CONTENTS

5	Resistance to weathering	107
	Chemical weathering Chemical weathering of minerals Chemical weathering of rocks Physical weathering Conclusions	113 114 120 122 136
6	Weathering profiles and landform development	138
	Weathering front Weathering profile differentiation Weathering grades Weathering depths Weathering and the water table Spatial patterns of weathering profiles Duricrusts Weathering profiles and slope form	138 139 148 151 154 154 154 156 159
	Weathering and rock strength Weathering and slope instability	161
	Threshold slopes	167
7	Instability in jointed and fissured rock	170
	Characteristics of jointed rock Unloading joints and rebound phenomena Models of jointed rock behaviour Rock mass strength classifications Strength equilibrium slopes Modes of rock failure	171 182 184 190 192 200
8	Landforms on granitic rocks	208
	Inselbergs Domed inselbergs (bornhardts) Tors (boulder inselbergs) Landscape types Conclusions	209 212 221 227 230
9	Properties and landforms of mudrocks	231
	Terminology of mudrocks Composition of mudrocks Consolidation and unloading of mudrocks	231 231 233
