

# Rock Mechanics and Engineering

Editor: Xia-Ting Feng

Volume 3: Analysis, Modeling  
& Design

## Contents

<b>1</b>	<b>Back Analysis</b>	
1.1	Back Analysis methodology and its application to rock joints	73
1.2	OTECORE: A 3D 3D finite element model	73
1.3	Photo-induced damage	591
1.4	Rock mass classification	591
1.5	Welded joints in granite block structures	591
1.6	Rock mass propagation velocity	591
1.7	TOC: A new technique for jointed rock mass classification	591
<b>2</b>	<b>Numerical Modeling Methods</b>	
2.1	Coupled THMC modeling for safety assessment of geological disposal of radioactive wastes: The DECOVALEX project (1992–2015)	3
2.2	J.A. HUDSON, C.-F. TSANG & L. JING	
2.3	Dynamic relaxation applied to continuum and discontinuum numerical models in geomechanics	45
2.4	P. CUNDALL & C. DETOURNAY	
2.5	The numerical Discontinuous Deformation Analysis (DDA) method: Benchmark tests	91
2.6	G. YAGODA-BIRAN & Y.H. HATZOR	
2.7	Continuum-discontinuum element method	121
2.8	S.H. LI, D. ZHOU, J. WANG & C. FENG	
2.9	Discrete element modeling: Principle and application in weak cemented particulate materials	151
2.10	T.G. SITHARAM & S.D. ANITHA KUMARI	
2.11	Practical equivalent continuum analyses of jointed rockmass: Experiments, numerical modeling, validation and field case studies	173
2.12	T.G. SITHARAM	
<b>3</b>	<b>Back Analysis</b>	201
3.1	Back analysis in rock engineering practice	203
3.2	S. SAKURAI	

8 Back-analysis of rock landslides to infer rheological parameters S. MARTINO, M. DELLA SETA & C. ESPOSITO	237
9 Multi-approach back analysis in mining L.R. ALEJANO	269
<b>Risk Analysis</b>	<b>297</b>
10 Groundwater and underground excavations: From theory to practice M. SHARIFZADEH & M. JAVADI	299
11 Reliability assessment of ultimate and serviceability limit states of underground rock caverns A.T.C. GOH & W. ZHANG	331
12 Risk assessment of CO <sub>2</sub> injection processes and storage L. RIBEIRO E SOUSA, R. LEAL E SOUSA, E. VARGAS JR., R. VELLOSO & K. KARAM	359
<b>Design and Stability Analysis: Overviews</b>	<b>399</b>
13 Empirical design methods in underground mining P.B. HUGHES, D. MILNE, R.C. PAKALNIS & A. SAMANIEGO	401
14 20 years of intelligent rock mechanics X.T. FENG & C.X. YANG	425
15 Rock Engineering Systems (RES): An update J.A. HUDSON	451
<b>Design and Stability Analysis: Coupling Process Analysis</b>	<b>481</b>
16 Multiphysics of coal-gas interactions M.Y. WEI, Z.W. CHEN, J.S. LIU, G.L. CUI, Y.L. TAN & S.W. ZHANG	483
17 Geomechanical stability and integrity of nuclear waste disposal mines in salt structures S. HEUSERMANN, S. FAHLAND & R. EICKEMEIER	513
18 Rock engineering in underground compressed air energy storage D. RYU, H. KIM & D. PARK	549

<b>Design and Stability Analysis: Blast Analysis and Design</b>	<b>579</b>
19 Blast-induced damage F.G. BASTANTE	581
20 Blasting propagation velocity C. GONZÁLEZ-NICIEZA & M.I. ÁLVAREZ-FERNÁNDEZ	601
21 Statistical estimation of blast fragmentation J.-H. HAN & J.-J. SONG	637
22 Blasting parameters E. GHASEMI & M. RAHMANPOUR	669
<b>Rock Slope Stability Analysis and Design</b>	<b>703</b>
23 Application of fracture mechanics to rock slopes D. ELMO & D. STEAD	705
24 Development and application of numerical limit analysis for geotechnical materials Z. YINGREN	737
25 Open pit slope design J.R.L. READ & P.F. STACEY	785
<b>Analysis and Design of Tunnels, Caverns and Stopes</b>	<b>819</b>
26 Q-system: An illustrated guide for tunneling N. BARTON & E. GRIMSTAD	821
27 TBM performance, prognosis and risk reduction N. BARTON	865
28 Design guidelines for open stope support Y. POTVIN	903
<b>Series page</b>	<b>915</b>
