

Proceedings of the
27th International Geological Congress
Moscow 4-14 August 1984

Volume 2

PALAEONTOLOGY

The Organizing Committee is pleased to acknowledge the efforts of all of the participating scientists in helping to organize these proceedings.

VNU SCIENCE PRESS

Utrecht, The Netherlands
1984

CONTENTS

Preface	v
Paleontological aspects of biomineralization	
I. S. Barskov	1
The pattern of Phanerozoic community evolution	
A. J. Boucot	13
Evolutionary, geographic, and ecological aspects of the rise of angiosperms	
J. A. Doyle	23
Fish-tetrapod relationships	
B. G. Gardiner	35
Constructional Morphology and phylogenetic reconstruction	
W. T. Gutmann	45
Comparative analysis of the benthos ecology in ancient basins	
R. Th. Hecker, A. I. Osipova and T. N. Belskaya	53
Ecosystems of the East Baltic Silurian	
D. Kaljo, E. Klaamann and H. Nestor	69
Biomineralization processes and products and the evolution of biomineralization	
H. A. Lowenstam	79
Phylogeny of higher plants and florogenesis	
S. V. Meyen	97

Ultrastructural research on molluscan nacre H. Mutvei	111
Cambrian evolutionary studies: constraints and challenges A. R. Palmer	125
The evolution of ecosystems: main events A. G. Ponomarenko	135
Some aspects of studies on bio- and paleogeography of the Cambrian A. Yu. Rozanov	143
Organic world of the Vendian Period B. S. Sokolov and M. A. Fedonkin	159
Cladistic analysis, morphology and paleontology in reconstruction of vertebrate phylogeny L. P. Tatarinov	171
Global events and evolution O. H. Walliser	183
Early Phanerozoic distribution patterns of some major groups of sessile organisms B. D. Webby	193
The ecosystems of the Jurassic and Early Cretaceous basins in the north of Siberia V. A. Zakharov and B. N. Shurygin	209
