# Contents

<b>List of contributors</b>	vii
<b>Preface</b>	ix
<b>1 The climate system in the recent geological past</b>	1
N. J. Shackleton	
<b>2 The use of climate response surfaces to reconstruct palaeoclimate from Quaternary pollen and plant macrofossil data</b>	7
Brian Huntley	
<i>Discussion:</i> R. A. SPICER, W. G. CHALONER, E. A. JARZEMBOWSKI	12
<b>3 Sedimentary facies as indicators of Mesozoic palaeoclimate</b>	17
B. W. Sellwood and G. D. Price	
<i>Discussion:</i> N. J. SHACKLETON, J. FRANCIS	25
<b>4 Palaeowind: geological criteria for direction and strength</b>	27
J. R. L. Allen	
<i>Discussion:</i> J. T. PARRISH	34
<b>5 Fossils and fossil climate: the case for equable continental interiors in the Eocene</b>	35
Scott L. Wing and David R. Greenwood	
<b>6 Water vapour, CO<sub>2</sub> and insolation over the last glacial–interglacial cycles</b>	45
A. Berger, C. Tricot, H. Gallée and M. F. Loutre	
<b>7 A brief discussion of the history, strengths and limitations of conceptual climate models for pre-Quaternary time</b>	55
Judith Totman Parrish	
<b>8 Modelling of palaeoclimates: examples from the recent past</b>	59
John F. B. Mitchell	
<b>9 Cretaceous phytogeography and climate signals</b>	69
Robert A. Spicer, Peter McA. Rees and Jenny L. Chapman	
<i>Discussion:</i> E. A. JARZEMBOWSKI, D. CANTRILL	77
<b>10 Jurassic climates as inferred from the sedimentary and fossil record</b>	79
A. Hallam	
<i>Discussion:</i> J. A. CRAME, M. O. MANCEÑO, J. FRANCIS, J. T. PARRISH	88
<b>11 Early Mesozoic phytogeography and climate</b>	89
Alfred M. Ziegler, J. Michael Parrish, Yao Jiping, Eric D. Gyllenhaal, David B. Rowley, Judith Totman Parrish, Nie Shangyou, Andrew Bekker and Michael L. Hulver	
<b>12 Model simulations of Cretaceous climates: the role of geography and carbon dioxide</b>	99
Eric J. Barron, Peter J. Fawcett, David Pollard and Stanley Thompson	
<i>Discussion:</i> A. BERGER, P. J. VALDES	108
<b>13 Atmospheric general circulation models of the Jurassic</b>	109
Paul Valdes	
<b>14 Simulation of Late Permian climate and biomes with an atmosphere–ocean model: comparisons with observations</b>	119
J. E. Kutzbach and A. M. Ziegler	

15 The role of palaeoclimate studies: modelling 133  
B. J. Hoskins

16 The role of palaeoclimate studies: geological indicators 135  
A. Hallam
