

PROCEEDINGS OF THE INTERNATIONAL SYMPOSIUM ON GROUND
FREEZING AND FROST ACTION IN SOILS
LULEÅ/SWEDEN/15-17 APRIL 1997

Ground Freezing 97

Frost Action in Soils

Edited by

SVEN KNUTSSON

Luleå University of Technology, Sweden

A. A. BALKEMA / ROTTERDAM / BROOKFIELD / 1997

Table of contents

Preface	XI
Organisation	XII
1 ISSMFE work group reports	
Related effects on frost action: Freezing and solar radiation indices <i>M. Dysli, V. Lunardini & L. Stenberg</i>	3
Preliminary results of frost heave experiments using standard test sample provided by TC8 <i>M. Fukuda, H.-S. Kim & Y.-C. Kim</i>	25
Estimation of frost heave and thaw weakening by statistical analyses and physical models <i>K. Kujala</i>	31
Mechanical properties data base for ground freezing applications <i>B. Ladanyi</i>	43
Field and laboratory methods for determining deformation properties in thawing soils <i>S. Saarelainen</i>	53
2 Heat and mass transfer in freezing and thawing soils and rock	
Winter earthworks in seasonal freezing regions ought to become an accepted construction method – Frost heaving accelerates the consolidation of filling materials <i>S. Akagawa, Y. Sakai & H. Ohnuki</i>	65
Thermal interaction of petroleum wells with frozen rocks: The new solution of the problem <i>E.A. Bondarev</i>	73
Long-term results of testing of foam cover for remediation of degraded permafrost <i>V.N. Feklistov & V.P. Melnikov</i>	77
The formation of massive ice in permafrost <i>A.C. Fowler & C.G. Noon</i>	81
Ice formation in freezing grounds <i>V.N. Golubev</i>	87

Applied aspects of the rigid-ice model <i>J.B.Gorelik, V.S.Kolunin & A.K.Reshetnikov</i>	93
General thermomechanical model of freezing soil with numerical application <i>J.Hartikainen & M.Mikkola</i>	101
Heat transfer in artificial ground freezing <i>J.T.Holden</i>	107
Hypothesis on the mechanism of 'salt-frost scaling' of porous, brittle building materials <i>S.Lindmark</i>	113
Prediction of temperature regime of roadbed on permafrost considering unsteady water filtration <i>Liu Jiankun, Wu Ziwang & Ma Wei</i>	121
Thawing of frozen soil with a linearly increasing surface temperature <i>V.J.Lunardini</i>	127
A macroscopic frost heave theory – Coupling equations and criteria for creation of new ice lens <i>Y.Miyata</i>	131
A mathematical model called M_1 and the Gilpin model of soil freezing <i>Y.Nakano</i>	139
Freeze-thaw effect on soil-bentonite mixtures <i>O.Ravaska & K.Kujala</i>	147
Freeze-thaw indices in northernmost Fennoscandia according to meteorological observations, 1980-1991 <i>M.Seppälä & S.Hassinen</i>	153
Dependence of unfrozen water quantity on total moisture content <i>E.G.Starostin & A.M.Timofeev</i>	161
Characteristics of the soil-structures of frozen soils <i>A.Sugita, T.Ishizaki & M.Fukuda</i>	165
Microstructure of freezing front in freezing soils <i>K.Takeda & A.Okamura</i>	171
Some recent mathematical results on the problem of soil freezing <i>F.Talamucci</i>	179
Experimental study on microstructure near freezing front during soil freezing <i>K.Watanabe, M.Mizoguchi, T.Ishizaki & M.Fukuda</i>	187
Permeability changes in a fine-grained till due to cycles of freezing and thawing <i>P.Viklander & S.Knutsson</i>	193
Essential characteristics of frozen fringe and determination of its parameters <i>Xu Xiaozu, Wu Ziwang, T.Ishizaki, M.Fukuda, E.M.Chuvilin & E.D.Ershov</i>	203
Dynamic investigation of mass transfer in freezing soil with computer tomograph <i>Zhang Lixin, Pu Yibin, Liao Quanrong & Gu Tongxin</i>	209

Study of convection in liquid seasonal cooling devices in the warm period of a year <i>R.V.Zhang</i>	213
Effects of cooling rate on frost action in closed system <i>Q.Zhu & S.Ogawa</i>	217
3 Frost susceptibility and frost heave	
Capillary rise of water in geotextiles <i>K.S.Henry & R.D.Holtz</i>	227
Suction characteristics and frost heave of cohesive soils <i>R.H.Jones & H.U.Baba</i>	235
Test construction of frost blanket using lime-stabilized soil <i>S.-i.Kawabata, M.Kamiya & M.Ohsawa</i>	241
Frost control – Design, construction and monitoring of TPPT test roads <i>H.Kivikoski & H.Mäkelä</i>	247
Displacement of shallow foundation by the effect of frost heaving forces <i>A.V.Musorin</i>	255
Frost heave analysis by finite element method <i>T.Okamoto, Y.Miyata & Y.Minami</i>	259
Use of geotextiles in formation of capillary break structures <i>S.Saarelainen & G.Werner</i>	267
Sod peat as frost protection in road structure <i>S.Salmenkaita & K.Kujala</i>	273
Frozen heaving of large dispersed soiled system of Zabaikalje <i>D.M.Shesternyov</i>	281
Validation of the VTI frost heave model <i>L.Stenberg & Å.Hermansson</i>	289
Effect of geotextiles as capillary breaks on frost heave reduction <i>F.Tsuchiya, O.Tsuji & S.Yokota</i>	293
A comparison between measured and calculated frost heave, frost penetration and formation of ice lenses <i>L.Vikström</i>	297
The Swedish National Road Administration's frost damage prevention program <i>HA.Wirstam</i>	307
4 Mechanical properties of frozen, thawed and thawing soils and rock	
Constitutive relation of saturated frozen silt in torsion <i>He Ping, Zhu Yuanlin, Xian Cunde & Zhang Zhao</i>	313

Cryogenical alterations of fabric and shear strength of clayey soils <i>M.Hohmann-Porebska & K.A.Czurda</i>	317
Failure criterion of unsaturated soils subjected to freezing and thawing <i>T.Nishimura, K.Tukada, S.Ogawa & T.Momoi</i>	327
Computer controlled triaxial freeze-thaw-shear apparatus <i>T.Ono & T.Mitachi</i>	335
Deformation properties of frozen soil under sine-varying temperature <i>Sheng Yu, Wu Ziwang, Chang Xiaoxiao & Ma Wei</i>	341
Determination of failure time in the creep of frozen soil subjected to varying stress <i>Sheng Yu, Wu Ziwang & Ma Wei</i>	345
Adfreezing frost heave force on concrete structures in natural ground <i>T.Suzuki, S.Sawada & S.Yamashita</i>	349
Effect of pendulum speed on impact toughness of frozen soil <i>Yu Qihao, Zhu Yuanlin, Zhang Jianmin & He Ping</i>	355
Experimental study on torsion test of frozen loess <i>Zhang Jianming, Peng Wanwei & Zhang Changqing</i>	361
A necessary medium for the study of extremely deep shaft-freezing technique A development of TYJ-200 triaxial high-pressure testing machine specially for frozen soils <i>Zhang Yunli, Xu Bingzhuang & Li Kun</i>	365

5 Environmental soil freezing

The study of the ionic permeability of frozen soils and ice <i>E.M.Chuvilin & O.G.Smirnova</i>	371
Frozen soil barriers for hazardous waste confinement <i>J.G.Dash, H.Y.Fu & R.Leger</i>	375
Interaction of oil with frozen soils <i>E.D.Ershov, E.M.Chuvilin, O.G.Smirnova & N.S.Naletova</i>	381
Particularities of frozen saline soils electric and elastic properties <i>A.D.Frolov, O.P.Chervinskaya & Y.D.Zykov</i>	385
Water migration during gas hydrate formation in porous media <i>V.P.Melnikov & A.N.Nesterov</i>	391
Redistribution of ions close to the growing ice inclusions <i>V.Ostroumov</i>	397
A case of adopting soil freezing for environmental protection <i>M.Shiina, T.Kashiwagi & Y.Kitamura</i>	401
Salt expansion and frost heave of freezing saline soils <i>Xu Xiaozu, Wang Jiacheng, Zhang Lixin & Deng Yousheng</i>	407

6 Engineering design	
On the heat exchange of freeze pipe with liquid nitrogen in ground freezing <i>Chen Ruijie, Zhu Linnan & Wu Chunzhi</i>	417
Deformation of a retaining wall by ground freezing <i>L.S.Danyluk & S.A. Ketcham</i>	421
Experiments applying tire chips as frost insulation in concrete-channels <i>H. Kubo</i>	427
The deformable freeze pipe <i>Lou Genda, Wang Zhengting, Li Changzhong, Wang Jiangping & Zhou Xiaomin</i>	433
Calculation on the thickness of artificially frozen wall for supporting deep base pit <i>Ma Wei, Wu Ziwang, Xu Xiaozu, He Chunxiong & Sheng Yu</i>	439
Sill pillar mining beneath frozen fill <i>P.-I. Marklund & P.-O. Andersson</i>	445
Viscoelastic calculation on displacement and stress distribution in artificially frozen wall <i>Niu Yonghong, Zhang Changqing & Zhang Jianming</i>	455
Icicle and frost heave prevention by adiabatic treatment in existing tunnel <i>K. Okada & T. Fujii</i>	461
Technology of rock protection from freezing out in mining gold placer deposits of Siberia <i>A.V. Rashkin, M.V. Kostromin & K.I. Karasyov</i>	469
Some problems in foundation engineering on permafrost in connection with global climatic changes <i>A.V. Sadovsky, N.B. Kutvitskaja, G.I. Bondarenko & V.I. Grebenetz</i>	473
Discrete element modelling of pipe uplift in frozen soil regimes <i>A.P.S. Selvadurai & K. Sepehr</i>	479
Effect of intensified freezing process on deformation control of ice wall <i>Wang Jianping, Yu Xiang, Lou Genda & Zhou Xiaomin</i>	487
Large-scale model test on the artificial freezing of foundation with liquid nitrogen <i>Zhu Linnan, Chen Ruijie & Wu Chunzhi</i>	491
7 Case histories	
An artificial ice plug for a hydro tunnel <i>A.-L. Berggren & A. Sandvold</i>	499
Applications of artificial ground-freezing with liquid nitrogen (LIN)/new control hardware <i>A. Buinger</i>	503
Application of AGF to Shanghai Metro 1 [#] line construction <i>Chen Xiangsheng, Liu Jianhang, Zhu Husheng, Bai Tinghui & Ge Shiping</i>	509
Application of freezing method for widening an existing tunnel <i>H. Katayama, M. Joushima, M. Tanaka, K. Tanaka, T. Tsuji & T. Usui</i>	513

Application of staggered freezing method to shaft sinking in Jining No. 3 coal mine <i>Peng Lianhai & Su Lifan</i>	519
Problem of lining failure in freeze shafts after construction <i>Su Lifan, Zhou Xiaomin, Lou Genda & Li Changzhong</i>	525
Application of ground freezing technique in Lianghuai coal mine area of China <i>Zhang Wen & Pang Rongqing</i>	531
Application of freezing method to brace a foundation pit <i>Zhou Xiaomin, Su Lifan, Zhang Yunli, Xu Binzhuang, Lou Genda, Wang Jianpin, Liu Jianhang & Bai Tinghui</i>	537
Availability of ISGF-papers	541
Availability of papers in Frost in Geotechnical Engineering	543
Author index	545
