan Current System as an Influential Factor on Cyclicity	113
4 Conclusions and Summary	115
References	119
Subject Index	135
Section Localities	149
