

Geochemistry, Mineralogy and Genesis of Gold Deposits

I.Ya. NEKRASOV

A.A. BALKEMA/ROTTERDAM/BROOKFIELD/1996

Contents

FOREWORD	v
ABBREVIATIONS	ix
INTRODUCTION	xi
1 SYSTEMATISATION OF GOLD DEPOSITS	1
Characteristics of Classification of Gold Deposits	2
Basic Principles of Classification	7
Geochemical Formations and Mineral Types of Gold Mineralisation	9
2 GEOCHEMICAL CHARACTERISTICS OF GOLD	37
Chemical Properties of Gold	37
Gold in Magmatic Rocks	42
Gold in Sedimentary, Metamorphic and Metasomatic Rocks	56
Gold in Water and Aqueous Solutions	63
3 MINERALOGY OF GOLD	69
Gold and Its Alloys	77
Simple Intermetallic Compounds of Gold	88
Complex Intermetallic Compounds of Gold with Te, Pb, Fe and Cu	97
Sulphides, Sulphoselenides and Selenides	102
Gold Tellurides and Sulphotellurides	111
Gold Oxides and Hydroxides	118
4 SOLUBILITY OF GOLD IN CHLORIDE SOLUTIONS AND GENESIS OF GOLD-QUARTZ DEPOSITS	121
High-temperature Solubility of Gold in Aqueous Vapour Phase	124
Solubility of Gold in High-temperature Chloride Solutions	131
Geochemical and Physicochemical Factors of Gold Concentration in Quartz Bodies	137
5 PHASE RELATIONS IN GOLD-SULPHIDE SYSTEMS	141
Phase Relations of Minerals in Au-Sb Deposits and Thermodynamic Analysis of Au-Fe-Sb-S-O and Au-Sb-S-Cl-H ₂ O Systems	142
Experimental Study of Au-Sb-S and Au-Fe-Sb-S Systems under Dry and Hydrothermal Conditions	159
Cosolubility of Gold and Antimony in Sulphide Solutions and Problem of Existence of Heteropolynuclear Gold-Antimony Complexes	170

Phase Relations in Au-Ag-Sb-S System	179
Mineral Parageneses and Phase Relations in Au-Pb-Bi-S System	185
6 SULPHIDE-ARSENIDE DEPOSITS AND PHASE RELATIONS IN GOLD-ARSENIC SYSTEMS	201
Phase Relations in Au-Fe-As-S System	202
Solubility of Gold in Au-As-H ₂ S-0.1 N HCl System at 200 and 300° C	207
7 PHASE RELATIONS IN SELENIDE AND TELLURIDE SYSTEMS	217
Phase Relations of Selenides, Oxides and Sulphides in Ore-forming Systems	219
Phase Relations in Oxide-Sulphide-Telluride Systems	241
Characteristics of Selenide-Telluride Ratios in Ore Systems	252
Characteristics of Formation of Sulphide-Selenide-Telluride Mineralisation in Gold-Silver Deposits	256
8 GENETIC FEATURES OF GOLD DEPOSITS	264
Spatial Distribution and Geochemical Specialisation of Gold Deposits	265
Sources of Ore Matter and Diversity of Mineral Composition in Gold Deposits	276
Forms of Migration and Methods of Gold Concentration	288
CONCLUSIONS	307
