Contents

List of Worksheets	ix
Series Editor's Foreword	xi
Preface	xiii
1. Introduction	1
Part 1. Exploration	
2. Confidence intervals	5
2.1 Confidence intervals for a fictitious data set	5
2.2 Confidence intervals for data from the Elmwood, Tennessee, zinc deposit	6
2.3 Confidence intervals for the Don Tomas vein, Frisco mine ..	6
3. Fitting a straightline to exploration data	15
3.1 Gold placer data from Manhattan, Nevada	15

4. Analysis of variance	21
4.1 One-way analysis of variance	22
4.2 Comparing vein sets in the Frisco mine, Chihuahua, Mexico	23
4.3 Randomized block analysis of variance	23
4.4 Comparing methods of sample preparation for gold ore	24
5. Exploration geochemical data	45
5.1 Summary statistics	45
5.2 Frequency distributions and histograms	46
6. Exploration models	59
6.1 A simulation of grid drilling	59
6.2 The Elmwood, Tennessee, zinc deposit	61
7. Probability and related calculations	75
7.1 Tonnage-grade relations	75
7.2 Probability calculations	78
7.3 Plotting logarithmic graphs	79
Part 2. Evaluation	
8. Compound interest	91
8.1 Compound interest formulae	91
8.2 Table of discrete compounding factors	94
8.3 Solving interest problems	94
9. Depreciation and depletion	109
9.1 Yearly net income and cash flow calculation	110
9.2 The Ridgeway, South Carolina, gold mine	111
10. Discounted cash flow rate of return	119
10.1 A simple example	120
10.2 A second example of DCFROR	120

11. Blocking ore from data in development workings	129
11.1 Grade and tonnage of ore from development data	129
11.2 Calculation of specific gravity	131
12. Blocking ore from drillhole data	141
12.1 Quadratic regression — Rangely, Colorado, oil-and-gas field	141
12.2 Quadratic regression — Chambishi mine	143
12.3 Other ways to estimate block grades	147
13. Ore concentration and smelter settlement	163
13.1 Ore concentration	163
13.2 Calculation of grade for a mined-out deposit	165
13.3 Smelter settlement	166
14. Peters's model for mineral property evaluation	181
14.1 The basic model	181
14.2 Using the model	182
