Contents

Foreword	xi	2.14 Weathering and geohazards	53
Preface	xiii	2.15 Summary	54
Dedication	xv	References	55
Biographies	xvii		
1. Introduction to Engineering Geomorphology		3. Sedimentology	
<i>Peter Fookes and Mark Lee</i>		<i>Colin J. R. Braithwaite</i>	
1.1 Preface	1	3.1 Introduction	57
1.2 Geomorphology, landforms and the nature of modern engineering geomorphology	4	3.2 Weathering	57
1.3 Techniques in engineering geomorphology	16	3.3 Sediment transport and deposition	58
1.4 Summary	26	3.4 Sedimentary rocks	74
References	26	3.5 Sedimentary facies and environments	82
Further Reading	26	3.6 Summary	83
		References	83
		Further reading	83
PART I CONTROLS		4. Tectonics	
2. Climate and Weathering		<i>Tony Waltham</i>	
<i>Mark Lee and Peter Fookes</i>		4.1 Geological structures	85
2.1 Climate	31	4.2 Tectonic landforms	97
2.2 Tropical climates	31	4.3 Lithology and landforms	102
2.3 Temperate climates	33	4.4 Summary	106
2.4 Polar climates	35	References	106
2.5 Climate classification	37	Further reading	106
2.6 Climate variability	41	5. Stratigraphy	
2.7 Extreme events	41	<i>Colin J. R. Braithwaite</i>	
2.8 Climate and flooding	42	5.1 Introduction and basic principles	107
2.9 Global climate change	44	5.2 Correlation	109
2.10 The hydrological cycle	44	5.3 Bedding and time	109
2.11 Weathering	47	5.4 Three kinds of stratigraphy	111
2.12 Weathering and landscape	47	5.5 Non-radiometric chronology	113
2.13 Weathering products: engineering soils	52	5.6 Seismic stratigraphy	114
		5.7 The geological time scale	114
		5.8 Correlating and interpreting sequences	116

5.9 Geological maps	121	8.7 Landslides: susceptibility, hazard and risk	198
5.10 Summary	122	8.8 Planning and undertaking a landslide investigation	205
References	122	8.9 Landslide stabilisation	206
6. The Quaternary		8.10 Conclusion	214
<i>Andrew Goudie</i>		References	215
6.1 Introduction	124	Acknowledgements	217
6.2 The late Cainozoic	124	9. Active Tectonic Environments and Seismic Hazards	
6.3 Abrupt change	126	<i>James V. Hengesh, and William R. Lettis</i>	
6.4 The last glacial cycle	129	9.1 Introduction	218
6.5 Interglacials	130	9.2 Earthquake occurrence and magnitude scaling	220
6.6 Holocene	130	9.3 Types of fault displacement	223
6.7 The Quaternary in low latitudes	131	9.4 Seismic source characterisation	232
6.8 Sea-level changes	131	9.5 Probabilistic seismic hazard assessment and treatment of uncertainty	251
6.9 Summary	134	9.6 Liquefaction and related ground deformation	253
References	135	9.7 Implications for engineering	259
Further reading	136	References	259
7. Engineering Behaviour of Soils and Rocks		10. Rivers	
<i>George Milligan, Peter Fookes and Mark Lee</i>		<i>Mark Lee</i>	
7.1 Introduction	137	10.1 Introduction	263
7.2 Elements of behaviour	138	10.2 River channel changes	263
7.3 Slope instability	149	10.3 Channel form: regime theory	266
7.4 Geotechnical problems associated with different soil types	153	10.4 Planform types	270
7.5 Typical values of soil properties	163	10.5 Bank erosion and instability	273
7.6 Closing remarks	167	10.6 Bed scour	274
References	168	10.7 Floodplain accretion	277
Further reading	169	10.8 River terraces: phases of aggradation and incision	278
PART II GEOMORPHOLOGICAL PROCESSES		10.9 Floods	281
8. Landslides		10.10 Sediment transport	283
<i>James S Griffiths</i>		10.11 The significance for conservation	284
8.1 Introduction	173	10.12 Soft engineering and river restoration	284
8.2 Description	176	10.13 Summary: the catchment approach to river engineering	284
8.3 Landslide cause	178	References	285
8.4 Landslide recognition	180		
8.5 Landslide activity and behaviour	180		
8.6 Landslide distribution and occurrence	186		

11. Soil Erosion*Mark Lee and John Charman*

11.1	Introduction	287
11.2	Types of erosion features	288
11.3	Detachment: erosivity of rainfall	293
11.4	Transport: running water	293
11.5	Transport: erosivity of wind	296
11.6	Resistance to erosion: soil erodibility and plant cover	297
11.7	Erosion hazard assessment	301
11.8	The Universal Soil Loss Equation	307
11.9	Erosion control methods and materials	307
11.10	Summary	316
	References	316

12. Subsidence*Tony Waltham*

12.1	Subsidence environments	318
12.2	Subsidence on clay	318
12.3	Subsidence on peat	324
12.4	Hydrocompaction of collapsing soils	326
12.5	Subsidence on permafrost	327
12.6	Subsidence on limestone and gypsum	329
12.7	Salt subsidence	329
12.8	Volcanic subsidence	331
12.9	Implications for engineering on naturally cavernous ground	332
12.10	Subsidence due to mining	335
12.11	Tectonic subsidence	339
12.12	Summary	341
	References	341
	Further reading	342

PART III ENVIRONMENTS AND LANDSCAPES**13. Glacial Environments***Lewis A. Owen and Edward Derbyshire*

13.1	Introduction	345
13.2	Physics of glaciers	348

13.3	Glacial erosion and entrainment of sediment	349
13.4	Depositional processes and classification of tills	351
13.5	Contemporary glacial environments: land system models	353
13.6	Engineering in glacial environments	361
13.7	Conclusions: recommendations to engineers working in glacial or glaciated environments	372
	References	372

14. Periglacial Forms and Processes*H. Jesse Walker*

14.1	Introduction	376
14.2	Permafrost distribution	376
14.3	Periglacial processes	378
14.4	Ground ice and permafrost	382
14.5	Periglacial landforms	386
14.6	Periglacial soils	389
14.7	River ice, lake ice, and sea ice	391
14.8	Engineering and fossil periglacial forms	392
14.9	Engineering and present-day permafrost environments	394
14.10	Oil industry	395
14.11	Summary and future challenges	396
	References	397
	Further reading	399

15. Temperate Environments*Kenneth J. Gregory*

15.1	Deposits, sediments and the landscape	400
15.2	Water movement	412
15.3	Human activity	415
15.4	Summary	417
	References	417
	Further reading	418

16. Hot Drylands*Mark Lee and Peter Fookes*

16.1	Introduction	419
16.2	Desert landscapes	419
16.3	Zone I: the uplands	421
16.4	Zone II: footslopes and fans	423
16.5	Zone III: plains	428
16.6	Zone IV: base level plains	434
16.7	Surface erosion and instability	437
16.8	Excavation	438
16.9	Behaviour of desert soils	438
16.10	Aggregates	439
16.11	Water and sediment problems	439
16.12	Dune mobility	443
16.13	Aggressive salty ground	446
16.14	Summary	450
	References	451

17. Savanna*Michael F. Thomas*

17.1	Introduction to savanna environments	455
17.2	The nature of the regolith in savanna areas	456
17.3	Landform assemblages and surface materials	460
17.4	Surface processes and geohazards in the savanna	465
17.5	Summary	471
	References	471
	Further reading	473
	Acknowledgements	473

18. Hot Wetlands*Ian Douglas*

18.1	The tropical rainforest environment	473
18.2	Weathering and soil characteristics	479
18.3	Soil characteristics on different rock types	485
18.4	Rivers and alluvial landforms	487
18.6	Volcanic terrain	490
18.7	Karst terrain	492

18.8	Slope instability and landsliding	496
18.9	Extreme events and major geomorphological problems in hot wetlands	496
18.10	Summary	498
	References	498
	Further reading	500

19. Mountain Environments*John Charman and Mark Lee*

19.1	Introduction	501
19.2	Rocks, climate and weathering	502
19.3	Mountain terrain model	505
19.4	Access and routing	506
19.5	Large landslides	508
19.6	Debris flows and torrents	513
19.7	Snow melt and flash floods	514
19.8	Landslide dams	517
19.9	Glacial lake outburst floods	519
19.10	Snow avalanches	524
19.11	Ice avalanches	527
19.12	Construction materials	528
19.13	Summary	529
	References	532

20. Estuaries and Deltas*Warren E. Grabau, H. Jesse Walker and Mark Lee*

20.1	Estuaries and deltas: introduction	535
20.2	Estuaries	535
20.3	Deltas	552
20.4	Depositional environments	556
20.5	Summary	562
	References	563
	Further reading	565

21. Coastal Environments*Julian Orford*

21.1	Introduction	566
21.2	Perspectives affecting our understanding of the coastal zone	566
21.3	Process and response controls in the coastal zone	570
21.4	Sediments in the coastal zone	576

21.5 Coastal organisation	577	24. Karst Terrains	
21.6 Effects of morphology on coastal zone structure	585	<i>Tony Waltham</i>	
21.7 Controls on coastal morphology	587	24.1 Soluble rocks terrains	662
21.8 Key clastic coastal depositional morphology	587	24.2 Surface landforms of karst	663
21.9 Conclusion	599	24.3 Underground features of karst	670
21.10 Summary	599	24.4 Types of karst terrain	679
References	599	24.5 Summary	683
Further reading	602	References	686
		Further reading	687
22. Continental Shelves		25. Loess	
<i>Colin Jago</i>		<i>Edward Derbyshire and Xingmin Meng</i>	
22.1 Introduction	603	25.1 Introduction	688
22.2 Morphology of continental margins	603	25.2 Loess Terrain	690
22.3 Major controls of shelf sedimentation	605	25.3 Engineering properties of loess	697
22.4 Shelf hydrodynamic regime	607	25.4 Key engineering geomorphological issues	711
22.5 Properties of shelf sediments	611	25.5 Conclusions	723
22.6 Organism–sediment interaction	614	References	724
22.7 Patterns of shelf sedimentation	614	Acknowledgements	728
22.8 The shoreface and coastal zone bypassing	615	26. Chalk Landscapes	
22.9 Muddy shelves	617	<i>Fred Bell and Martin Culshaw</i>	
22.10 Tide-dominated sandy shelves	622	26.1 Introduction	729
22.11 Wave and storm-dominated sandy shelves	625	26.2 Geomorphology of the Chalklands	730
22.12 Preservation of relict features	626	26.3 Chalk engineering	742
22.13 Preservation of nearshore marine patterns	627	26.4 Summary and conclusions	753
22.14 Summary	629	References	754
References	629	Acknowledgements	756
Further reading	632	27. Urban Geomorphology	
23. Volcanic Landscapes		<i>Ian Douglas</i>	
<i>Tony Waltham</i>		27.1 Introduction	757
23.1 Plate tectonics and volcanoes	633	27.2 Problems of siting and planning urban developments	758
23.2 Basaltic volcanic landscapes	636	27.3 Impact of urban activities on geomorphic processes	768
23.3 Explosive volcanoes	648	27.4 Landform creation by urbanisation	772
23.4 Mud volcanoes	658	27.5 Remediation and Prevention	775
23.5 Summary	659	27.6 Summary	776
References	659	References	777
Further reading	661	Further reading	779

APPENDICES

Appendix A1 Visual Identification 782
 Appendix A2 Identification, Description and Classification of Soils 789
 Appendix A3 Identification, Description and Classification of Rocks 804

Appendix A4 Geomorphological Mapping 816
 Appendix A5 Soil Erosion Assessment 825
 Appendix A6 Units, Scales and Conversions 834

INDEX 843

24. Karst Terrains
 24.1 Introduction 843
 24.2 Problems of zoning and planning 843
 24.3 Problems of urban activities 843
 24.4 Landform classification 843
 24.5 Remediation and preservation 843
 24.6 References 843
 24.7 Further reading 843

25. Loess
 25.1 Introduction 843
 25.2 Loess 843
 25.3 Engineering properties of loess 843
 25.4 Loess engineering 843
 25.5 Geotechnological issues 843
 25.6 Conclusions 843
 25.7 References 843
 25.8 Further reading 843

26. Chalk Landscapes
 26.1 Introduction 843
 26.2 Chalk geology and landscape 843
 26.3 Chalk engineering and landscape 843
 26.4 Summary and conclusions 843
 26.5 References 843
 26.6 Further reading 843

27. Urban Geomorphology
 27.1 Introduction 843
 27.2 Problems of zoning and planning 843
 27.3 Problems of urban activities 843
 27.4 Landform classification 843
 27.5 Remediation and preservation 843
 27.6 References 843
 27.7 Further reading 843

28. Continental Shores
 28.1 Introduction 843
 28.2 Morphology of continental shelves 843
 28.3 Shelf systems 843
 28.4 Shelf systems and sedimentation 843
 28.5 Processes of shelf sedimentation 843
 28.6 Organic-sediment interaction 843
 28.7 Landforms of shelf sedimentation 843
 28.8 The shelves and coastal erosion 843
 28.9 Erosion 843
 28.10 Wide shelves 843
 28.11 Sub-dominated sandy shelves 843
 28.12 Wave and storm dominated shelves 843
 28.13 Interaction of shelf features and climate 843
 28.14 Preservation of shelves 843
 28.15 Summary 843
 28.16 References 843
 28.17 Further reading 843

29. Volcanic Landscapes
 29.1 Introduction 843
 29.2 Basic volcanic landscapes 843
 29.3 Explosive volcanoes 843
 29.4 Mild volcanoes 843
 29.5 Shield volcanoes 843
 29.6 References 843
 29.7 Further reading 843

30. Coastal Environments
 30.1 Introduction 843
 30.2 Coastal geomorphology 843
 30.3 Coastal erosion 843
 30.4 Coastal sedimentation 843
 30.5 Coastal management 843
 30.6 References 843
 30.7 Further reading 843
