

24 The surface of the landscape is an important signifier. In post-Baathist Baghdad, restrictions on architectural façades have been lifted, enabling a new colorful identity for parts of the city.

Aman Oghanna

82 A gate remains after the devastation following the earthquake and tsunami in Japan. Community involvement and consideration are key to resilience in this devastated landscape.

Miho Mazereeuw

Mohamed Elshahed

12 The recent political changes in Northern Africa were played out in public space. One of the most famous, Tahrir Square in Cairo, Egypt, is one example of how the use of public protest combined with social media enabled profound change.

Alan Berger

30 A nutrient plume released into the sea is the result of an "External Landscape" where costly externalities harmful to the environment were not considered.

Anthony Acciavatti

70 The Ganges River is part of a complex ecological and social system. Understanding the waterway can offer solutions for a diversity of problems.

Dan Weissman

90 In the aftermath of the 2010 earthquake in Haiti, social, political and economic challenges make change difficult, yet there are viable plans for improvement.
