GEOMATHEMATICAL AND PETROPHYSICAL STUDIES IN SEDIMENTOLOGY

PROCEEDINGS OF PAPERS PRESENTED AT SESSIONS SPONSORED BY THE INTERNATIONAL ASSOCIATION FOR MATHEMATICAL GEOLOGY AT THE 10th INTERNATIONAL CONGRESS ON SEDIMENTOLOGY IN JERUSALEM, JULY 1978

edited by

DAN GILL

Head, Geological Data Processing Section
Geological Survey of Israel, Jerusalem

and

DANIEL F. MERRIAM

Jessie Page Heroy Professor of Geology and Chairman,
Department of Geology, Syracuse University, Syracuse, New York

CONTENTS

List of Contributors ix

Preface xi

Introduction xiii

Recognizing terrigenous depositional environments with the aid of the computer, by Boas Arnon 1

Simulation of bed-thickness distribution based on waiting time in the Poisson process, by Niichi Nishiwaki 17

Sensitivity analysis of groundwater flow systems and an application to a real case, by M. Arif Yukler 33

A Monte-Carlo model for reconstructing open arrays from closed arrays, by Wolfdietrich Skala 51

Analysis of stress and deformation around a diapiric intrusion, by Y. Tsur-Lavie and S.A. Denekamp 59

The use of porosity logs in lithology determination, lithostratigraphy, and basin analysis, by Søren Priisholm and Olaf Michelsen 71

Gammaray - neutron cross-plots as an aid in sedimentological analysis, by W. Lynn Watney 81

Fast matrix methods for the lithological interpretation of geophysical logs, by J.H. Doveton and H.W. Cable 101

A review of several methods of segmentation, by Douglas M. Hawkins and J.A. ten Krooden 117

Stratigraphic correlation of well logs: an automated approach, by Brian R. Shaw and John M. Cubitt 127

Obstacles to quantitative lithostratigraphic correlation by C. John Mann 149

Interpretation of sedimentologic processes using seismic profiles in eastern Gulf of Mexico Basin, by G.T. Moore and H.O. Woodbury 167

Active growth fault on seaward edge of Blake Plateau, by Richard E. Sylwester, William P. Dillon, and John A. Grow 197

An algorithm for integrating polynomials over any closed boundary, and its application to calculation of volume under polynomial trend surfaces, by John K. Hall 211

Quantitative analysis of depositional environments (Aratu Unit, Reconcavo Series, Lower Cretaceous) in the Reconcavo Basin, Bahia, Brazil, by Julio Cesar Ribeiro and D.F. Merriam 219

Quantitative chemical stratigraphy of the Niobrara Chalk (Cretaceous) in western Kansas, by S. Yamamoto, S. Honjo, and D.F. Merriam 235

Principal components analysis, factor analysis, and point coordinates in the study of multivariate allometry, by J.C. Brower, J.M. Cubitt, J. Veinus, and M. Morton 245
