Contents

PREFACE v

INTRODUCTION

I. Proportion of Lateritic Surface Covers 1
II. Meanings of the Term 'Laterite' 3
III. Nature of Lateritic Materials 5
IV. Secular Questions 8
V. Plan of the Work 9

Part I
ROOTS OF LATERITIC PROFILES

INTRODUCTION 11

Chapter 1. PARENT ROCKS OF CLIMATIC ALTERATIONS 13

Introduction 13
I. Meteoric or Hydrothermal Alterations: A Badly Enunciated Problem 15
II. Hydrothermal Sericitization of Plagioclases: An Old Debate 18
III. Serpentinization of Peridots 20
IV. Bastization, Steatization and Chloritization of Enstatites 21
V. Uralitization of Pyroxenes 22
VI. Retrometamorphism, Retrodiagenesis and Hydrothermal Alterations 23

Chapter 2. ARENES OR COARSE SAPROLITES: NON-CLIMATIC INTRAMINERAL PARAGENESES 27

Introduction 27
I. Petrography of Arenes or Coarse Saprolites 27
II. Intramineral Sequences 30
III. Mechanisms of Arenization 34
IV. Microscopic Intramineral Equilibria and Macroscopic Equilibria of Climatic Significance 36
V. Coexistence of Intramineral Regimes: Kinetics, Geodynamics and Thermodynamics 39

Part II
CUIRASSED LATERITIC PROFILE

INTRODUCTION 43

Chapter 3. KAOLINITIC LITHOMARGES AND MOTTLED HORIZONS 47

Introduction 47
I. Nomenclature of Zones of Eluviation and Illuviation 48
II. Kaolinitic Lithomarge 49
III. Mottled Horizon: Nodulation and Accumulation of Iron 58
IV. Boundaries between Alteration Domains and Pedogenetic Domains 66

Chapter 4. FERRICRETES: FERRUGINOUS CARAPACES AND CUIRASSES 74

Introduction 74
I. Nomenclature of Structural Elements 75
II. Petrographic Facies 87
III. Petrographic Evolution of Cuirasses 91
IV. Classification of Cuirassed Facies 101

Chapter 5. GEOCHEMICAL BALANCE OF FERRUGINOUS CUIRASSEMENT 107

Introduction 107
I. Limitations of Petrographic Nomenclature 108
II. Mineralogical and Geochemical Profiles 111
III. Geochemical Balance at Three Scales 117
IV. Epigenetic Replacement 122
V. Geochemical Itineraries of Ferruginous Cuirassement 126

Part III
FERRUGINOUS CUIRASSED LANDSCAPES: CASE STUDIES

INTRODUCTION 129

Chapter 6. GEOCHEMISTRY AND GEOPHYSICS OF THE CUIRASSED LEVELS OF GAOUA AND BANANKORO 135

Introduction 135
I. Geochemistry of Cuirassed Levels of Donko 136
II. Cuirassed Plateau and Glacis of Banankoro 140
III. Geophysics, Nature and Topography of the Substratum 143
IV. Geochemistry, Geophysics and Dynamics of the Cuirassed Lateritic Profile 155

Chapter 7. GEOCHEMICAL DIFFERENTIATION AND HOMOGENIZATION OF CUIRASSED PLATEAUS 156

Introduction 156
I. Hydrographic Network: Evidence of Old Climates 156

II. Regional Distribution of Facies of the Haut-Glacis 157
III. Cuirasses of the Banankoro Plateau in Mali 157
IV. Cuirasses of the Donko Plateau in Burkina Faso 162
V. Regional and Geochemical Study of Cuirasses on Granites, Schists and Basic Rocks 168
VI. Geochemical Itineraries of Formation and Dismantlement of Cuirasses 173
VII. Lithodependence and Geochemical Homogenization 174
VIII. Erosion and Age of the Cuirasses 181

Chapter 8. FERRUGINOUS CUIRASSES OF CENTRAL AFRICA: LATERAL DYNAMICS AND DISMANTLEMENT IN HUMID CLIMATE 183

Introduction 183
I. The Three Cuirassed Systems of Haut-Mbomou 183
II. Geochemical Dismantlement of Cuirasses 191
III. Dismantlement and Lateral Regeneration of Cuirasses 197

Chapter 9. CUIRASSES OF THE IVORY COAST AND CUIRASSED GLACIS OF WEST AFRICA 199

Introduction 199
I. Lateritic Landscapes of Odienné 200
II. Glaebular Lateritic Soils of Odienné 205
III. Termite Activity 212
IV. Profile Placement 213
V. Initiation and Development of Ferruginous Cuirassement 213

Chapter 10. DYNAMICS OF FERRUGINOUS CUIRASSED LANDSCAPES 216

Introduction 216
I. Mass Transport of Substances in the Landscape 216
II. Theory of Ferruginous Cuirassement 228

Part IV
BAUXITES AND SOFT LATERITIC COVERS

INTRODUCTION 239

Chapter 11. Bauxites and Conakrytes 240

Introduction 240
I. Orthobauxites or Ferruginous Bauxites 243
II. Conakrytes: Ferruginous Equivalents of Orthobauxites 251
III. Cryptobauxites of Amazonia 254
IV. Metabauxites 262
V. Geochemistry of the Bauxitic Landscape of Famansa 266
VI. Regional Metabauxitization in West Africa 273
VII. Conclusion: Palaeoclimatic Changes 281

Chapter 12. PROTOBAUXITES AND SOFT LATERITIC SOILS 290

Introduction 290
I. Soils on Basalt in Cameroon 290
II. Polyphasic Glaebular Lateritic Soils 304
III. Inversion of Gibbsite-kaolinite Sequences 312
IV. Bauxitization and Soft Lateritic Covers 319

CONCLUSION 323

Chapter 13. HYDRATION, DEHYDRATION AND MECHANISMS OF EVOLUTION OF THE LATERITIC LANDSCAPE 323

Introduction 323
I. Water of the Lateritic Landscape 323
II. Climate, Hydrotopy and Classification of Tropical Soils 329
III. Dynamics of the Cuirassed Lateritic Profile 333
IV. Mineral-solution Equilibria in the Gibbsite-kaolinite-quartz System 340
V. Activity of Water and Shifting of Gibbsite-kaolinite Equilibria 344
VI. Equilibria between Aluminous and Ferruginous Minerals 348
VII. Fluctuations in Activity of Water in Lateritic Profiles 350
VIII. Hydration, Dehydration and Climatic Stability of Lateritic Covers 355

Glossary 361

Epilogue 375

Literature Cited 377

Credits 403
