Contents

<i>Preface</i>	page vii
<i>Acknowledgements</i>	ix
1 To diagnose the Earth	1
Nature of earth sciences	2
Extrapolation	6
Discussion	9
2 Scientific method	10
Methods	10
<i>Differential diagnosis</i>	14
<i>Method in earth sciences</i>	18
<i>Multiple hypotheses</i>	19
<i>Analogy with scientific paper</i>	24
Criticism of the scientific method	26
<i>Resistance to change</i>	28
<i>Falsification</i>	29
<i>Probability and quality of a hypothesis</i>	30
<i>Pseudoscience and the scientific approach</i>	32
Discussion	33
3 Problems of explanation and extrapolation	35
Problems of scale and place	36
Time	36
Space	47
Location	54
Problems of cause and process	58
Convergence	58
Divergence	62
Efficiency	66
Multiplicity	70
Problems of systems response	75
Singularity	75
Sensitivity	78

Contents

Complexity	85
Discussion	94
4 Scientific approach and solutions	95
Establishing cause and effect	96
Solutions	98
History	99
Process	102
Comparisons	105
Final example	108
Final words	119
References	120
Index	132
