

GEOSYSTEMS

AN INTRODUCTION
TO PHYSICAL GEOGRAPHY

SECOND EDITION

Robert W. Christopherson

MACMILLAN COLLEGE PUBLISHING COMPANY
Englewood Cliffs, New Jersey 07632

CONTENTS

1	Essentials of Geography	1
	THE SCIENCE OF GEOGRAPHY	2
	The Geographic Continuum	4
	EARTH SYSTEMS CONCEPTS	5
	Systems Theory	5
	Earth as a System	8
	Earth's Four Spheres	9
	A SPHERICAL PLANET	10
	LOCATION AND TIME ON EARTH	11
	Latitude	11
	Longitude	14
	Prime Meridian and Standard Time	17
	Great Circles and Small Circles	20
	MAPS AND MAP PROJECTIONS	20
	The Scale of Maps	21
	Map Projections	22
	Mapping and Topographic Maps	27
	SUMMARY	29
	Key Terms	31
	Review Questions	32
	Suggested Readings	33
	FOCUS STUDY 1-1	<i>Measuring Earth in 247 B.C.</i> 12
	FOCUS STUDY 1-2	<i>The Search for Longitude</i> 16

PART ONE

The Energy-Atmosphere System

2 Solar Energy to Earth 37

SOLAR SYSTEM: STRUCTURE AND FORMATION	38		
Solar System Location	38		
Solar System Formation	40		
Earth's Development	41		
SOLAR ENERGY: FROM SUN TO EARTH	41		
Solar Operation and Fusion	42		
Solar Wind	43		
Earth's Magnetosphere	44		
Solar Wind Effects	45		
Electromagnetic Spectrum of Radiant Energy	47		
ENERGY AT THE TOP OF THE ATMOSPHERE	48		
Intercepted Energy	49		
THE SEASONS	52		
Seasonality	52		
Contributing Physical Factors	53		
Annual March of the Seasons	56		
REMOTE SENSING	59		
Geographic Information System (GIS)	61		
SUMMARY	62		
Key Terms	63	Review Questions	64
Suggested Readings			65
FOCUS STUDY 2-1	<i>The Scientific Method</i>	42	

3 Earth's Modern Atmosphere 67

ATMOSPHERIC STRUCTURE AND FUNCTION	68		
Air Pressure	68		
Atmospheric Composition, Temperature, and Function Classifications	72		
Heterosphere	72		
Homosphere	74		
VARIABLE ATMOSPHERIC COMPONENTS	76		
Natural Sources	80		
Natural Factors that Affect Air Pollution	81		
Anthropogenic Pollution	83		
SUMMARY	90		
Key Terms	91	Review Questions	91
Suggested Readings			92
FOCUS STUDY 3-1	<i>The Stratospheric Ozone Predicament</i>	77	
FOCUS STUDY 3-2	<i>Acid Deposition: A Blight on the Landscape</i>	89	

4 Atmosphere and Surface Energy Balances _____ **95**

ENERGY BALANCE OF THE TROPOSPHERE	96
Energy in the Atmosphere: Some Basics	96
Earth-Atmosphere Radiation Balance	102
EARTH'S SURFACE ENERGY BALANCE	103
Daily Radiation Curves	104
Simplified Surface Energy Balance	105
Urban-Induced Energy Balances	110
SUMMARY	114
Key Terms	115
Review Questions	115
Suggested Readings	116
FOCUS STUDY 4-1	<i>Solar Energy Collection and Concentration</i> 108

5 World Temperatures _____ **119**

PRINCIPAL TEMPERATURE CONTROLS	120
Latitude	120
Altitude	120
Cloud Cover	124
Land-Water Heating Differences	124
EARTH'S TEMPERATURE PATTERNS	130
January Temperature Map	131
July Temperature Map	131
Annual Range of Temperatures	133
Air Temperature and the Human Body	133
FUTURE TEMPERATURE TRENDS	136
Global Warming	137
Global Cooling	140
SUMMARY	141
Key Terms	142
Review Questions	142
Suggested Readings	143
FOCUS STUDY 5-1	<i>Temperature Concepts, Terms, and Measurements</i> 121

6 Atmospheric and Oceanic Circulations _____ **145**

WIND ESSENTIALS	146
Wind: Description and Measurement	148
Global Winds	150
DRIVING FORCES WITHIN THE ATMOSPHERE	151
Pressure Gradient Force	151
Coriolis Force	152
Friction Force	153
ATMOSPHERIC PATTERNS OF MOTION	154
Primary High-Pressure and Low-Pressure Areas	155
Upper Atmospheric Circulation	161
Global Circulation Model	163
Local Winds	164
OCEANIC CURRENTS	169
Deep Currents	170
SUMMARY	171
Key Terms	172
Review Questions	172
Suggested Readings	173
FOCUS STUDY 6-1	<i>Wind Power: An Energy Resource</i> 167

PART TWO

The Water, Weather, and Climate System

7 Water and Atmospheric Moisture 177

BEGINNINGS	178		
Quantity Equilibrium	178		
Quality (Composition) Equilibrium	181		
GLOBAL OCEANS AND SEAS	182		
Physical Structure of the Oceans	184		
UNIQUE PROPERTIES OF WATER	184		
Heat Properties	185		
THE HYDROLOGIC CYCLE	188		
A Hydrologic Cycle Model	188		
HUMIDITY	191		
Relative Humidity	191		
Expressions of Relative Humidity	192		
Global Distribution of Relative Humidity	195		
CLOUDS AND FOG	196		
Cloud Formation Processes	196		
Cloud Types and Identification	197		
Fog	201		
SUMMARY	204		
Key Terms	205	Review Questions	205
		Suggested Readings	206

8 Weather 209

ATMOSPHERIC STABILITY	210		
Adiabatic Processes	210		
Stable and Unstable Atmospheric Conditions	211		
AIR MASSES	212		
Air Masses Affecting North America	214		
Air Mass Modification	215		
ATMOSPHERIC LIFTING MECHANISMS	216		
Convective Lifting	216		
Orographic Lifting	217		
Frontal Lifting	219		
MIDLATITUDE CYCLONIC SYSTEMS	221		
Cyclogenesis: The Birth of a Cyclone	222		
Occluded Fronts and a Dissolving Cyclone	223		
Daily Weather Map and the Midlatitude Cyclone	224		
VIOLENT WEATHER	224		
Thunderstorms	225		
Tornadoes	228		
Tropical Cyclones	232		

SUMMARY	238			
Key Terms	239	Review Questions	240	Suggested Readings
FOCUS STUDY 8-1	<i>Hurricane Camille, 1969: Disaster and Benefit</i>			241
				236

9 Water Balance and Water Resources 243

THE WATER-BALANCE CONCEPT	244			
The Water-Balance Equation	244			
Sample Water Balances	250			
Water Management: An Example	252			
GROUNDWATER RESOURCES	254			
Groundwater Description	255			
Groundwater Utilization	257			
Pollution of the Groundwater Resource	261			
DISTRIBUTION OF STREAMS	261			
OUR WATER SUPPLY	264			
Daily Water Budget	264			
Future Considerations	266			
SUMMARY	267			
Key Terms	267	Review Questions	268	Suggested Readings
FOCUS STUDY 9-1	<i>Ogallala Aquifer Overdraft</i>			269
				259

10 Global Climate Systems 271

CLIMATE SYSTEM COMPONENTS	272			
Radiation, Temperature, Pressure, and Air Masses	273			
Precipitation Input	273			
Developing Climate Models	277			
CLASSIFICATION OF CLIMATIC REGIONS	278			
The Köppen Classification System	278			
Tropical A Climates	279			
Mesothermal C Climates	286			
Microthermal D Climates	291			
Polar Climates	296			
Dry Arid and Semiarid Climates	297			
FUTURE CLIMATE PATTERNS	300			
Consequences of Climatic Warming	302			
SUMMARY	304			
Key Terms	305	Review Questions	305	Suggested Readings
FOCUS STUDY 10-1	<i>The El Niño Phenomenon</i>			306
				274

PART THREE

The Earth-Atmosphere Interface

11 The Dynamic Planet 311

THE PACE OF CHANGE	312		
EARTH'S STRUCTURE AND INTERNAL ENERGY		314	
Earth in Cross Section	314		
GEOLOGIC CYCLE	319		
Rock Cycle	321		
CONTINENTAL DRIFT	331		
A Brief History	331		
Sea-Floor Spreading	332		
Subduction	335		
The Formation and Breakup of Pangaea	335		
PLATE TECTONICS	338		
Plate Boundaries	338		
Hot Spots	341		
SUMMARY	343		
Key Terms	343	Review Questions	344
		Suggested Readings	345
FOCUS STUDY 11-1	<i>Coal: An Important Sedimentary Rock</i>		327

12 Tectonics and Volcanism 347

THE OCEAN FLOOR	348		
EARTH'S SURFACE RELIEF FEATURES		348	
Crustal Orders of Relief	348		
Earth's Topographical Regions	349		
CRUSTAL FORMATION PROCESSES		350	
Continental Crust	350		
Deformation Processes	354		
Orogenesis	359		
World Structural Regions	362		
EARTHQUAKES	362		
Earthquake Essentials	363		
Paleoseismology and Earthquake Forecasting	370		
Earthquake Preparedness and Planning	370		
VOLCANISM	370		
Locations of Volcanic Activity	372		
Types of Volcanic Activity	374		
SUMMARY	379		
Key Terms	381	Review Questions	382
		Suggested Readings	382
FOCUS STUDY 12-1	<i>The 1980 Eruption of Mount Saint Helens</i>		377

13 Weathering, Karst Landscapes, and Mass Movement 385

LANDMASS DENUDATION	386			
Early Hypotheses	386			
Dynamic Equilibrium Approach to Landforms		388		
WEATHERING PROCESSES	390			
Physical Weathering Processes	393			
Chemical Weathering Processes	396			
KARST TOPOGRAPHY AND LANDSCAPES		397		
Caves and Caverns	400			
MASS MOVEMENT PROCESSES	403			
Mass Movement Mechanics	403			
Classes of Mass Movements	404			
Human-Induced Mass Movements	408			
SUMMARY	409			
Key Terms	410	Review Questions	410	Suggested Readings
				411

14 River Systems and Landforms 413

FLUVIAL PROCESSES AND LANDSCAPES	414			
The Drainage Basin System	414			
Streamflow Characteristics	421			
Stream Gradient	426			
Stream Deposition	430			
FLOODS AND RIVER MANAGEMENT	439			
Streamflow Measurement	439			
Additional Flood Considerations	441			
SUMMARY	445			
Key Terms	445	Review Questions	446	Suggested Readings
				447
FOCUS STUDY 14-1	<i>Floodplain Management Strategies</i>		442	

15 Eolian Processes and Arid Landscapes 449

THE WORK OF WIND	450			
Eolian Erosion	451			
Eolian Transportation	452			
Eolian Depositional Landforms	454			
Loess Deposits	459			
OVERVIEW OF DESERT LANDSCAPES	461			
Desert Fluvial Processes	462			
Desert Landscapes	463			
SUMMARY	472			
Key Terms	473	Review Questions	473	Suggested Readings
				474
FOCUS STUDY 15-1	<i>The Colorado River: A System Out of Balance</i>		465	

16 Coastal Processes and Landforms 477

COASTAL SYSTEM COMPONENTS	478		
Inputs to the Coastal System	478		
The Coastal Environment	478		
COASTAL SYSTEM ACTIONS	480		
Tides	480		
Waves	483		
Sea Level Changes	486		
COASTAL SYSTEM OUTPUTS	487		
Erosional Coastal Processes and Landforms	487		
Depositional Coastal Processes and Landforms	488		
Emergent and Submergent Coastlines	493		
Organic Processes: Coral Formations	493		
Salt Marshes and Mangrove Swamps	496		
HUMAN IMPACT ON COASTAL ENVIRONMENTS	498		
Marco Island, Florida: An Example of Impact	498		
SUMMARY	502		
Key Terms	503	Review Questions	503
		Suggested Readings	504
FOCUS STUDY 16-1	<i>An Environmental Approach to Shoreline Planning</i>		500

17 Glacial and Periglacial Processes and Landforms 507

RESERVOIRS OF ICE	508		
Types of Glaciers	508		
GLACIAL PROCESSES	511		
Formation of Glacial Ice	513		
Glacial Mass Balance	513		
Glacial Movement	513		
GLACIAL LANDFORMS	517		
Erosional Landforms Created by Alpine Glaciation	517		
Depositional Landforms Created by Alpine Glaciation	520		
Erosional and Depositional Features of Continental Glaciation	522		
PERIGLACIAL LANDSCAPES	524		
Permafrost	524		
Ground Ice and Frozen Ground Phenomena	527		
Humans and Periglacial Landscapes	530		
THE PLEISTOCENE ICE AGE EPOCH	530		
Pluvial Lakes (Paleolakes)	534		
ARCTIC AND ANTARCTIC REGIONS	538		
The Antarctic Ice Sheet	539		
SUMMARY	540		
Key Terms	540	Review Questions	541
		Suggested Readings	542
FOCUS STUDY 17-1	<i>Deciphering Past Climates: Paleoclimatology</i>		535

PART FOUR

Soils, Ecosystems, and Biomes

18 The Geography of Soils _____ 547

SOIL CHARACTERISTICS	548		
Soil Profiles	548		
Soil Horizons	548		
Soil Properties	550		
Soil Chemistry	554		
Soil Formation Factors and Management	555		
SOIL CLASSIFICATION	556		
A Brief History of Soil Classification	557		
Diagnostic Soil Horizons	558		
The Eleven Soil Orders of Soil Taxonomy	559		
THE CANADIAN SYSTEM OF SOIL CLASSIFICATION (CSSC)	576		
Categories of Classification In the CSSC	576		
Soil Horizons	578		
The Nine Soil Orders of the CSSC	578		
SUMMARY	578		
Key Terms	581	Review Questions	582
		Suggested Readings	583
FOCUS STUDY 18-1	<i>Selenium Concentrations in Western Soils</i>		568

19 Ecosystem Essentials _____ 585

ECOSYSTEM COMPONENTS AND CYCLES	586		
Communities	588		
Plants: The Essential Biotic Component	588		
Abiotic Ecosystem Components	592		
Biotic Ecosystem Operations	599		
STABILITY AND SUCCESSION	603		
Ecosystem Stability	603		
Ecological Succession	606		
SUMMARY	611		
Key Terms	613	Review Questions	613
		Suggested Readings	614
FOCUS STUDY 19-1	<i>Fire Ecology and Succession</i>		609

20 Terrestrial Biomes _____ 617

BIOGEOGRAPHICAL REALMS	618		
Aquatic Ecosystems	620		
Terrestrial Ecosystems	620		
EARTH'S MAJOR TERRESTRIAL BIOMES	623		
Equatorial and Tropical Rain Forest	623		
Tropical Seasonal Forest and Scrub	631		
Tropical Savanna	635		
Midlatitude Broadleaf and Mixed Forest	636		
Northern Needleleaf Forest and Montane Forest	638		
Temperate Rain Forest	639		
Mediterranean Shrubland	640		
Midlatitude Grasslands	641		
Desert Biomes	642		
Arctic and Alpine Tundra	645		
SUMMARY	646		
Key Terms	647	Review Questions	647
Suggested Readings	648		
FOCUS STUDY 20-1	<i>Biodiversity and Biosphere Reserves</i>		632

21 The Human Denominator _____ 651

AN OILY DUCK	653		
The Larger Picture	654		
GAIA HYPOTHESIS	656		
THE NEED FOR INTERNATIONAL COOPERATION	657		
WHO SPEAKS FOR EARTH?	661		
Review Questions	663	Suggested Readings	663
FOCUS STUDY 21-1	<i>Earth Summit 1992</i>		658

APPENDIX A Climate and Water-Balance Data _____ A.1

APPENDIX B Information Sources, Organizations,
and Agencies _____ A.10

APPENDIX C Weather Map: April 2, 1988 _____ A.13

GLOSSARY _____ G.1

INDEX _____ I.1
