Tectono- fractography

With 197 Figures in 299 Parts

Springer-Verlag

Berlin Heidelberg New York

London Paris Tokyo

Hong Kong Barcelona

Budapest

Contents

Chapter 1 Introduction to Fracture	1
1.1 Basic Concepts of Elastic Fracture	1
1.1.1 The Stress Concentration Factor	1
1.1.2 The Griffith Energy-Balance Concept	3
1.1.3 Obreimoff's Experiment	7
1.1.4 Fracture Mechanics	9
1.1.5 The Maximum σ_{90} Criterion	14
1.1.6 Fracture in Compression	16
1.1.7 Experimental	17
1.2 Plastic Zones Ahead of the Crack	22
1.2.1 Introduction	22
1.2.2 Various Manifestations of the Plastic Zone	22
1.2.3 The Size of the Plastic Zone in Silicate Glasses ...	25
1.2.4 Plane Strain and Plane Stress	26
1.2.5 Secondary Cracks in the Plastic Zone	29
1.2.6 The Damage Zone	30
1.3 Atomistic Concepts of the Crack Tip	31
1.3.1 Thomson's Three Prototypes	31
1.3.2 The LRT Atomistic Surface Force Model	33
1.3.3 The Dissociative Chemisorption Model	34
1.4 Kinetic Processes in Fracture	36
1.4.1 Subcritical Crack Growth	36
1.4.2 Failure Prediction	44
1.4.3 Supercritical Crack Velocities	46
1.4.4 Fracture Branching	49
1.5 Microstructural Aspects of Fracture in Polycrystalline (Grainy) Materials	51
1.5.1 General	51
1.5.2 Dependence of Mechanical Properties on Microstructure	52
1.5.3 Crack Shielding	53
1.5.4 Fracture in Concrete	54
1.5.5 Limitations and Deviations from Simple Microstructure-Strength Relationship	56
1.6 Fracture in Rocks	57
1.6.1 Joint Initiation Stage	58

1.6.2 Joint Propagation	59
1.6.3 Joint Arrest	61
Chapter 2 Fractography in Technical Materials	63
2.1 Fracture Surface Morphology — Basic Geometry	63
2.1.1 Introduction	63
2.1.2 Fracture Categories	67
2.1.3 The Quantitative Mirror Plane	101
2.1.4 Crack Branching	111
2.2 Terminology	118
2.3 Applied Fractography	119
2.3.1 Fractography as a Tool of Fracture Diagnosis in Glass Bottles	120
2.3.2 The Fractography of Metal Failures	132
2.3.3 Fractography in Polymethylmethacrylate	135
Chapter 3 Rock Fractography	139
3.1 Fracture Markings on Joint Surfaces	139
3.1.1 Early Studies	139
3.1.2 Plumes and Related Structures	142
3.1.3 Rib Markings	159
3.1.4 Combined Markings of Plumes and Ribs	166
3.1.5 Affinities of Specific Joint Markings to Certain Joint Directions	167
3.1.6 The Fringe	170
3.1.7 Discoid Radial and Ring Joints	183
3.1.8 Fracture Mechanisms	189
3.1.9 Fracture Markings in Thermally Deformed Rocks and in Granite	195
3.2 Induced Fracturing in Rocks	202
3.2.1 Controlled Laboratory Conditions	202
3.2.2 Fractography Induced by Coring	205
3.2.3 Markings Induced by Quarrying	209
Chapter 4 Characterization and Classification of Fracture Surface Morphology in Geologic Formations	211
4.1 Qualitative Characterization of Fracture Surface Markings	211
4.1.1 Descriptive Parameters of Fracture Surface Markings	211
4.2 Quantitative Characterization of Fracture Surface Markings	223
4.2.1 Measureable Parameters of Fracture Surface Markings	223
4.3 Classification of Fracture Surface Markings	237

Chapter 5 Tectonofractography	239
5.1 Application of Joint Surface Morphology in Tectonics ..	239
5.1.1 Assumptions	239
5.1.2 Problems Involved in the Transition from Material Science to Tectonophysics	240
5.2 Burial Jointing	240
5.2.1 Early Burial Joints in Lower Eocene Chalks Near Beer Sheva	241
5.2.2 Jointing in Middle Eocene Chalks South of Beer Sheva	245
5.2.3 Burial Joints and Syntectonic Joints in the Appalachian Plateau, U.S.A.	248
5.2.4 Common Features of Burial Joints	255
5.3 Syntectonic Jointing	258
5.3.1 Syntectonic Jointing in Santonian Chalks, Israel ..	259
5.3.2 Upper Cretaceous Chalks in East France	265
5.3.3 Upper Cretaceous Chalks in South England	267
5.3.4 Upper Palaeozoic Fractures in Shales of the Appalachian Plateau, New York	274
5.3.5 Jointing in the Entrada Sandstone, Utah	274
5.3.6 Syntectonic Jointing in Association with Fault Termination	275
5.3.7 Syntectonic Joints Related to Unfolding	277
5.3.8 Syntectonic Discoidal Fracturing in Flint Clays ...	279
5.3.9 Characteristic Features of Syntectonic Joints	279
5.4 Uplift Jointing	282
5.4.1 Burial Joints and Uplift Joints in Lower Eocene Chalks Around Beer Sheva	282
5.4.2 Uplift Joints in Middle Eocene Chalks and Limestones from the Northern Negev (Southern Israel)	285
5.4.3 Unloading and Release Joints from the Appalachian Plateau, U.S.A.	287
5.4.4 Sequential Formation of Uplift Joints	290
5.4.5 Vertical Propagation of Uplift Joints	292
5.4.6 Orthogonal Joint Sets	297
5.4.7 Fracture Markings on Horizontal Surfaces	297
5.4.8 Common Features of Uplift Joints	298
5.5 Post Uplift Jointing	301
5.6 Comparison of Jointing During the Three Major Tectonic Phases: a Summary	302
5.6.1 Spatial Characters of the Joint Plane	302
5.6.2 Fracture Surface Markings	310
5.7 Propagation, Opening, Mineralization and Joint Intensity of the Various Joint Types	313

5.7.1 Propagation, Opening and Mineralization	313
5.7.2 Joint Intensity	316
5.8 Approximate Maximum Depths at Which Various Joint Types Develop	316
5.9 Fracture Interaction	317
5.9.1 Extents of Joint Interaction	318
5.9.2 Conditions of Joint Interaction	320
5.9.3 Interaction Mechanisms of Experimental Cracks and Faults	322
5.9.4 Extensional Branching of Faults	323
