

Proceedings of the
27th International Geological Congress
Moscow 4-14 August 1984

Volume 4

SEDIMENTOLOGY

Professor N. A. SOXTANOV
General Secretary of the
Organizing Committee

WNU SCIENCE PRESS

Utrecht, The Netherlands

1984

CONTENTS

Preface	v
Supergene and sedimentogenesis: transport and accumulation of sediments in different environments J. Konta	1
Specific features of sedimentary mineral processes in oceans and continents A.G. Kossovskaya	15
A petrochemical aspect of the zeolite formation in volcanoclastic rocks A. Iijima	29
Landscapes of molasse accumulation P.P. Timofeev	53
Lithofacies of Variscan molasses of the West Carpathians A. Vozarova	71
Coal position in the coal-bearing sequences of the limnic basins: importance of the subsidence rate L. Courel, P. Laurent and P. Vetter	87
Genetical types, facies and formation of sedimentary deposits G.F. Krashennnikov	99

The impact of climate on the geochemistry of fine-grained marine rocks in intracratonic basins L.A. Frakes and B.R. Bolton	115
Relationships between evaporite deposits and petroleum J.L. Wilson	127
Structure and formation of evaporite formations V.I. Sedletsy, A.A. Baikov and N.I. Boiko	147
Evolution of halogenic sedimentation through geological history M.A. Zharkov	161
Evolution of source province as the most important factor of sedimentary ore formation V.N. Kholodov	175
Sediment dispersal on the South Bulgarian Black Sea shelf - lithological criteria Kh.G. Khrishev	199
Dynamics of interrelation between lithogenesis and tectogenesis G.A. Kaleda	213
Sedimentary basins and conditions of sedimentation in the history of the Earth P.P. Timofeev and V.N. Kholodov	231
