## HILLSLOPE MATERIALS AND PROCESSES

Second Edition

## M. J. Selby

with a contribution by A. P. W. Hodder

Oxford University Press · Oxford

## Contents

	Symbols used	xiii
1.	INTRODUCTION	1
	Complexity in hillslope evolution	1
	Practical value of hillslope studies	2
	Hillslope systems	2
	Energy available for hillslope	
	processes	4
	Plan of the book	5
2.	BONDS	6
	States of matter	6
	Types of bonds	6
	Ionic bonding	7
	Covalent bonding	7
	Metallic bonding	7
	van der Waals forces	7
	Hydrogen bonding and the structure	
	of water	8
	Crystalline solids	9
	Chemical reactions	9
3.	PARTICLES AND FABRICS OF	
	SOIL AND WEAK SEDIMENTS	11
	Particle size	11
	Origins of particles	12
	Clay minerals	13
	Phyllosilicate mineral structures	13
	Structural units	14
	Characteristics	14
	Formation of phyllosilicate clays	16
	Short-range order aluminosilicates	17
	Oxide clays	18
	Clays, climate, and drainage	18
	Adsorbed water	18
	Electric double layer	19
	Electric charges	20
	Fabric of clays in sedimentary rocks	21
	Class in weak rocks	21

	Mudrock fabrics	21 23
	Unloading	23
	Structure in pedogenetic soils Fabric of coarse-grained soils	24
	Fabric of coarse-gramed sons	25
4.	STRESS, STRAIN, AND RHEOLOGY OF MATERIALS	27
	Definitions	27
	Force and stress	27 27
	Strain	27
	Strength	27
	Rheology Elastic behaviour	27
		30
	Viscosity Plasticity	30
	Mixed behaviour	30
	Rheology of rock	31
	Rheology of soils and weak sediments	33
	Time-dependent behaviour of earth	55
	materials	34
	Moduli of elasticity	35
	Strain energy and fractures	37
	Fractures in rock	38
	Stresses in the upper crust	40
	Residual stresses	40
	Gravitational stresses	41
	Tectonic stresses	42
	Thermal stresses	42
	Finite-element stress analyses	42
	Examples of finite-element analyses	43
5.	STRENGTH OF EARTH	
	MATERIALS	49
	Definitions	49
	Strength	49
	Rock and soil	49
	Problems of strength measurements	50
	Shear strength parameters	50
	Cohesion	51

## x Contents

	Examples of cohesive effects	53
		54
	Apparent cohesion	54
	Friction	
	Friction angle	56
	The Coulomb equation	57
	Water and shear strength	57
	Measurement of soil and weak rock	
	strength	59
	Laboratory tests	59
	Soil shear box tests	60
	Triaxial compression tests	63
	Effective stress analyses	68
	Appropriate parameter	68
	Variation of $c$ and $\phi$	68
	Field measurements of soil strength	69
	Strength of intact rock	70
	Unconfined compressive strength test	71
	Rock deformation in compression	72
	Tensile strength test	73
	Triaxial tests	74
	Shear strength of intact rock	75
	Shear testing dies for a uniaxial	
	machine	75
	Determination of shear strength	75
	Water and rock strength	76
	Field measurements of intact rock	10
	strength	77
	strength Dynamic measures of elasticity	77 82
6	Dynamic measures of elasticity	82
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b>	82 <b>84</b>
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b> Joints and other partings	82 <b>84</b> 84
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b> Joints and other partings Shear strength of partings in rock	82 <b>84</b> 84 87
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b> Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces	82 <b>84</b> 84 87 87
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b> Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength	82 <b>84</b> 87 87 90
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b> Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings	82 84 87 87 90 93
6.	Dynamic measures of elasticity <b>PROPERTIES OF ROCK MASSES</b> Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength	82 84 87 87 90 93 94
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters	82 84 84 87 87 90 93 94 94
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength	82 84 84 87 87 90 93 94 94 94
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering	82 84 84 87 87 90 93 94 94 94 94
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass	82 84 87 87 90 93 94 94 94 94 94
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass Orientation of joints	82 84 87 90 93 94 94 94 94 95 97
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass Orientation of joints Width, or aperture, of joints	82 84 87 90 93 94 94 94 94 94 95 97 99
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass Orientation of joints Width, or aperture, of joints Continuity and infill of joints	82 84 84 87 90 93 94 94 94 94 94 95 97 99 100
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass Orientation of joints Width, or aperture, of joints Continuity and infill of joints Groundwater	82 84 87 90 93 94 94 94 94 94 95 97 99
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass Orientation of joints Width, or aperture, of joints Continuity and infill of joints Groundwater Unified classification and rating of	82 84 87 87 90 93 94 94 94 94 94 95 97 99 100 101
6.	Dynamic measures of elasticity PROPERTIES OF ROCK MASSES Joints and other partings Shear strength of partings in rock Shear strength of joint wall surfaces Measurement of joint shear strength Effective stresses along partings Rock-mass strength Classification parameters Intact strength Weathering Spacing of partings within a rock mass Orientation of joints Width, or aperture, of joints Continuity and infill of joints Groundwater Unified classification and rating of parameters	82 <b>84</b> 87 87 90 93 94 94 94 94 94 95 97 99 100 101 101
