# Contents

Preface	page	iv
Acknowledgments		vii
List of tables		x
Contributors		xii
 <i>Part I: General</i>		
1 Rates of surface processes and denudation <i>Anthony Young and Ian Saunders</i>		3
 <i>Part II: Hydraulic processes</i>		
2 Evaluation of Horton's theory of sheetwash and rill erosion on the basis of field experiments <i>Thomas Dunne and Brian F. Aubry</i>		31
3 Erosion processes and sediment properties for agricultural cropland <i>L. D. Meyer</i>		55
4 Plant cover effects on hillslope runoff and erosion: evidence from two laboratory experiments <i>R. P. C. Morgan, H. J. Finney, H. Lavee, Elaine Merritt, and Christine A. Noble</i>		77
5 Sediment movement in ephemeral streams on mountain slopes, Canadian Rocky Mountains <i>James S. Gardner</i>		97
6 Sediment movement and storage on alpine slopes in the Colorado Rocky Mountains <i>T. Nelson Caine</i>		115
7 Solute movement on hillslopes in the alpine environment of the Colorado Front Range <i>John C. Dixon</i>		139
8 Hillslope hydrology models for forecasting in ungauged watersheds <i>M. G. Anderson and S. Howes</i>		161
9 Hillslope runoff processes and flood frequency characteristics <i>Keith Beven</i>		187

10	A two-dimensional simulation model for slope and stream evolution <i>M. J. Kirkby</i>	203
<i>Part III: Gravitational processes</i>		
11	Controls on the form and development of rock slopes in fold terrane <i>B. P. Moon</i>	225
12	Influence of scree accumulation and weathering on the development of steep mountain slopes <i>I. Statham and S. C. Francis</i>	245
13	Flow behavior of channelized debris flows, Mount St. Helens, Washington <i>Thomas C. Pierson</i>	269
14	Dynamics of slow landslides: a theory for time-dependent behavior <i>Richard M. Iverson</i>	297
15	The morphology and mechanics of large-scale slope movement, with particular reference to southwest British Columbia <i>Michael J. Bovis</i>	319
16	Processes leading to landslides in clay slopes: a review <i>R. J. Chandler</i>	343
17	Hollows, colluvium, and landslides in soil-mantled landscapes <i>William E. Dietrich, Cathy J. Wilson, and Steven L. Reneau</i>	361
18	Relative slope-stability mapping and land-use planning in the San Francisco Bay region, California <i>Tor. H. Nilsen</i>	389
	Index	414
