

INTRODUCING GEOLOGY SERIES, NO. 4

ROCKS AND MINERALS

Janet Watson FRS

*Imperial College
University of London*

SECOND EDITION

London
GEORGE ALLEN & UNWIN
Boston Sydney

1	THE NATURE OF ROCKS AND MINERALS	1
2	THE HISTORY OF THE EARTH	2
3	THE PROPERTIES AND USES OF MINERALS	3
4	THE USES OF ROCKS AND MINERALS	4
5	THE EARTH'S CRUST	5
6	THE EARTH'S INTERIOR	6
7	INDEX	7

Contents

Preface	page 7	5 VOLCANIC ACTIVITY AND THE IGNEOUS ROCKS	34
		Volcanoes and their distribution	35
		Volcanic activity	35
		Lavas and pyroclastic rocks	38
		Igneous intrusions	40
		Classification of igneous rocks	41
1 LOOKING AT ROCKS	9	6 THE METAMORPHIC ROCKS	45
Rocks and their origins	9	Environments of metamorphism	45
Changes in the Earth	10	Contact aureoles	46
		Dislocation metamorphism	47
2 THE THREE CLASSES OF ROCKS	13	Regional metamorphism	47
Rock-forming processes	13		
The three classes of rocks	14	7 PROPERTIES AND USES OF MINERALS	50
Erosion: the destruction of rocks	16	Crystals and crystal symmetry	50
Earth movements	16	Other diagnostic properties	51
Mobility of the Earth's crust	17	Silicate minerals	53
		Non-silicate minerals	54
3 MINERALS	18	Ore deposits	56
Minerals in granite	18		
Minerals and rocks	18	8 THE USES OF ROCKS AND MINERALS	58
The composition of rock-forming minerals	19	Fuels	58
		Building materials	58
4 THE SEDIMENTARY ROCKS	21	Food production	58
The source materials	21	Industrial raw materials	58
Transport and differentiation	21	Ornaments	60
Environments of deposition	22		
Bedding	23	9 THE EARTH AS A WHOLE	61
Fossils	24	The crust, mantle and core	61
Changes after deposition, or diagenesis	25	The continents and oceans	63
The detrital rocks	26	The mobile belts	63
The chemical-organic rocks	28		
Water in sedimentary rocks	31	INDEX	70
Petroleum, oil and gas	33
