

Geostatistics

Modeling Spatial Uncertainty

JEAN-PAUL CHILÈS

Bureau de Recherches Géologiques et Minières

PIERRE DELFINER

TOTAL Exploration Production

General Principles 20

Random Fields and Samps 20

Mathematical Properties of the Variogram 27

Geostatistics in Geologic and Mineral Resource Estimation 30

Geostatistical Methods 30

Estimation 30

Interpolation Variogram Model 30

Geostatistics in Prediction of a "Best" Solution 30

Example Applications of the Method 30

Theoretical Results 30

Structural Problems 30

Estimation of Spatial Uncertainty 30

A Wiley-Interscience Publication

Contents	
Preface	ix
Abbreviations	xii
Introduction	1
Types of Problems Considered, 2	2
Description or Interpretation?, 7	7
1. Preliminaries	11
1.1. Random Functions, 11	11
1.2. On the Objectivity of Probabilistic Statements, 22	22
1.3. Transitive Theory, 24	24
2. Structural Analysis	29
2.1. General Principles, 29	29
2.2. Variogram Cloud and Sample Variogram, 34	34
2.3. Mathematical Properties of the Variogram, 57	57
2.4. Regularization and Nugget Effect, 74	74
2.5. Variogram Models, 80	80
2.6. Fitting a Variogram Model, 104	104
2.7. Variography in Presence of a Drift, 115	115
2.8. Simple Applications of the Variogram, 128	128
2.9. Complements: Theory of Variogram Estimation and Fluctuation, 137	137
3. Kriging	150
3.1. Introduction, 150	150
3.2. Notations and Assumptions, 152	152

3.3.	Kriging with a Known Mean,	154
3.4.	Kriging with an Unknown Mean,	164
3.5.	Estimation of a Spatial Average,	193
3.6.	Selection of a Kriging Neighborhood,	201
3.7.	Measurement Errors and Outliers,	210
3.8.	Case Study: The Channel Tunnel,	215
3.9.	Kriging under Inequality Constraints,	224
4.	Intrinsic Model of Order k	231
4.1.	IRF-0 and IRF- k ,	231
4.2.	A Second Look at the Model of Universal Kriging,	233
4.3.	Allowable Linear Combinations of Order k ,	236
4.4.	Intrinsic Random Functions of Order k ,	243
4.5.	Generalized Covariance Functions,	252
4.6.	Estimation in the IRF Model,	265
4.7.	Generalized Variogram,	276
4.8.	Automatic Structure Identification in the General Case,	281
5.	Multivariate Methods	292
5.1.	Introduction,	292
5.2.	Notations and Assumptions,	293
5.3.	Simple Cokriging,	296
5.4.	Universal Cokriging,	298
5.5.	Case of Gradient Information,	313
5.6.	Multivariate Random Functions,	321
5.7.	Shortcuts,	351
5.8.	Space-Time Models,	362
6.	Nonlinear Methods	375
6.1.	Introduction,	375
6.2.	Simple Methods for Estimating a Point Distribution,	376
6.3.	Local Estimation of a Point Distribution by Disjunctive Kriging,	388
6.4.	Simple Methods for Estimating a Block Distribution,	419
6.5.	Local Estimation of a Block Distribution by Disjunctive Kriging,	437

7. Conditional Simulations	449
7.1. Introduction and Definitions, 449	
7.2. Direct Conditional Simulation of a Continuous Variable, 462	
7.3. Conditioning by Kriging, 465	
7.4. Turning Bands, 472	
7.5. Nonconditional Simulation of a Continuous Variable, 478	
7.6. Nonconditional Simulation of an IRF- k , 506	
7.7. Simulation of a Categorical Variable, 520	
7.8. Object-Based Simulations: Boolean Models, 545	
7.9. Constrained Simulations, 561	
7.10. Practical Considerations, 571	
7.11. Case Studies, 577	
8. Scale Effects and Inverse Problems	593
8.1. Introduction, 593	
8.2. Upscaling Permeability, 594	
8.3. Stochastic Differential Equations, 602	
8.4. Inverse Problem in Hydrogeology, 611	
Appendix	636
References	650
Index	687
