<b>Preface to the Second Edition</b>	<b>ix</b>
<b>Preface to the First Edition</b>	<b>xiii</b>
<b>Abbreviations</b>	<b>xv</b>
<b>Introduction</b>	<b>1</b>
Types of Problems Considered, 2	
Description or Interpretation?, 8	
<b>1. Preliminaries</b>	<b>11</b>
1.1 Random Functions, 11	
1.2 On the Objectivity of Probabilistic Statements, 22	
1.3 Transitive Theory, 24	
<b>2. Structural Analysis</b>	<b>28</b>
2.1 General Principles, 28	
2.2 Variogram Cloud and Sample Variogram, 33	
2.3 Mathematical Properties of the Variogram, 59	
2.4 Regularization and Nugget Effect, 78	
2.5 Variogram Models, 84	
2.6 Fitting a Variogram Model, 109	
2.7 Variography in the Presence of a Drift, 122	
2.8 Simple Applications of the Variogram, 130	
2.9 Complements: Theory of Variogram Estimation and Fluctuation, 138	

<b>3. Kriging</b>	<b>147</b>
3.1 Introduction, 147	
3.2 Notations and Assumptions, 149	
3.3 Kriging with a Known Mean, 150	
3.4 Kriging with an Unknown Mean, 161	
3.5 Estimation of a Spatial Average, 196	
3.6 Selection of a Kriging Neighborhood, 204	
3.7 Measurement Errors and Outliers, 216	
3.8 Case Study: The Channel Tunnel, 225	
3.9 Kriging Under Inequality Constraints, 232	
<b>4. Intrinsic Model of Order <math>k</math></b>	<b>238</b>
4.1 Introduction, 238	
4.2 A Second Look at the Model of Universal Kriging, 240	
4.3 Allowable Linear Combinations of Order $k$ , 245	
4.4 Intrinsic Random Functions of Order $k$ , 252	
4.5 Generalized Covariance Functions, 257	
4.6 Estimation in the IRF Model, 269	
4.7 Generalized Variogram, 281	
4.8 Automatic Structure Identification, 286	
4.9 Stochastic Differential Equations, 294	
<b>5. Multivariate Methods</b>	<b>299</b>
5.1 Introduction, 299	
5.2 Notations and Assumptions, 300	
5.3 Simple Cokriging, 302	
5.4 Universal Cokriging, 305	
5.5 Derivative Information, 320	
5.6 Multivariate Random Functions, 330	
5.7 Shortcuts, 360	
5.8 Space–Time Models, 370	
<b>6. Nonlinear Methods</b>	<b>386</b>
6.1 Introduction, 386	
6.2 Global Point Distribution, 387	
6.3 Local Point Distribution: Simple Methods, 392	
6.4 Local Estimation by Disjunctive Kriging, 401	
6.5 Selectivity and Support Effect, 433	

6.6 Multi-Gaussian Change-of-Support Model, 445	
6.7 Affine Correction, 448	
6.8 Discrete Gaussian Model, 449	
6.9 Non-Gaussian Isofactorial Change-of-Support Models, 466	
6.10 Applications and Discussion, 469	
6.11 Change of Support by the Maximum (C. Lantuéjoul), 470	
<b>7. Conditional Simulations</b>	<b>478</b>
7.1 Introduction and Definitions, 478	
7.2 Direct Conditional Simulation of a Continuous Variable, 489	
7.3 Conditioning by Kriging, 495	
7.4 Turning Bands, 502	
7.5 Nonconditional Simulation of a Continuous Variable, 508	
7.6 Simulation of a Categorical Variable, 546	
7.7 Object-Based Simulations: Boolean Models, 574	
7.8 Beyond Standard Conditioning, 590	
7.9 Additional Topics, 606	
7.10 Case Studies, 615	
<b>Appendix</b>	<b>629</b>
<b>References</b>	<b>642</b>
<b>Index</b>	<b>689</b>
