

Mauro Cremaschi

**PALEOSOLS AND VETUSOLS
IN THE CENTRAL PO PLAIN
(NORTHERN ITALY)
a study in Quaternary Geology
and Soil Development**

Consiglio Nazionale delle Ricerche
Centro di Studio
per la Petrografia e la Stratigrafia
delle Alpi Centrali - Milano

CONTENTS

Acknowledgments	13
Riassunto	15
Summary	17
Samenvatting	19
Chapter 1. INTRODUCTION	23
1.1. The paleosols in Quaternary Geology	23
1.2. The paleosols of the Po plain; the «Ferretto»	27
1.3. The aims of the study	28
1.4. Methods	29
1.4.1. <i>Field and Laboratory techniques</i>	29
1.4.2. <i>Geochronometric markers</i>	30
Chapter 2. GENERAL ASPECTS OF THE AREA	33
2.1. Main climatic characteristics	33
2.1.1. <i>The paleoclimates</i>	33
2.1.2. <i>The present climate of the area</i>	37
2.1.3. <i>The moisture and temperature regime of the soils</i>	40
2.2. Geological outline	40
2.2.1. <i>The Prequaternary Geology</i>	40
2.2.2. <i>Main tectonic data</i>	42
Chapter 3. PAST RESEARCH ON THE PHYSIOGRAPHY AND QUATERNARY GEOLOGY OF THE AREA AND ITS CONSEQUENCES FOR THIS RESEARCH	45
3.1. Introduction	45
3.2. The Garda area and the Iseo area	47
3.2.1. <i>Geological outline</i>	48
3.2.2. <i>The paleosols</i>	52
3.3. The Adda basin	52
3.3.1. <i>General outline</i>	52
3.3.2. <i>The «Old Diluvium» terrace</i>	54

	3.3.3. The «Middle Diluvium» terrace	56
	3.3.4. The «Recent Diluvium» terrace	56
	3.4. The isolated terraces in the Po plain	56
	3.5. The Apennine fringe	57
	3.6. The loesses in the Po plain	58
	3.7. The present investigations	58
Chapter 4.	QUATERNARY DEPOSITS, VETUSOLS AND PALEOSOLS IN THE GARDA AREA	61
	4.1. The stratigraphic sequence and the paleosols of the Gavar- do quarry	61
	4.2. The stratigraphic sequence of the Ciliverghe hill	68
	4.3. The stratigraphic sequence of the Castenedolo hill	74
	4.4. The Chiese sequence	79
	4.5. The vetusols and loess at the top of the Chiese sequence ...	84
	4.6. The stratigraphic sequence of Val Sorda and the paleosol developed in the moraines of the Sedena glacial stage	89
	4.7. The soils in the moraines of the Solferino stage	95
	4.8. The fluvioglacial plain of the Solferino moraine system	100
	4.9. Discussion on the chronostratigraphy of the Garda system .	103
Chapter 5.	QUATERNARY DEPOSITS, VETUSOLS AND PALEO- SOLS IN THE ADDA AREA	107
	5.1. The «Old Diluvium» terrace	107
	5.2. Observations on the «Old Diluvium» terrace	115
	5.3. The terrace of the «Middle Diluvium»	116
	5.4. The terrace of the «Recent Diluvium»	122
	5.5. The stratigraphic sequence of the Bagaggera basin	123
	5.6. The chronostratigraphy of the Bagaggera basin and of the Adda terraces	138
Chapter 6.	SOILS AND VETUSOLS IN THE TOP OF THE ISOLA- TED TERRACES IN THE PLAIN	143
Chapter 7.	QUATERNARY DEPOSITS, VETUSOLS AND PALEO- SOLS IN THE APENNINE FRINGE	147
	7.1. Stratigraphy of the continental Quaternary deposits, vetu- sols and paleosols	147
	7.2. The vetusols in the top of the Pepe-Apennine fluvial formation	151
	7.3. The terraces of Spezzano and Formigine, the profiles of Tiepido and Rex	156

	7.4. The soils and vetusols mainly developed in the Ghiardo loess	161
	7.5. The soils of the late Pleistocene and Holocene alluvial fans	169
	7.6. Conclusions on the stratigraphy of the Quaternary paleosols, vetusols and continental deposits of the Apennine frin- ge	173
Chapter 8.	GENERAL CORRELATION; MAP OF THE QUATERNA- RY FORMATIONS	179
	8.1. Correlations of the lithostratigraphic and pedostratigraphic units over the whole investigated area	179
	8.2. General concepts of the map	184
	8.3. The structure of the legend	185
	8.4. Description of the mapping units	186
Chapter 9.	INTRODUCTION INTO THE GENESIS AND DEVELOP- MENT OF THE PALEOSOLS AND VETUSOLS	189
	9.1. The pedogenetic phases	189
	9.2. Relevant pedogenetic processes and pedological features ..	191
Chapter 10.	THE PALEOSOLS AND VETUSOLS IN GRAVEL AND IN DIAMICTON	197
	10.1. The parent material	197
	10.2. Characteristics and development of the horizons	197
	10.3. Weathering of the coarse fraction	200
	10.4. Evolution of the fine earth	202
	10.5. Micromorphological characteristics	204
	10.6. Rubefaction and free iron content	207
	10.7. Mineralogical characteristics and cation exchange proper- ties	208
	10.8. Conclusions: the development of the vetusols and paleo- sols in gravel and diamicton	210
Chapter 11.	THE SOILS AND VETUSOLS IN LOESS	215
	11.1. Morphology and micromorphology of the soil horizons .	215
	11.2. Textural characteristics	218
	11.3. Mineralogical and chemical characteristics	218
	11.4. The main soil forming processes in loess	221
Chapter 12.	CONCLUSIONS	227
	12.1 The Quaternary Geology	227

12.2. The soil forming processes	231
12.3. The vetusol concept	234
References	235

APPENDIXES

1. Descriptions of individual profiles	249
1a. Brief descriptions of individual profiles	267
2. Textural and chemical analyses of fine earth and gravel	271
3. X-ray analyses	277
4. Heavy mineral analyses	281
5. Brief micromorphological descriptions	287
6. Map of Quaternary Formations in the Central Po Plain	
7. Prehistoric cultures in Northern Italy from Early Palaeolithic to Neolithic .	303
