

NON-LINEAR VARIABILITY IN GEOPHYSICS

Scaling and Fractals

Ch. 1 - Z. K. GEORGIOU	1
Ch. 2 - B. L. FRIEDMAN	13
Ch. 3 - S. A. PASMANIK	31
Ch. 4 - S. SCHERTZER, S. LOVEJOY	41
Ch. 5 - C.W. VAN YATTA & P. DODD	83

2 - DATA ANALYSIS TECHNIQUES

edited by

D. SCHERTZER

EERM/CRMD, Météorologie Nationale, Paris, France

and

S. LOVEJOY

Physics Department, McGill University, Montreal, Canada

Ch. 6 - C. ESSEX	91
Ch. 7 - D. LAVALLÉE, B. SCHUBERT	92
Ch. 8 - S. LOVEJOY	141
Ch. 9 - J. MARZT	145
Ch. 10 - L.R. AUSTIN	157
Ch. 11 - A.A. TSONIS, A. A. J. J. J.	167
Ch. 12 - V.K. GUPTA, B. WAYMAN	173
Ch. 13 - J. WILFONG, D. P. J.	183
Ch. 14 - J. HURST, J. J.	209

3 - MODELING AND ANALYSIS OF THE CLIMATE, OCEANS AND OF SOLID EARTH GEOPHYSICS

Ch. 15 - K.E. CLAHAN	217
Ch. 16 - G.O. JENSEN, P. THOMASCHUK, D.J. CHESLEY, M. CHRISTIE	227
Ch. 17 - P. LAJOY, S. LOVEJOY, D. SCHERTZER	241
Ch. 18 - H.M. MERIDIANO, T. LUXEMAN, C. ESSEX	251
Ch. 19 - W. PUEBE	267
Ch. 20 - P. THOMASCHUK, G.O. JENSEN	281
Ch. 21 - S. VAN YATTA, C. J.	287

4 - FURTHER READING

Ch. 22 - A. CATALAN	284
Ch. 23 - Y. TAYLOR	297
Ch. 24 - J. J.	303

KLUWER ACADEMIC PUBLISHERS
DORDRECHT / BOSTON / LONDON

TABLE OF CONTENTS

Preface	vii
1 - TURBULENCE AND GEOPHYSICAL FLUID DYNAMICS	
Ch. 1 - H.-R. CHO Energy spectrum and intermittency of semi-geostrophic flow	3
Ch. 2 - E. LEVICH, L. SHTILMAN Helicity fluctuations and coherence in developed turbulence	13
Ch. 3 - R.A. PASMANTER Deterministic diffusion, effective shear and patchiness in tidal flows	31
Ch. 4 - D. SCHERTZER, S. LOVEJOY Scaling nonlinear variability in geodynamics: Multiple singularities, observables, universality classes	41
Ch. 5 - C.W. VAN ATTA, K. PODDAR Scaling and structure functions in shear flows	83
2 - DATA ANALYSIS TECHNIQUES	
Ch. 6 - C. ESSEX Correlation dimension and data sample size	93
Ch. 7 - D. LAVALLEE, D. SCHERTZER, S. LOVEJOY On the determination of the codimension function	99
Ch. 8 - S. LOVEJOY, D. SCHERTZER Multifractal analysis techniques and the rain and cloud fields from 10^{-3} to 10^6 m	111
Ch. 9 - L. MAHRT Eigen-structure of eddies; continuous weighting versus conditional sampling	145
3 - MODELING AND ANALYSIS OF CLOUDS, RAIN, AND OTHER ATMOSPHERIC FIELDS	
Ch. 10 - L.B. AUSTIN, G.L. AUSTIN, P.H. SCHUEPP, A. SAUCIER Atmospheric boundary layer variability and its implications for CO ₂ flux measurements	157
Ch. 11 - A.A. TSONIS A fractal study of dielectric breakdown in the atmosphere	167
Ch. 12 - V.K. GUPTA, E. WAYMIRE On lognormality and scaling in spatial rainfall averages?	175
Ch. 13 - J. WILSON, D. SCHERTZER, S. LOVEJOY Physically based rain and cloud modeling	185
Ch. 14 - P. HUBERT, J.P. CARBONNEL Fractal characterization of intertropical precipitation variability and anisotropy	209
4 - MODELING AND ANALYSIS OF THE CLIMATE, OCEANS AND IN SOLID EARTH GEOPHYSICS	
Ch. 15 - R.E. GLAZMAN Fractal nature of surface geometry in a developed sea	217
Ch. 16 - O.G. JENSEN, J.P. TODOESCHUCK, D.J. CROSSLEY, M. GREGOTSKI Fractal linear models of geophysical processes	227
Ch. 17 - P. LADOY, S. LOVEJOY, D. SCHERTZER Extreme variability of climatological data: Scaling and intermittency	241
Ch. 18 - M.A.H. NERENBERG, T. LOOKMAN, C. ESSEX On the existence of low dimensional climatic attractors	251
Ch. 19 - W. PERRIE The third generation WAM models for wind-generated ocean waves	257
Ch. 20 - J.P. TODOESCHUCK, O.G. JENSEN 1/f geology and seismic deconvolution	261
Ch. 21 - R. VISWANATHAN, C. WEBER, P. GIBART The stochastic coherence and the dynamics of global climate models and data	269
5 - REMOTE SENSING	
Ch. 22 - R.F. CAHALAN Landsat observations of fractal cloud structure	281
Ch. 23 - J.-I. YANO, Y. TAKEUCHI Fractal dimension analysis of horizontal cloud pattern in the intertropical convergence zone	297
Ch. 24 - A. DAVIS, S. LOVEJOY, D. SCHERTZER Radiative transfer in multifractal clouds	303
